

INFORMATION ON VOTING SYSTEMS AT
SOCIEDAD QUIMICA Y MINERA DE CHILE S.A.'s
ANNUAL GENERAL SHAREHOLDERS' MEETING
TO BE HELD ON APRIL 23, 2021

1. The matters to be submitted to the decision of Sociedad Química y Minera de Chile S.A.'s Annual Ordinary Shareholders Meeting to be held on April 23, 2021 (the "Meeting") shall be individually voted upon unless, by unanimous agreement of the shareholders present with right to vote, the voting can be omitted on one or more subjects and the vote is therefore made by acclamation.
2. The voting system to be used in the Meeting shall be the paper "ballot". This is a voting system that allows gathering in writing, by means of a paper "ballot", or remotely, the decision made by each of the shareholders entitled to vote on the matters that are being put to vote. The system ensures that this decision will be made secretly, and, after the vote, the shareholder can be identified, along with the way they voted.
3. The issuance of the votes in the "ballot" system will be done by means of one or more paper "ballots" which include the subjects being submitted to vote and the identification of the Shareholder or representative.
4. The "ballots" shall be handed out according to the attendance list. In the case of remote voting, the process will be defined and communicated before the commencement of the Meeting.
5. The matters may be voted upon in one or more "ballots" and the number of votes that correspond to the Shareholder must be indicated in each one of them. In those cases where the law allows the separation of votes, the shareholder may require more than one "ballot".
6. The counting of votes will be done manually and read out loud immediately after the end of the voting process and the results shall be displayed so that they can be seen by the shareholders present.
7. Once the voting process has been completed, how each shareholder voted shall be made public.
