Note 1 Identification and Activities of the Company and Subsidiaries

1.1 Historical background

Sociedad Química y Minera de Chile S.A. ("SQM") is an open stock corporation founded under the laws of the Republic of Chile and its Chilean Tax Identification Number is 93.007.000-9.

The Company was incorporated through a public deed dated June 17, 1968 by the public notary of Santiago Mr. Sergio Rodríguez Garcés. Its existence was approved by Decree No. 1,164 of June 22, 1968 of the Ministry of Finance, and it was registered on June 29, 1968 in the Registry of Commerce of Santiago, on page 4,537 No. 1,992, SQM's headquarters are located at El Trovador 4285, Floor 6, Las Condes, Santiago, Chile, The Company's telephone number is +56 2 2425-2000.

The Company is registered with the Commission for Financial Markets (formerly SVS) under number 184 of March 18, 1983 and is therefore subject to oversight by that entity.

1.2 Main domicile where the Company performs its production activities

The Company's main domiciles are: Calle Dos Sur plot No. 5 - Antofagasta; Arturo Prat 1060 - Tocopilla; Administration Building w/n - Maria Elena; Administration Building w/n Pedro de Valdivia - María Elena, Anibal Pinto 3228 - Antofagasta, Kilometer 1378 Ruta 5 Norte Highway - Antofagasta, Coya Sur Plant w/n - Maria Elena, kilometer 1760 Ruta 5 Norte Highway - Pozo Almonte, Salar de Atacama (Atacama Saltpeter deposit) potassium chloride plant w/n - San Pedro de Atacama, potassium sulfate plant at Salar de Atacama w/n – San Pedro de Atacama, Minsal Mining Camp w/n CL Plant CL, Potassium– San Pedro de Atacama, formerly the Iris Saltpeter office w/n, Commune of Pozo Almonte, Iquique.

1.3 Codes of main activities

The codes of the main activities as established by the CMF, as follows:

- 1700 (Mining)
- 2200 (Chemical products)
- 1300 (Investment)

1.4 Description of the nature of operations and main activities

The products of the Company are mainly derived from mineral deposits found in northern Chile where mining takes place and caliche and brine deposits are processed.

Note 1 Identification and Activities of the Company and Subsidiaries (continued)

1.4 Description of the nature of operations and main activities, continued

From the caliche ore deposits, it is produce a wide range of nitrate-based products used for specialty plant nutrients and industrial applications, as well as iodine and iodine derivatives. At the Salar de Atacama, we extract brines rich in potassium, lithium, sulfate and boron in order to produce potassium chloride, potassium sulfate, lithium solutions and bischofite (magnesium chloride) and derivatives.

Specialty plant nutrition: Four main types of specialty plant nutrients are produced: potassium nitrate, sodium nitrate, sodium potassium nitrate and specialty blends. In addition, other specialty fertilizers are sold including third party products.

Iodine: the Company produce iodine and iodine derivatives, which are used in a wide range of medical, pharmaceutical, agricultural and industrial applications, including x-ray contrast media, polarizing films for LCD and LED, antiseptics, biocides and disinfectants, in the synthesis of pharmaceuticals, electronics, pigments and dye components.

Lithium: the Company produces of lithium carbonate, which is used in a variety of applications, including electrochemical materials for batteries, frits for the ceramic and enamel industries, heat-resistant glass (ceramic glass), air conditioning chemicals, continuous casting powder for steel extrusion, primary aluminum smelting process, pharmaceuticals and lithium derivatives, We are also a leading supplier of lithium hydroxide, which is primarily used as an input for the lubricating greases industry and for certain cathodes for batteries.

Industrial chemicals: the Company produce three industrial chemicals: sodium nitrate, potassium nitrate and potassium chloride. Sodium nitrate is used primarily in the production of glass, explosives, and metal treatment. Potassium nitrate is used in the manufacturing of specialty glass, and it is also an important raw material for the production of frits for the ceramics and enamel industries. Solar salts, a combination of potassium nitrate and sodium nitrate, are used as a thermal storage medium in concentrated solar power plants. Potassium chloride is a basic chemical used to produce potassium hydroxide, and it is also used as an additive in oil drilling as well as in food processing, among other uses.

Potassium: the Company produce potassium chloride and potassium sulfate from brines extracted from the Salar de Atacama. Potassium chloride is a commodity fertilizer used to fertilize a variety of crops including corn, rice, sugar, soybean and wheat. Potassium sulfate is a specialty fertilizer used mainly in crops such as vegetables, fruits and industrial crops.

Other products and services: the Company also sell other fertilizers and blends, some of which we do not produce. We are the largest company that produces and distributes the three main potassium sources: potassium nitrate, potassium sulfate and potassium chloride. This business line also includes revenue from commodities, services, interests, royalties and dividends.

Note 2 Basis of presentation for the consolidated financial statements

2.1 Accounting period

These consolidated financial statements cover the following periods:

- Consolidated Interim Statements of Financial Position as of June 30, 2019 and, December 31, 2018.
- Consolidated Interim Statements of Changes in Equity for ended June 30, 2019 and 2018.
- Consolidated Interim Statements of Comprehensive Income for ended June 30, 2019 and 2018.
- Consolidated Interim Statements of Direct-Method Cash Flows for ended June 30, 2019 and 2018.

2.2 Consolidated financial statements

The consolidated interim financial statements of Sociedad Química y Minera de Chile S.A. and its subsidiaries were prepared in accordance with la IAS 34 “Interim Financial Reporting”.

These consolidated interim financial statements fairly reflect the Company’s financial position, the comprehensive results of operations, changes in equity and cash flows occurring during the periods ended on June 30, 2019 and, 2018.

The consolidated interim financial statements should be read in conjunction with the annual financial statements as of December 31, 2018.

IFRS establish certain alternatives for their application, those applied by the Company are detailed in this Note.

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.2 Consolidated financial statements, continued

The accounting policies used in the preparation of these consolidated annual accounts comply with each IFRS in force at their date of presentation.

As of June 30, 2019, at the close of these consolidated financial statements, certain reclassifications were made as of December 31, 2018 y June 30, 2018, as detailed below:

Reclassification as of 12/31/2018	ThUS\$
	Debit/(Credit)
Trade and other receivables, current	1,764
Trade receivables due from related parties, current	(1,764)
Other current non-financial assets	(1,214)
Intangible assets other than goodwill	1,214
Intangible assets other than goodwill	(148)
Goodwill	148

Reclassification as of 06/30/2018	ThUS\$
	Debit/(Credit)
Cost of sales	1,511
Finance costs	(1,511)

2.3 Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following:

- Inventories are recorded at the lower of cost and net realizable value.
- Financial derivatives at fair value; and
- Certain financial investments classified as available for sale measured at fair value with an offsetting entry in other comprehensive income.
- Other current and non-current assets and financial liabilities at amortized cost.

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.4 Accounting pronouncements

New accounting pronouncements

- a) The following standards, interpretations and amendments are mandatory for the first time for annual periods beginning on January 1, 2019:

<i>Standards and Interpretations</i>	<i>Mandatory for annual periods beginning on or after</i>
<p>IFRS 16 "Leases" - issued in January 2016. Establishes the standards to recognize, measure, present and disclose leases. IFRS 16 replaces IAS 17 and introduces a unique lessee accounting model that requires a lessee to recognize the assets and liabilities of all rental contracts with a term of over 12 months, unless the underlying asset is of low value. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, and early implementation is permitted for entities that apply IFRS 15, or before the date that IFRS 16 is initially implemented.</p>	01/01/2019
<p>IFRIC 23 Uncertainty over Income Tax Treatments. Published in June 2016. This interpretation clarifies how to apply the recognition and measurement requirements in IAS 12, when there is uncertainty over income tax treatments.</p>	01/01/2019
<i>Amendments and improvements</i>	<i>Mandatory for annual periods beginning on or after</i>
<p>Amendment to IFRS 9 Financial Instruments. Published in October 2017. The amendment permits more assets to be measured at amortized cost than under the previous version of IFRS 9, in particular some prepayable financial assets with negative compensation. The assets affected, which include some loans and debt securities, would otherwise have been measured at fair value through profit and loss (FVTPL). For them to qualify for amortized cost measurement, the negative compensation must be "reasonable compensation for early termination of the contract."</p>	01/01/2019
<p>Amendment to IAS 28 "Investments in Associates and Joint Ventures" Published in October 2017. This amendment clarifies that companies should apply IFRS 9 to account for long-term interests in an associate or joint venture to which the equity method is not applied. The IASB Board has published an example that illustrates how companies should apply the requirements of IFRS 9 and IAS 28 to long-term interests in an associate or joint venture.</p>	01/01/2019

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.4 Accounting pronouncements, continued

<i>Amendments and improvements</i>	<i>Mandatory for annual periods beginning on or after</i>
Amendment to IFRS 3 “Business Combinations” - Published in December 2017. The amendment clarified that gaining control of a company that is a joint venture deals with a business combination that is achieved in stages. The acquirer must remeasure previously held interests in that business at fair value at the date of acquisition.	01/01/2019
Amendment to IFRS 11 “Joint Arrangements” - Published in December 2017. The amendment clarified that when an entity obtains joint control of a business that is a joint operation, the entity does not remeasure previously held interests in that business.	01/01/2019
Amendment to IAS 12 “Income Tax” - Published in December 2017. This modification clarified that the income tax consequences of dividends on financial instruments classified as equity should be recognized when the past transactions or events that generated distributable profits were originally recognized.	01/01/2019
Amendment to IAS 23 Borrowing Costs - Published in December 2017. This amendment clarifies that the borrowing costs of specific borrowings that remain outstanding after the related qualifying asset is ready for intended use or for sale will be considered as part of the general borrowing costs of the entity.	01/01/2019
Amendment to IAS 19 “Employee Benefits” - Published in February 2018. The amendment requires entities to use updated assumptions to determine the current service cost and net interest for the remainder of the period after a modification, reduction or settlement of the plan; and to recognize in profit or loss as part of the cost of the past service, or a profit or loss in the settlement, any reduction in a surplus, even if that surplus was not previously recognized because it did not exceed the upper limit of the asset.	01/01/2019

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.4 Accounting pronouncements, continued

b) Standards, interpretations and amendments issued that had not become effective for financial statements beginning on January 1, 2019 and which the Company has not adopted early are as follows:

<i>Amendments and improvements</i>	<i>Mandatory for annual periods beginning on or after</i>
Amendment to IFRS 3 “Definition of a Business” - Published in October 2018. This amendment revises the definition of a business. Based on the feedback received by the IASB, the application of the current guidance is frequently seen as too complex, and results in too many transactions that qualify as business combinations.	01/01/2020
Amendment to IAS 1 “Presentation of Financial Statements” and “IAS 8” Accounting Policies, Changes in Accounting Estimates and Errors - Published in October 2018. This uses a consistent definition of materiality in all of the IFRCs and the Conceptual Framework for Financial Information; it clarifies the explanation of the definition of material; and it incorporates some of the guidelines in IAS 1 on immaterial information.	01/01/2020
Management believes that the adoption of the above standards, amendments and interpretations will have no significant impact on the Company’s financial statements, except for the adoption of IFRS 16 as explained in Note 4.	

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.4 Accounting pronouncements, continued

Amendments and improvements

*Mandatory for annual
periods beginning on
or after*

Amendment to IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures”, Published in September 2014. These amendments address an inconsistency between the requirements in IFRS 10 and those in IAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not), A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary.

Undetermined

The Management estimates that the adoption of the standards, interpretations and amendments described above will not have a significant impact on the Company’s consolidated financial statements.

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.5 Basis of consolidation

(a) Subsidiaries

These are all those entities where Sociedad Química y Minera de Chile S.A. has control over directing their financial and operational policies, this is generally accompanied by a share of more than half of the voting rights, Subsidiaries apply the same accounting policies of their Parent.

To account for the acquisition, the Company uses the acquisition method. Under this method the acquisition cost is the fair value of assets delivered, equity securities issued, and liabilities incurred or assumed at the date of exchange. assets, The liabilities and contingencies identifiable assumed in a business combination are measured initially at fair value at the acquisition date. For each business combination, the Company will measure non-controlling interest of the acquiree either at fair value or as proportional share of net identifiable assets of the acquire. For more information, please see Note 8.1.

Companies included in consolidation:

- 3) On April 01, 2019, Proinsa Ltda was liquidated.
- 4) Comercial Agrorama Ltda was consolidated as it is controlled through the subsidiary Soquimich Comercial S.A.

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.5 Basis of consolidation, continued

Subsidiaries are consolidated using the line-by-line method, adding the items that represent assets, liabilities, revenues, and expenses of similar content, and eliminating those related to intragroup transactions.

Profit or loss of subsidiaries acquired or divested during the year are included in profit or loss accounts consolidated from the date control is transferred to the Group, or up to the date control is lost, as applicable.

Non-controlling interest represents the equity of a subsidiary not directly or indirectly attributable to the Parent.

Note 2 Basis of presentation for the consolidated financial statements (continued)

2.6 Investments in associates and joint ventures

Joint ventures

Investments in joint arrangements are classified as joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

With respect to joint operations, the Company recognizes its direct right to the assets, liabilities, income and expenses of the joint operation and its share of the jointly owned or incurred assets, liabilities, income and expenses.

Joint ventures and investments in associates

Interests in companies over which joint control is exercised (joint ventures) or where an entity has significant influence (associates) are recognized using the equity accounting method. Significant influence is presumed when the investor owns over 20% of the investee's share capital. The investment is recognized using this method in the statement of financial position at cost plus changes subsequent to acquisition, and includes the proportional share of the associate's equity. For these purposes, the percentage interest in the associate is used. The associated acquired goodwill is included in the investee's book value and is not amortized. The debit or credit to the income statement reflects the proportional share of the profit or loss of the associate.

Unrealized gains from transactions with subsidiaries or associates are eliminated in accordance with the Company's percentage interest in such entities. Any unrealized losses are also eliminated, unless that transaction provides evidence that the transferred asset is impaired.

Changes in associate's equity are recognized proportionally with a charge or credit to "Other Reserves" and are classified according to their origin. The reporting dates of the associate, the Company and related policies are similar for equivalent transactions and events in similar circumstances. In the event that significant influence is lost, or the investment is sold, or held for sale, the equity method is suspended, until the proportional part of the gain or loss is recognized. If the resulting value under the equity method is negative, the share of profit or loss is reflected as zero in the consolidated financial statements, unless there is a commitment by the Company to restore the capital position of the Company, in which case the related risk provision and expense are recorded.

Dividends received by these companies are recorded by reducing the value of the investment, and the proportional part of the gain or loss recognized in accordance with the equity method is included in the consolidated income statement under "Share of Gains (Losses) of Associates and Joint Ventures Accounted for Using the Equity Method".

Note 3 Significant accounting policies

3.1 Classification of balances as current and non-current

In the attached consolidated statement of financial position, balances are classified in consideration of their recovery (maturity) dates; i.e., those maturing within a period equal to or less than 12 months are classified as current counted from the closing date of the consolidated financial statements and those with maturity dates exceeding the aforementioned period are classified as non-current.

The exception to the foregoing relates to deferred taxes, which are classified as non-current, regardless of the maturity they have.

3.2 Functional and presentation currency

The Company's consolidated financial statements are presented in United States dollars ("U.S. dollars"), which is the Company's functional and presentation currency and is the currency of the main economic environment in which it operates.

Consequently, the term foreign currency is defined as any currency other than the U.S. dollar.

The consolidated financial statements are presented in thousands of United States dollars without decimals.

3.3 Foreign currency translation

(a) Group entities:

The revenue, expenses, assets and liabilities of all entities that have a functional currency other than the presentation currency are converted to the presentation currency as follows:

- Assets and liabilities are converted at the closing exchange rate prevailing on the reporting date.
- Revenues and expenses of each profit or loss account are converted at monthly average exchange rates.
- All resulting foreign currency translation gains and losses are recognized as a separate component in translation reserves.

In consolidation, foreign currency differences arising from the translation of a net investment in foreign entities are recorded in equity (other reserves). At the date of disposal, such foreign currency translation differences are recognized in the statement of income as part of the gain or loss from the sale.

Note 3 Significant accounting policies (continued)

3.3 Foreign currency translation, continued

The main exchange rates and the adjustment unit used to translate monetary assets and liabilities, expressed in foreign currency at the end of each period in respect to U.S. dollars, are as follows:

	06/30/2019	12/31/2018
	US\$	US\$
Brazilian real	3.83	3.87
New Peruvian sol	3.29	3.37
Argentine peso	42.45	37.74
Japanese yen	107.84	110.38
Euro	0.88	0.87
Mexican peso	19.19	19.68
Australian dollar	1.43	1.42
Pound Sterling	0.79	0.79
South African rand	14.10	14.35
Ecuadorian dollar	1.00	1.00
Chilean peso	679.15	694.77
Chinese yuan	6.87	6.88
Indian rupee	69.02	69.93
Thai baht	30.68	32.53
Turkish lira	5.78	5.27
UF (*)	41.09	39.68

(*) The UF is an indexed monetary unit used in Chile, calculated based on the variation in the CPI. It is represented as dollars to UF.

(b) Transactions and balances

Non-monetary transactions in currencies other than the functional currency (Dollar) are translated to the respective functional currencies of Group entities at the exchange rate on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. All differences are recorded in the statement of income except for all monetary items that provide an effective hedge for a net investment in a foreign operation. These items are recognized in other comprehensive income on the divestment, when they are recognized in the statement of income. Charges and credits attributable to foreign currency translation differences on those hedge monetary items are also recognized in other comprehensive income.

Non-monetary assets and liabilities that are measured at historical cost in a foreign currency are retranslated to the functional currency at the historical exchange rate of the transaction. Non-monetary items that are measured based on fair value in a foreign currency are translated using the exchange rate at the date on which the fair value is determined.

Note 3 Significant accounting policies (continued)

3.4 Accounting Policies for Subsidiaries

SQM S.A., uses the level of control it has in subsidiaries as a basis to determine their share in the consolidated financial statements. This control consists of the Company's ability to exercise power in the subsidiary, exposure, or right, to variable performance from its share in the investee and the ability to use its power on the investee to have an influence on the amount of the investor's performance.

The Company prepares the consolidated financial statements using consistent accounting policies for the entire SQM Group. The consolidation of a subsidiary commences when the Company has control over the subsidiary and stops when control ceases.

3.5 Consolidated statement of cash flows

Cash equivalents correspond to highly-liquid short-term investments that are easily convertible into known amounts of cash. They are subject to insignificant risk of changes in their value and mature in less than three months from the date of acquisition of the instrument.

For the purposes of the statement of cash flows, cash and cash equivalents comprise cash and cash equivalents as defined above.

The statement of cash flows includes movements in cash performed during the year, determined using the direct method.

3.6 Financial assets

The Administration determines the classification of its financial assets, in accordance with the provisions of IFRS 9, at fair value (either through other comprehensive income, or through profits or losses), and at amortized cost. The classification depends on the business model of the entity to manage the financial assets and the contractual terms of the cash flows.

In the initial recognition, the Company measures its financial assets at fair value more or less, in the case of a financial asset that is not accounted for at fair value through profit or loss, the transaction costs that are directly attributable to the acquisition of the financial asset. In the case of commercial debtors and other accounts receivable, the initial recognition will measure their transaction price in accordance with the provisions of IFRS 15.

After initial recognition, the Company measures its financial assets according to the Company's business model for managing its financial assets and the contractual terms of its cash flows:

- i) Financial instruments measured at amortized cost, Financial assets that meet the following conditions are included in this category (a) the business model that supports it aims to maintain the financial assets to obtain the contractual cash flows and (b) the Contractual conditions of the financial asset give place, on specified dates, to cash flows that are only payments of the principal and interest on the outstanding principal amount.
- ii) The Company's financial assets that meet these conditions are: (a) cash equivalents; (b) related entity receivables; (c) trade debtors; (d) other receivables.

Note 3 Significant accounting policies (continued)

3.6 Financial assets, continued

- i) Financial instruments at fair value A financial asset should be measured at fair value through profit or loss or fair value through other comprehensive income, depending on the following:
 - a. "Fair Value Through Other Comprehensive Income": Assets held to collect contractual cash flows and to be sold, where the asset cash flows are only capital and interest payments, are measured at fair value through other comprehensive income. Changes in book values are through other comprehensive income, except for the recognition of impairment losses, interest income and exchange gains and losses, which are recognized in the income statement. When a financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to the income statement. Interest income from these financial assets is included in financial income using the effective interest method. Exchange gains and losses are presented in the income statement and impairment losses are separately presented in the income statement.
 - b. "Fair Value Through Profit and Loss": Assets that do not meet the amortized cost or "Fair Value Through Other Comprehensive Income" criteria are valued at "Fair Value Through Profit and Loss".

The Company evaluated at the date of each report, whether there was objective evidence that any asset or group of financial assets presented any impairment. An asset or group of financial assets presented a deterioration, if and only if, there was objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset or group of these. In order for impairment to be recognized, the loss event must have an impact on the estimation of future flows of the asset or groups of financial assets.

The Company evaluates expected credit losses associated with its debt instruments carried at amortized cost and fair value through other comprehensive income. The impairment method used depends on whether there has been a significant increase in credit risk.

The Company applies the IFRS 9 simplified approach to measure expected credit losses using the lifetime expected loss on all trade receivables. Expected credit losses are measured by grouping receivables by their shared credit risk characteristics and days overdue.

Therefore, the Company has concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for contract assets. Expected loss rates are based on sales payment profiles and historical credit losses within this period. Historical loss rates are adjusted to reflect current and expected information regarding macroeconomic factors that affect the ability of customers to meet their commitments.

Note 3 Significant accounting policies (continued)

3.7 Accounting policy for financial liabilities

The Company determines the classification of its financial liabilities, in accordance with the provisions of IFRS 9, at fair value or at amortized cost. The classification depends on the business model of the entity to manage the financial assets and the contractual terms of the cash flows.

In the initial recognition, the Company measures its financial liabilities by their fair value more or less, in the case of a financial liability that is not accounted for at fair value through profit or loss, the transaction costs that are directly attributable to the acquisition of the financial liability. After initial recognition, the Company measures its financial liabilities at amortized cost unless the Company, at the initial moment, irrevocably designates the financial liability as measured at fair value through profit or loss.

Financial liabilities measured at amortized cost are commercial accounts payable and other accounts payable and other financial liabilities.

3.8 Accounting policy for reclassifying financial instruments

When the Company changes its business model for managing financial assets, it will reclassify all its financial assets affected by the new business model. Financial liabilities cannot be reclassified.

3.9 Financial instrument offsetting

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred; and the control of the financial assets has not been retained.

The Company derecognizes a financial liability when its contractual obligations or a part of these are discharged, paid to the creditor or legally extinguished.

3.10 Derivative and hedging financial instruments

Derivatives are recognized initially at fair value as of the date on which the derivatives contract is signed and, they are subsequently assessed at fair value. The method for recognizing the resulting gain or loss depends on whether the derivative has been designated as an accounting hedge instrument and, if so, it depends on the type of hedging, which may be as follows:

- a) Fair value hedge of assets and liabilities recognized (fair value hedges);
- b) Hedging of a single risk associated with an asset or liability recognized or a highly probable forecast transaction (cash flow hedge).

Note 3 Significant accounting policies (continued)

3.10 Derivative and hedging financial instruments, continued

At the beginning of the transaction, the Company documents the relationship that exists between hedging instruments and those items hedged, as well as their objectives for risk management purposes and the strategy to conduct different hedging operations.

The Company also documents its evaluation both at the beginning and at the end of each period if the derivatives used in hedging transactions are highly effective to offset changes in the fair value or in cash flows of hedged items.

The fair value of derivative instruments used for hedging purposes is shown in Note 14.3 (hedging assets and liabilities). Changes in the cash flow hedge reserve are classified as a non-current asset or liability if the remaining expiration period of the hedged item is more than 12 months, and as a current asset or liability if the remaining expiration period of the entry is less than 12 months.

Derivatives that are not designated or do not qualify as hedging derivatives are classified as current assets or liabilities, and changes in the fair value are directly recognized through profit or loss.

a) Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The gain or loss relating to the effective portion of interest rate swaps that hedge fixed rate borrowings is recognized in profit or loss within finance costs, together with changes in the fair value of the hedged fixed rate borrowings attributable to interest rate risk. The gain or loss relating to the ineffective portion is recognized in profit or loss within other income or other expenses. If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortized to profit or loss over the period to maturity using a recalculated effective interest rate.

b) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is initially recognized with a debit or credit to other comprehensive income, while any ineffective portion is immediately recognized with a debit or credit to income, as appropriate.

Amounts taken to equity are transferred to profit or loss when the hedged transaction affects profit or loss, as when the hedged interest income or expense is recognized when a projected sale occurs. When the hedged entry is the cost of a non-financial asset or liability, amounts taken to other reserves are transferred to the initial carrying value of the non-financial asset or liability.

If the expected firm transaction or commitment is no longer expected to occur, the amounts previously recognized in equity are transferred to profit or loss. If a hedge instrument expires, is sold, finished, or exercised without any replacement, or if a rollover is performed or if its designation as hedging is revoked, the amounts previously recognized in other reserves are maintained in equity until the expected firm transaction or commitment occurs.

Note 3 Significant accounting policies (continued)

3.11 Derivative financial instruments not considered as hedges

Derivative financial instruments are recognized in accordance with IAS 39. The Company has derivative financial instruments to hedge foreign currency risk exposure.

The Company continually evaluates the existence of embedded derivatives in both its contracts and in its financial instruments. As of June 30, 2019 and December 31, 2018, the Company does not have any embedded derivatives.

3.12 Fair value initial measurements

From the initial recognition, the Company measures its assets and liabilities at fair value plus or minus transaction costs incurred that are directly attributable to the acquisition of a financial asset or issuance of a financial liability. After initial recognition, changes in the fair value of such derivatives are recognized in the income statement.

3.13 Deferred acquisition costs from insurance contracts

Acquisition costs from insurance contracts are classified as prepayments and correspond to insurance contracts in force, recognized using the straight-line method and on an accrual basis independent of payment date. They are recognized under other non-financial assets.

3.14 Classification Leases

Below are accounting policies applied by the Company in 2019 prior to the adoption of IFRS 16:

(a) Lease - Finance lease

Leases are classified as finance leases when the Company substantially owns all the risks and rewards inherent in the ownership of the asset. Finance leases are capitalized at the commencement of the lease term at the lower of the fair value of the leased asset and the present value of the minimum lease payments.

Each finance lease payment is apportioned between the liability and the finance charges so as to obtain the constant rate of interest on the remaining balance of the liability. The respective lease obligations, net of finance charges, are included in other non-current liabilities. The interest part of the finance cost is charged to the consolidated financial statements for the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability for each year.

(b) Lease - Operating lease

Leases where the lessor retains a significant part of the risks and benefits derived from the property are classified as operating leases. Operating lease payments (net of any incentive received by the lessor) should be recognized as an expense in the income statement or capitalized (as appropriate) over the lease term on a straight-line basis.

Below are the Company's new accounting policies after the adoption of IFRS 16 on January 1, 2019. These have been applied since the initial date of application:

Note 3 Significant accounting policies (continued)

3.14 Classification Leases, continued

(a) Right-of-use assets

The Company recognizes right-of-use assets on the initial lease date (i.e., the date on which the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, adjusted by any new measurement of the lease liability. The cost of right-of-use assets includes the amount of recognized lease liabilities, direct initial costs incurred and lease payments made on the start date or sooner, less the lease incentives received. Unless the Company is reasonably sure it will take ownership of the leased asset at the end of the lease period, the assets recognized through right-of-use are depreciated in a straight line during the shortest period of their estimated useful life and lease period. Right-of-use assets are subject to impairment as per “IAS 36 Impairment of Assets”.

(b) Lease liabilities

On the lease start date, the Company recognizes lease liabilities measured at present value of lease payments that will be made during the lease period (which haven't been paid by that date). Lease payments include fixed payments (including payments that are essentially fixed), less incentives for lease receivables, variable lease payments that are dependent on an index or rate, and amounts that are expected to be paid as guaranteed residual value. Lease payments also include the exercise price of a purchase option if the Company is reasonably sure it will exercise this and penalty payments for terminating a lease, if the lease period reflects that the Company will exercise the option to terminate. Variable lease payments that are not dependent on an index or rate are recognized as expenses in the period that produces the event or condition that triggers payment.

When calculating the present value of lease payments, the Company uses the incremental borrowing rate on the initial lease date if the interest rate implicit in the lease cannot be determined easily. After the start date, the lease liability balance will increase to reflect the accumulation of interest and will diminish as lease payments are made. Furthermore, the book value of lease liabilities is remeasured in the event of an amendment, a change in the lease period, a change in the fixed lease payments in substance or a change in the assessment to buy the underlying asset.

(c) Short-term leases and low-value asset leases

The Company applies the short-term lease recognition exemption to leases with a lease term of 12 months or less starting on the start date and that don't have a purchase option. It also applies the low-value asset lease recognition exemptions (i.e., when the underlying asset is below USD\$5,000). Lease payments in short-term leases and low-value asset leases are recognized as lineal expenses during the lease term.

(d) Significant judgments in the determination of the lease term for contracts with renewal options

The Company determines the lease term as the non-cancellable period of the lease, together with periods covered by an option to extend the lease if it is reasonably certain that this will be exercised, or any period covered by an option to terminate the lease, if it is reasonably certain that this will not be exercised.

Note 3 Significant accounting policies (continued)

3.14 Classification Leases, continued

The Company has the option, under some of its leases, to lease assets for additional terms. The Company applies its judgment when assessing whether it is reasonably certain that it will exercise the option to renovate. In other words, it considers all of the relevant factors that create an economic incentive for it to exercise the option to renovate. After the start date, the Company reevaluates the lease term if there is a significant event or change in the circumstances that are under its control and affect its capacity to exercise (or not exercise) the option to renovate.

3.15 Inventory measurement

The method used to determine the cost of inventories is the weighted average monthly cost of warehouse storage.

In determining production costs for own products, the company includes the costs of labor, raw materials, materials and supplies used in production, depreciation and maintenance of the goods that participate in the production process, the costs of product movement necessary to maintain stock on location and in the condition in which they are found, and also includes the indirect costs of each task such as laboratories, process and planning areas, and personnel expenses related to production, among others.

For finished and in-process products, the company has four types of provisions, which are reviewed quarterly:

1. Provision associated with the lower value of stock, which is directly identified with the product that generates it and involves three types: provision of lower realizable value, which corresponds to the difference between the inventory cost of intermediary or finished products, and the sale price minus the necessary costs to bring them to the same conditions and location as the product with which they are compared; provision for future uncertain use that corresponds to the value of those products in process that are likely not going to be used in sales based on the company's long-term plans; reprocessing costs of products that are unfeasible for sale due to current specifications.
2. Provision associated with physical differences in inventory: a provision is made for differences that exceed the tolerance considered in the respective inventory process (production units in Chile and the port of Tocopilla carry out at least two inventories a year, the business subsidiaries depend on the last zero ground obtained, but in general it is at least once a year), these differences are recognized immediately.

Note 3 Significant accounting policies (continued)

3.15 Inventory measurement, continued

3. Potential errors in the determination of stock: The company has an algorithm that is reviewed at least once a year and corresponds to diverse percentages assigned to each inventory based on the product, location, complexity involved in the associated measurement, rotation and control mechanisms.
4. Provisions undertaken by business subsidiaries: these are historical percentages that are adjusted as zero ground is attained based on normal inventory management.

Inventories of raw materials, materials and supplies for production are recorded at acquisition cost. Cyclical inventories are performed in warehouses, as well as general inventories every three years. Differences are recognized the moment they are detected. The company has a provision that makes quarterly calculations from percentages associated with each type of material (classification by warehouse and rotation). These percentages use the lower value resulting from deterioration or obsolescence as well as potential losses. This provision is reviewed at least annually, and considers the historical profit and loss obtained in the inventory processes.

3.16 Transactions with non-controlling interests

Non-controlling interests are recorded in the consolidated statement of financial position within equity, but separate from equity attributable to the owners of the Parent.

3.17 Related party transactions

Transactions between the Company and its subsidiaries are part of the Company's normal operations within its scope of business activities. Conditions for such transactions are those normally effective for those types of operations with regard to terms and market prices. These transactions have been eliminated in consolidation. The expiration conditions vary according to the originating transaction.

3.18 Property, plant and equipment

The assets tangible property, plant and equipment assets are stated at acquisition cost, net of the related accumulated depreciation, amortization and impairment losses that they might have experienced.

In addition to the price paid for the acquisition of tangible property, plant and equipment, the Company has considered the following concepts as part of the acquisition cost, as applicable:

1. Accrued interest expenses during the construction period that are directly attributable to the acquisition, construction or production of qualifying assets, which are those that require a substantial period prior to being ready for use. The interest rate used is that related to the project's specific financing or, should this not exist, the average financing rate of the investor company.
2. The future costs that the Company will have to experience, related to the closure of its facilities at the end of their useful life, are included at the present value of disbursements expected to be required to settle the obligation.
Having initially recognized provisions for closure and refurbishment, the corresponding cost is capitalized as an asset in Property, plant and equipment and amortized in line with the amortization criteria for the associated assets.

Construction-in-progress is transferred to property, plant and equipment in operation once the assets are available for use and the related depreciation and amortization begins on that date.

Note 3 Significant accounting policies (continued)

3.18 Property, plant and equipment, continued

Extension, modernization or improvement costs that represent an increase in productivity, ability or efficiency or an extension of the useful lives of property, plant and equipment are capitalized as a higher cost of the related assets. All the remaining maintenance, preservation and repair expenses are charged to expense as they are incurred.

The replacement of full assets, which increase the asset's useful life or its economic capacity, are recorded as a higher value of property, plant and equipment with the related derecognition of replaced or renewed elements.

Gains or losses which are generated from the sale or disposal of property, plant and equipment are recognized as income (or loss) in the period, and calculated as the difference between the asset's sales value and its net carrying value.

Costs derived from the daily maintenance of property, plant and equipment are recognized when incurred.

Right-of-use assets (IFRS 16) are recognized in the property, plant and equipment line item and are classified within this based on the underlying asset class.

3.19 Depreciation of property, plant and equipment

Property, plant and equipment are depreciated through the straight-line distribution of cost over the estimated technical useful life of the asset, which is the period in which the Company expects to use the asset. When components of one item of property, plant and equipment have different useful lives, they are recorded as separate assets. Useful lives are reviewed on an annual basis.

Fixed assets associated with the Salar de Atacama consider useful life to be the lesser value between the technical useful life and the years remaining until 2030.

In the case of mobile equipment, depreciation is performed depending on the hours of operation.

The useful lives used for the depreciation and amortization of assets included in property, plant and equipment in years are presented below:

Classes of property, plant and equipment	Minimum life or rate (years)	Maximum life or rate (years)	life or average rate in years
Mining assets	3	8	7
Energy generating assets	3	16	7
Buildings	2	40	11
Supplies and accessories	2	16	6
Office equipment	2	20	6
Transport equipment	2	20	9
Network and communication equipment	3	15	5
IT equipment	2	16	4
Machinery, plant and equipment	1	28	9
Other property, plant and equipment	1	26	6

Note 3 Significant accounting policies (continued)

3.20 Goodwill

Goodwill acquired represents the excess in acquisition cost on the fair value of the Company's ownership of the net identifiable assets of the subsidiary on the acquisition date. Goodwill acquired related to the acquisition of subsidiaries is included in goodwill, which is subject to impairment tests annually or more frequently if events or changes in circumstances indicate that it might be impaired, and is stated at cost less accumulated impairment losses. Gains and losses related to the sale of an entity include the carrying value of goodwill related to the entity sold.

This intangible asset is assigned to cash-generating units with the purpose of testing impairment losses, It is allocated based on cash-generating units expected to obtain benefits from the business combination from which the aforementioned goodwill acquired arose.

3.21 Intangible assets other than goodwill

Intangible assets other than goodwill mainly relate to water rights, emission rights, commercial brands, costs for rights of way for electricity lines, license costs and the development of computer software and mining property and concession rights, client portfolio and commercial agent.

(a) Water rights

Water rights acquired by the Company relate to water from natural sources and are recorded at acquisition cost. Given that these assets represent legal rights granted in perpetuity to the Company, they are not amortized, but are subject to annual impairment tests.

(b) Rights of way for electric lines

As required for the operation of industrial plants, the Company has paid rights of way in order to install wires for the different electric lines on third party land. These rights are presented under intangible asset. Amounts paid are capitalized at the date of the agreement and charged to the statement of income, according to the life of the right of way.

(c) Computer software

Licenses for IT programs acquired are capitalized based on their acquisition and customization costs. These costs are amortized over their estimated useful lives.

Expenses related to the development or maintenance of IT programs are recognized as an expense as and when incurred. Costs directly related to the production of unique and identifiable IT programs controlled by the Group, and which will probably generate economic benefits that are higher than its costs during more than a year, are recognized as intangible assets. Direct costs include the expenses of employees who develop information technology software and general expenses in accordance with corporate charges received.

The costs of development for IT programs recognized as assets are amortized over their estimated useful lives.

(d) Mining property and concession rights

The Company holds mining property and concession rights from the Chilean and Australian Governments. Property rights are usually obtained at no initial cost (other than the payment of mining patents and minor recording expenses) and once the rights on these concessions have been obtained, they are retained by the Company while annual patents are paid. Such patents, which are paid annually, are recorded as prepaid assets and amortized over the following twelve months. Amounts attributable to mining concessions acquired from third parties that are not from the Chilean Government are recorded at acquisition cost within intangible assets.

(e) Client portfolio

The period for exploiting these portfolios is unlimited so they are considered assets with an indefinite useful life and are therefore not subject to amortization. However, they are subjected to an annual impairment test and the corresponding amounts are recorded in the profit or loss.

Note 3 Significant accounting policies (continued)

3.21 Intangible assets other than goodwill continued

(f) Commercial agent

The rights obtained through the acquisition of the commercial agent of Sociedad Agrocom Ltda, corresponded to the fair value of that company's line of business. The period for exploiting these rights is unlimited so they are considered assets with an indefinite useful life and are therefore not subject to amortization. However the indefinite useful life is subject to review for every reporting period, to see whether indefinite useful life continues to apply.

3.22 Research and development expenses

Research and development expenses are charged to profit or loss in the period in which the expenditure was incurred.

3.23 Exploration and evaluation expenses

The Company holds mining concessions for exploration and exploitation of ore, the Company gives the following treatment to expenses associated with exploration and assessment of these resources:

- Caliche

Once the rights have been obtained, the Company records the disbursements directly associated with the exploration and assessment of the deposit as an at cost asset. These disbursements include the following items:

- Geological surveys, drilling, borehole extraction and sampling, activities related to the technical assessment and commercial viability of the extraction, and in general, any disbursement directly related to specific projects where the objective is to find ore resources.

If the technical studies determine that the ore grade is not economically viable, the asset is directly charged to profit and loss. If determined otherwise, the asset described above is associated with the extractable ore tonnage which is amortized as it is used. These assets are presented in the "other non-current assets category", reclassifying the portion related to the area to be extracted that year as stock.

- Expenses related to metal exploration are charged to profit or loss in the period in which they are registered.
- Salar de Atacama exploration expenses are presented in non-current assets in the property, plant and equipment category and correspond mainly to wells that can also be used in the extraction of the deposit and/or monitoring, these are amortized over 10 years.
- Mount Holland exploration expenses are presented as of December 31, 2018 in non-current assets under "Other Non-Financial Non-Current Assets". As of January 1, 2019 they have been incorporated into Property, Plant and Equipment, specifically in Constructions in progress and primarily consider exploration boreholes and complementary studies for the lithium ore study of the area. These expenses will begin to be amortized in the development stage.

Note 3 Significant accounting policies (continued)

3.24 Impairment of non-financial assets

Assets subject to depreciation and amortization are also subject to impairment testing, provided that an event or change in the circumstances indicates that the amounts in the accounting records may not be recoverable. An impairment loss is recognized for the excess of the book value of the asset over its recoverable amount.

The recoverable amount of an asset is the higher between the fair value of an asset or cash generating unit (“CGU”) less costs of sales and its value in use, and is determined for an individual asset unless the asset does not generate any cash inflows that are clearly independent from other assets or groups of assets.

When the carrying value of an asset exceeds its recoverable amount, the asset is considered an impaired asset and is reduced to its net recoverable amount.

In evaluating value in use, estimated future cash flows are discounted using a pre-tax discount rate that reflects current market assessment, the value of money over time and the specific asset risks.

To determine the fair value less costs to sell, an appropriate valuation model is used.

Impairment losses from continuing operations are recognized with a debit to profit or loss in the categories of expenses associated with the impaired asset function, except for properties reevaluated previously where the revaluation was taken to equity.

For assets other than acquired goodwill, an annual evaluation is carried out to determine whether any previously recognized impairment losses have already decreased or ceased to exist. If this should be the case, the recoverable amount is estimated. A previously recognized impairment loss is only reversed if there have been changes in the estimates used to determine the asset’s recoverable amount since the last time an impairment loss was recognized. If this is the case, the carrying value of the asset is increased to its recoverable amount. This increased amount cannot exceed the carrying value that would have been determined, net of depreciation, if an asset impairment loss had not been recognized in prior years. This reversal is recognized with a credit to profit or loss.

3.25 Minimum dividend

As required by Chilean law and regulations, our dividend policy is decided upon from time to time by our Board of Directors and is announced at the Annual Ordinary Shareholders’ Meeting, which is generally held in April of each year. Shareholder approval of the dividend policy is not required. However, each year the Board must submit the declaration of the final dividend or dividends in respect of the preceding year, consistent with the then-established dividend policy, to the Annual Ordinary Shareholders’ Meeting for approval. As required by the Chilean Companies Act, unless otherwise decided by unanimous vote of the holders of issued shares, we must distribute a cash dividend in an amount equal to at least 30% of our consolidated net income for that year (determined in accordance with CMF regulations), unless and to the extent the Company has a deficit in retained earnings.

3.26 Earnings per share

The basic earnings per share amounts are calculated by dividing the profit for the year attributable to the ordinary owners of the parent by the weighted average number of ordinary shares outstanding during the year.

The Company has not conducted any type of operation of potential dilutive effect that would entail the disclosure of diluted earnings per share.

Note 3 Significant accounting policies (continued)

3.27 Trade and other payables

Trade and other payables are measured at fair value plus all costs associated with the transaction. Subsequently, these are carried out at amortized cost using the effective interest rate method.

3.28 Interest-bearing borrowings

At initial recognition, interest-bearing borrowings are measured at fair value net of transaction costs incurred. Subsequently, they are measured at amortized cost using the effective interest rate method. Amortized cost is calculated considering any premium or discount from the acquisition and includes costs of transactions which are an integral part of the effective interest rate.

These are recorded as non-current when their expiration period exceeds twelve months and as current when the term is lower than such term. Interest expense is calculated in the year in which it is accrued following a financial criterion.

3.29 Other provisions

Provisions are recognized when:

- The Company has a present obligation or constructive obligation as the result of a past event.
- It is more likely than not that certain resources must be used, including benefits, to settle the obligation.
- A reliable estimate can be made of the amount of the obligation.

In the event that the provision or a portion of it is reimbursed, the reimbursement is recognized as a separate asset solely if there is certainty of income.

In the consolidated statement of income, the expense for any provision is presented net of any reimbursement.

Should the effect of the value of money over time be significant, provisions are discounted using a discount rate before tax that reflects the liability's specific risks. When a discount rate is used, the increase in the provision over time is recognized as a finance cost.

The Company's policy is to maintain provisions to cover risks and expenses based on a better estimate to deal with possible or certain and quantifiable responsibilities from current litigation, compensations or obligations, pending expenses for which the amount has not yet been determined, collaterals and other similar guarantees for which the Company is responsible. These are recorded at the time the responsibility or the obligation that determines the compensation or payment is generated.

Note 3 Significant accounting policies (continued)

3.30 Obligations related to employee termination benefits and pension commitments

Obligations towards the Company's employees comply with the provisions of the collective bargaining agreements in force, which are formalized through collective employment agreements and individual employment contracts, except for the United States, which is regulated in accordance with employment plans in force up to 2002. (See more details in Note 18.4).

These obligations are valued using actuarial calculations, according to the projected unit credit method which considers such assumptions as the mortality rate, employee turnover, interest rates, retirement dates, effects related to increases in employees' salaries, as well as the effects on variations in services derived from variations in the inflation rate. The criteria in force contained in the revised IAS 19 are also taken into account.

Actuarial gains and losses that may be generated by variations in defined, pre-established obligations are directly recorded in other comprehensive income.

Actuarial losses and gains have their origin in departures between the estimate and the actual behavior of actuarial assumptions or in the reformulation of established actuarial assumptions.

The discount rate used by the Company for calculating the obligation was 4,642% and 4,642% for the periods ended June 30, 2019 and December 31, 2018, respectively.

The Company's subsidiary SQM North America has established pension plans for its retired employees that are calculated by measuring the projected obligation using a net salary progressive rate net of adjustments for inflation, mortality and turnover assumptions, deducting the resulting amounts at present value using a 4% interest rate for 2019 and 3.75% for 2018. The net balance of this obligation is presented under the non-current provisions for employee benefits (refer to Note 18.4).

3.31 Compensation plans

Compensation plans implemented through benefits provided in share-based payments settled in cash are recognized in the financial statements at their fair value, in accordance with International Financial Reporting Standards No. 2 "Share-based Payments". Changes in the fair value of options granted are recognized with a charge to payroll on a straight-line basis during the period between the date on which these options are granted and the payment date (see Note 18.6).

3.32 Revenue recognition

Revenue includes the fair value of considerations received or receivable for the sale of goods and services during the performance of the Company's activities. Revenue is presented net of value added tax, estimated returns, rebates and discounts and after the elimination of sales among subsidiaries.

Revenues are recognized when the specific conditions for each income stream are met, as follows, as follows:

Note 3 Significant accounting policies (continued)

3.32 Revenue recognition, continued

(a) Sale of goods

The sale of goods is recognized when the Company has delivered products to the customer, and there is no obligation pending compliance that could affect the acceptance of products by the customer. The delivery does not occur until products have been shipped to the customer or confirmed as received by the customer, and the related risks of obsolescence and loss have been transferred to the customer and the customer has accepted the products in accordance with the conditions established in the sale, when the acceptance period has ended, or when there is objective evidence that those criteria required for acceptance have been met.

Sales are recognized in consideration of the price set in the sales agreement, net of volume discounts and estimated returns at the date of the sale. Volume discounts are evaluated in consideration of annual foreseen purchases and in accordance with the criteria defined in agreements.

(b) Sale of services

Revenue associated with the rendering of services is recognized considering the degree of completion of the service as of the date of presentation of the consolidated classified statement of financial position, provided that the result from the transaction can be estimated reliably.

(c) Income from dividends

Income from dividends is recognized when the right to receive the payment is established.

Note 3 Significant accounting policies (continued)

3.33 Finance income and finance costs

Finance income is mainly composed of interest income in financial instruments such as term deposits and mutual fund deposits. Interest income is recognized in profit or loss at amortized cost, using the effective interest rate method.

Finance costs are mainly composed of interest on bank borrowing expenses, interest on bonds issued and interest capitalized for borrowing costs for the acquisition, construction or production of qualifying assets. Borrowing costs and bonds issued are recognized in profit or loss using the effective interest rate method.

For finance costs accrued during the construction period that are directly attributable to the acquisition, construction or production of qualifying assets, the effective interest rate related to the project's specific financing is used. If none exists, the average financing rate of the subsidiary making the investment is utilized.

Borrowing and financing costs that are directly attributable to the acquisition, construction or production of an asset are capitalized as part of that asset's cost.

3.34 Income tax and deferred taxes

Corporate income tax for the year is determined as the sum of current taxes from the different consolidated companies.

Current taxes are based on the application of the various types of taxes attributable to taxable income for the year.

Differences between the book value of assets and liabilities and their tax basis generate the balance of deferred tax assets or liabilities, which are calculated using the tax rates expected to be applicable when the assets and liabilities are realized.

In conformity with current Chilean tax regulations, the provision for corporate income tax and taxes on mining activity is recognized on an accrual basis, presenting the net balances of accumulated monthly tax provisional payments for the fiscal period and associated credits. The balances of these accounts are presented in current income taxes recoverable or current taxes payable, as applicable.

Tax on companies and variations in deferred tax assets or liabilities that are not the result of business combinations are recorded in the statement of income accounts or equity accounts in the consolidated statement of financial position, considering the origin of the gains or losses which have generated them.

At each reporting period, the carrying amount of deferred tax assets has been reviewed and reduced to the extent where there will not be sufficient taxable income to allow the recovery of all or a portion of the deferred tax assets. Likewise, as of the date of the consolidated financial statements, deferred tax assets that are not recognized were evaluated and not recognized as it was more likely than not that future taxable income will allow for recovery of the deferred tax asset.

With respect to deductible temporary differences associated with investments in subsidiaries, associated companies and interest in joint ventures, deferred tax assets are recognized solely provided that it is more. The deferred income tax related to entries directly recognized in equity is recognized with an effect on equity and not with an effect on profit or loss.

Deferred tax assets and liabilities are offset if there is a legally receivable right of offsetting tax assets against tax liabilities and the deferred tax is related to the same tax entity and authority.

Note 3 Significant accounting policies (continued)

3.35 Segment reporting

IFRS 8 requires that companies adopt a management approach to disclose information on the operations generated by its operating segments. In general, this is the information that management uses internally for the evaluation of segment performance and making the decision on how to allocate resources for this purpose.

An operating segment is a group of assets and operations responsible for providing products or services subject to risks and performance that are different from those of other business segments. A geographical segment is responsible for providing products or services in a given economic environment subject to risks and performance that are different from those of other segments operating in other economic environments.

For assets and liabilities, the allocation to each segment is not possible given that these are associated with more than one segment, except for depreciation, amortization and impairment of assets, which are directly allocated to the applicable segments, in accordance with the criteria established in the costing process for product inventories.

The following operating segments have been identified by the Company:

- Specialty plant nutrients
- Industrial chemicals
- Iodine and derivatives
- Lithium and derivatives
- Potassium
- Other products and services

Note 3 Significant accounting policies (continued)

3.36 Responsibility for Information and Estimates Made

The Management of Sociedad Química y Minera de Chile S.A. and its subsidiaries is responsible for the information contained in these consolidated financial statements, which expressly indicate that all the principles and criteria included in IFRS, as issued by the International Accounting Standards Board (IASB), have been applied in full.

In preparing the consolidated financial statements of Sociedad Química y Minera de Chile S.A. and its subsidiaries, Management has made judgments and estimates to quantify certain assets, liabilities, revenues, expenses and commitments included therein. Basically, these estimates refer to:

- Estimated useful lives are determined based on current facts and past experience, and take into consideration the anticipated physical life of the asset, the potential for technological obsolescence, and regulations. (See Notes 3.22, 15 and 16).
- Impairment losses of certain assets - Assets, including property, plant and equipment, exploration assets, goodwill and intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that their carrying amounts exceed their recoverable amounts. If an impairment assessment is required, the assessment of fair value often requires estimates and assumptions such as discount rates, exchange rates, commodity prices, future capital requirements and future operating performance. Changes in such estimates could impact the recoverable values of these assets. Estimates are reviewed regularly by management (See Notes 15 and 16).
- Assumptions used in calculating the actuarial amount of pension-related and severance indemnity payment benefit commitments (See Note 18).
- Contingencies – The amount recognized as a provision, including legal, contractual, constructive and other exposures or obligations, is the best estimate of the consideration required to settle the related liability, including any related interest charges, taking into account the risks and uncertainties surrounding the obligation. In addition, contingencies will only be resolved when one or more future events occur or fail to occur. Therefore, the assessment of contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events. The Company assesses its liabilities and contingencies based upon the best information available, relevant tax laws and other appropriate requirements (See Notes 19 and 22).
- Provisions on the basis of technical studies that cover the different variables affecting products in stock (density and moisture, among others), and related allowance.
- Obsolescence to ensure that the carrying value of inventory is not in excess of the net realizable Inventory valuation requires judgment to determine obsolescence and estimates of provisions for value. See Note 12.

Despite the fact that these estimates have been made on the basis of the best information available on the date of preparation of these consolidated financial statements, certain events may occur in the future and oblige their amendment (upwards or downwards) over the next few years, which would be made prospectively, recognizing the effects of the change in estimates in the related future consolidated financial statements.

Note 3 Significant accounting policies (continued)

3.37 Environment

In general, the Company follows the criteria of considering amounts used in environmental protection and improvement as environmental expenses. However, the cost of facilities, machinery and equipment used for the same purpose are considered property, plant and equipment, as the case may be.

Note 4 Changes in accounting estimates and policies (consistent presentation)

4.1 Changes in accounting estimates

In the preparation of the consolidated financial statements of the Company and subsidiaries, the management has made estimates regarding the useful lives of Properties, Plants and Equipment, assumptions used for the actuarial calculation of employee benefits, contingencies and provisions (see Note 3).

There have been no changes in the methodology used to determine these estimates in the periods presented.

4.2 Changes in accounting policies

The accounting principles and criteria were applied consistently, except for the following:

The Company's consolidated financial statements as of June 30, 2019, show changes in the accounting policies over the previous period due to the application of IFRS 16 as of January 1, 2019.

During 2018, management initially measured the impact of adopting IFRS 16 from the date the standard became effective, which it determined by evaluating its lease contracts. These assets should be recorded on the initial application date as right-of-use assets, depending on their nature and lease terms, and they will be amortized over the shorter of their contractual period or useful life

Contracts were evaluated for evidence of a lease under IFRS 16, and right-of-use assets were identified that included: trucks, cranes, excavators, property (buildings, warehouses, storerooms, land), where SQM has the power to control them during the contract, without the supplier changing its operating instructions.

The Company constructed a debt curve based on the Company's public debt instruments at the valuation date to determine the discount rate for the estimated initial measurement. The rates used to discount the right-of-use asset and the leasing liability were estimated according to the contract currencies (USD, UF and CLP) and terms.

The Company chose to fully apply a modified approach of the retrospective application version B, where the right-of-use is equal to the liability and there is no equity adjustment

The values of right-of-use assets and leasing liabilities for contracts classified under IFRS 16 total ThUS\$ 31,619 as of January 1, 2019.

Note 5 Financial risk management

5.1 Financial risk management policy

The Company's financial risk management policy is focused on safeguarding the stability and sustainability of the Company and its subsidiaries with regard to all such relevant financial uncertainty components.

The Company's operations are subject to certain financial risk factors that may affect its financial position or results. The most significant risk exposures are market risk, liquidity risk, currency risk, doubtful accounts risk, and interest rate risk, among others.

There could also be additional risks, which are either unknown or known but not currently deemed to be significant, which could also affect the Company's business operations, its business, financial position, or profit or loss.

The financial risk management structure includes identifying, determining, analyzing, quantifying, measuring and controlling these events. Management and, in particular, Finance Management, is responsible for constantly assessing the financial risk.

Note 5 Financial risk management, continued

5.2 Risk Factors

5.2.1 Credit risk

A global economic downturn - and its potentially negative effects on the financial situation of our customers - could extend the payment terms of the Company's receivables by increasing its exposure to credit risk. Although measures are taken to minimize the risk, this global economic situation could mean losses with adverse material effects on the business, financial position or profit and loss of the Company's operations.

To mitigate these risks, the Company maintains active control of collection and uses measures such as the use of credit insurance, letters of credit and prepayments for a portion of receivables.

The concentration of credit risk with respect to sales debtors is reduced, due to the large number of companies that comprise the Company's customer base and their distribution throughout the world.

Financial investments correspond to time deposits whose maturity date is greater than 90 days and less than 360 days from the date of investment, so they are not exposed to excessive market risks.

The credit quality of financial assets that are not past due or impaired can be evaluated by reference to external credit ratings (if available) or historical information on counterparty late payment rates:

5.2.2 Currency risk

The functional currency of the Company is the US Dollar, due to its influence on the determination of price levels, its relation to the cost of sales and considering that a significant part of the Company's business is conducted in this currency. However, the global nature of the Company's business generates an exposure to exchange rate variations of several currencies with the US Dollar. Therefore, the Company maintains hedge contracts to mitigate the exposure generated by its main mismatches (net between assets and liabilities) in currencies other than the US dollar against the exchange rate variation, updating these contracts periodically depending on the amount of mismatching to be covered in these currencies. Occasionally, subject to the approval of the Board, the Company ensures short-term cash flows from certain specific line items in currencies other than the US Dollar.

A significant portion of the Company's costs, especially salary payments, is associated with the Peso. Therefore, an increase or decrease in its exchange rate with the US Dollar would affect the Company's profit and loss. By the second quarter, approximately US\$202 million accumulated in expenses are associated with the Peso.

As of June 30, 2019, the Company held derivative instruments classified as hedges of foreign exchange risks associated with 74% of all of the bond liabilities denominated in UF, for a fair value of US\$11.2 million in favor of the Company. As of December 31, 2018, this value amounted to US\$3.9 million against the company.

As of June 30, 2019, the exchange rate value for equivalent Pesos to US Dollars was Ch\$679.15 per US Dollar, as of December 31, 2018, it was Ch\$694.77 per Dollar.

Note 5 Financial risk management, continued

5.2.3 Interest rate risk

Interest rate fluctuations, primarily due to the uncertain future behavior of markets, may have a material impact on the financial results of the Company. Significant increases in the rate could make it difficult to access financing at attractive rates for the Company's investment projects.

The Company maintains current and non-current financial debt valued at the LIBOR rate plus spread.

As of June 30, 2019, the Company has around 4% of its financial liabilities linked to variations in the LIBOR rate. Therefore, significant rate increases could impact its financial position. A change of 100 basis points in this rate could result in changes to financial expenses of close to US\$0.06 million. Nevertheless, significant rate increases could make it difficult to access financing at attractive rates for the Company's investment projects.

5.2.4 Liquidity risk

Liquidity risk relates to the funds needed to comply with payment obligations. The Company's objective is to maintain financial flexibility through a comfortable balance between fund requirements and cash flows from regular business operations, bank borrowings, bonds, short term investments, and marketable securities, among others.

The Company has an important capital expense program which is subject to change over time.

On the other hand, world financial markets go through periods of contraction and expansion that are unforeseeable in the long-term and may affect SQM's access to financial resources. Such factors may have a material adverse impact on the Company's business, financial position and results of operations.

SQM constantly monitors the matching of its obligations with its investments, taking due care of maturities of both, from a conservative perspective, as part of this financial risk management strategy. As of June 30, 2019, the Company had unused, available revolving credit facilities with banks, for a total of approximately US\$480 million.

The position in other cash and cash equivalents are invested in highly liquid mutual funds with an AAA risk rating.

6.2 Parent entity

Pursuant to Article 99 of Law No, 18,045 of the Securities Market, the CMF may determine that a company does not have a controller in accordance with the distribution and dispersion of its ownership. On November 30, 2018, the CMF issued the ordinary letter No, 32,131 whereby it determined that the Pampa Group, do not exert decisive power over the management of the Company since it does not have a predominance in the ownership that allows it to make management decisions. Therefore, the CMF has determined not to consider Grupo Pampa the controller of the Company and that the Company does not have a controller given its current ownership structure.

Note 7 Board of Directors, Senior Management And Key management personnel

7.1 Board of Directors and Senior Management

1) Board of directors

SQM S.A. is managed by a Board of Directors which is composed of 8 regular directors, 2 of whom are independent directors, who are elected for a three-year period. The Board of Directors was elected during the ordinary shareholders' meeting held on April 25, 2019, which included the election of 2 independent directors.

As of June 30, 2019, the Company included the following committees and committee members:

- Directors' Committee: This committee is comprised of Georges de Bourguignon, Laurence Golborne Riveros y Alberto Salas Muñoz, and fulfills the functions established in Article 50 bis of Chilean Law on publicly-held corporations. This committee takes on the role of the audit committee in keeping with the US-based Sarbanes Oxley law.
- The Company's Health, Safety and Environment Committee: This committee is comprised of Gonzalo Guerrero Yamamoto, Patricio Contesse Fica y Robert J. Zatta.
- Corporate Governance Committee: This committee is comprised of Hernán Büchi Buc, Patricio Contesse Fican y Francisco Ugarte Larrain.

During the periods covered by these financial statements, there are no pending balances receivable and payable between the Company, its directors or members of Senior Management, other than those related to remuneration, fee allowances and profit-sharing. In addition, there were no transactions conducted between the Company, its directors or members of Senior Management.

Note 7 Board of Directors, Senior Management And Key management personnel (continued)

7.1 Board of Directors and Senior Management, continued

2) Directors' Compensation

Directors' compensation differs according to the period during the corresponding year. Thus, from April 27, 2018 to April 24, 2019 (Period 2018-2019), Directors' compensation was determined by the annual general shareholders' meeting held on April 27, 2018. While for the period from April 25, 2019 to the date of the next annual general shareholders' meeting (Period 2019-2020), Directors' compensation was determined by the annual general shareholders' meeting held on April 25, 2019. For each of these periods, Directors' compensation is detailed as follows:

Period 2018-2019

- a) The payment of a fixed, gross and monthly amount of UF 800 in favor of the Chairman of the Board of Directors, of UF 700 in favor of the vice-president of the board of directors and of UF 600 in favor of the remaining six directors and regardless of the number of Board of Directors' Meetings held or not held during the related month.
- b) A variable gross amount payable in national currency to the Chairman and Vice President of the Company equivalent to 0.12% of the net liquid income earned by the Company in 2018;
- c) A variable gross amount payable in local currency to each Company director, excluding the Chairman and Vice President of the Company, equivalent to 0.06% of the net liquid income earned by the Company in 2019

Period 2019-2020:

- d) The payment of a fixed, gross and monthly amount of UF 400 in favor of the Chairman of the Board and of UF 350 in favor of the remaining seven directors and regardless of the number of Board of Directors' Meetings held or not held during the related month.
- e) A variable gross amount payable in national currency to the Chairman and Vice President of the Company equivalent to 0.12% of the net liquid income earned by the Company in 2018;
- f) A variable gross amount payable in local currency to each Company director, excluding the Chairman and Vice President of the Company, equivalent to 0.06% of the net liquid income earned by the Company in 2019.

These fixed and variable amounts for both periods shall not be challenged and those expressed in percentage terms shall be paid immediately after the respective annual general shareholders meeting approves the financial statements, the annual report, the account inspectors report and the external auditors report for the respective year. All amounts expressed in UF shall be paid in Chilean pesos at its value on the last day of the respective calendar month, as determined by the Superintendency of Banks and Financial Institutions, the Chilean Central Bank or any other relevant institution that replaces them.

Accordingly, the compensation and profit sharing paid to members of the Directors' Committee and the directors as of June 30, 2019 amounted to ThUS\$3,404 and as of December 31, 2018 to ThUS\$3,791.

Note 7 Board of Directors, Senior Management And Key management personnel (continued)

7.1 Board of Directors and Senior Management, continued

3) Directors' Committee

Directors' Committee compensation differs according to the period during the corresponding year. Thus, for the Period 2018-2019, Directors' Committee compensation was determined by the annual general shareholders' meeting held on April 27, 2018. While for the Period 2019-2020, Directors' Committee compensation was determined by the annual general shareholders' meeting held on April 25, 2019. For each of these periods the compensation of the Directors Committee comprises:

Period 2018-2019

- a) The payment of a fixed, gross and monthly amount of UF 113 in favor of each of the 3 directors who were members of the Directors' Committee, regardless of the number of meetings of the Directors' Committee that have or have not been held during the month concerned.
- b) The payment in domestic currency and in favor of each of the 3 directors of a variable and gross amount equivalent to 0.02% of total net profit that the Company effectively obtains during the 2018 fiscal year.

Period 2019-2020

- a) The payment of a fixed, gross and monthly amount of UF 200 in favor of each of the 3 directors who were members of the Directors' Committee, regardless of the number of meetings of the Directors' Committee that have or have not been held during the month concerned.
- b) The payment in domestic currency and in favor of each of the 3 directors of a variable and gross amount equivalent to 0.02% of total net profit that the Company effectively obtains during the 2019 fiscal year.

These fixed and variable amounts for both periods shall not be challenged and those expressed in percentage terms shall be paid immediately after the respective annual general shareholders meeting approves the financial statements, the annual report, the account inspectors report and the external auditors report for the respective year. All amounts expressed in UF shall be paid in Chilean pesos at its value on the last day of the respective calendar month, as determined by the Superintendency of Banks and Financial Institutions, the Chilean Central Bank or any other relevant institution that replaces them.

4) Health, Safety and Environmental Matters Committee:

The remuneration of this committee for the 2018–2019 period was composed of the payment of a fixed, gross, monthly amount of UF 50 for each of the 3 directors on the committee regardless of the number of meetings it has held. For the 2019- 2020 period, the remuneration for the Health, Safety and Environment Committee corresponds to a fixed, gross, monthly amount of UF 100 for each of the three Directors on the committee regardless of the number of meetings it has held.

Note 7 Board of Directors, Senior Management And Key management personnel (continued)

7.1 Board of Directors and Senior Management, continued

5) Corporate Governance Committee

The remuneration for this committee for the 2018–2019 period was composed of the payment of a fixed, gross, monthly amount of UF 50 for each of the 3 directors on the committees regardless of the number of meetings it has held. For the 2019–2020 period, the remuneration for the Corporate Governance Committee corresponds to a fixed, gross, monthly amount of UF 100 for each of the three Directors on the committee regardless of the number of meetings it has held.

6) No guarantees have been constituted in favor of the directors.

7) Senior management compensation:

- a) As of June 30, 2019, the global compensation paid to the 124 main executives amounts to ThUS\$15,460, the global compensation paid to the 122 main executives as of December 31, 2018 amounted to ThUS\$27,907. This includes monthly fixed salary and variable performance bonuses.
- b) The Company has an annual bonus plan based on goal achievement and individual contribution to the Company's results. These incentives are structured as a minimum and maximum number of gross monthly salaries and are paid once a year.
- c) The Company also has retention bonuses for its executives, The value of these bonuses is linked to the Company's stock price and is payable in cash during the first quarter of 2021 (see Note 18.6)

8) No guarantees have been constituted in favor of the Company's management.

9) The Company's Managers and Directors do not receive or have not received any benefit during the period ended June 30, 2019 and the year ended December 31, 2018 or compensation for the concept of pensions, life insurance, paid time off, profit sharing, incentives, or benefits due to disability other than those mentioned in the preceding points.

7.2 Key management personnel compensation

As of June 30, 2019, there are 114 people occupying key management positions and 122 as of December 31, 2018.

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Key management personnel compensation (1)	17,815	27,907

(1) Corresponds to a number of executives (see Note 7.1 number 7 (a)).

Note 9 Investment in Associates (continued)

9.3 Other information

The Company has no participation in unrecognized losses in investments in associates.

The Company has no investments that are not accounted for according to the equity method.

The equity method was applied to the Statement of Financial Position as of June 30, 2019 and December 31, 2018.

The basis of preparation of the financial information of associates corresponds to the amounts included in the financial statements in conformity with the entity's IFRS.

9.4 Disclosures on interest in associates

a) Transactions conducted in 2019:

In the second quarter of 2019, Ajay North America paid total dividends of ThUS\$2,853.

In the first quarter of 2019, Ajay Europe SARL paid total dividends of ThUS\$2,136.

b) Transactions conducted in 2018:

During the first quarter, the Company increased its capital in Kore Potash Ltd, by ThUS\$ 3,000.

In March 2018 the company Abu Dhabi Fertilizer Industries WLL paid dividends of ThUS\$ 10,890, 50% of the distributed dividend was charged to retained earnings subsequent to 2014, in line with the Company's statutes that establish that 37% of the distributed dividend corresponds to SQM. The remaining 50% was charged to retained earnings generated between 2004 and 2014, in line with the Company's statutes that establish that 50% of the distributed dividend corresponds to SQM.

In March 2018 the company Ajay North America paid dividends of ThUS\$ 1,432.

In June 2018, the associate company Doktor Tarsa Tarim, made a capital increase of 86 million Turkish Lira (ThUS\$ 18,753), which was generated by the reclassification of retained earnings.

In June 2018 the company Abu Dhabi Fertilizer Industries WLL paid dividends of ThUS\$ 4,348, 50% of the distributed dividend was charged to retained earnings subsequent to 2014, in line with the Company's statutes that establish that 37% of the distributed dividend corresponds to SQM. The remaining 50% was charged to retained earnings generated between 2004 and 2014, in line with the Company's statutes that establish that 50% of the distributed dividend corresponds to SQM.

At the close of the second quarter of 2018 the company Ajay North America paid dividends of ThUS\$5,728.

In June 2018 the company Ajay North Europe SARL paid dividends of ThUS\$1,597.

In June 2018 the company Charlee SQM Thailand Co. Ltd. paid dividends of ThUS\$906.

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 9 Investment in Associates (continued)

9.4 Disclosures on interest in associates, continued

b) Transactions conducted in 2018, continued:

On November 14, 2018, Soquimich European Holdings B.V. sold its share in Charlee SQM Thailand Co. Ltd., generating a loss of ThUS\$759.

In 2018, the company Doktor Tarsa Tarim Sanayi Ve Ticaret A.S., changed its functional currency from Turkish Lira to the United States Dollar.

Note 10 Joint Ventures

10.1 Policy for the accounting of equity accounted investment in joint ventures

The method for recognizing joint ventures is that in which participation is initially recorded at cost, and subsequently adjusted, considering changes after the acquisition in the portion of the entity's net assets that correspond to the investor. Profit or loss for the period will include the portion of the entity's entire profit or loss that correspond to the investor. For these joint ventures there is no quoted market price to measure these investments. (See Note 3.22)

There are no significant restrictions on these joint ventures for the transfer of funds as payment of dividends or others.

At the date of issuance of these financial statements, SQM is not aware of the existence of any significant contingent liabilities associated with the partnerships in joint ventures.

10.2 Disclosures of interest in joint ventures

a) Operations conducted in 2019

On January 01, 2019, SQM Vitas Perú changed its functional currency from the Peruvian sol to USD (United States dollar).

On January 01, 2019, Covalent Lithium Pty Ltd. changed its functional currency from AUD (Australian dollar) to USD (United States dollar).

b) Operations conducted in 2018

During the first quarter of 2018, Minera Exar S.A. increased its capital by ThUS\$13,000. The entity is a joint venture and contributions were made on January 25, 2018 (ThUS\$6,000) and February 14, 2018 (ThUS\$7,000) by SQM Potasio S.A. and Lithium Americas Corporation (LAC). Both partners share 50% ownership of the respective company, each contributing the same share in these capital increases.

On March 14, 2018, the company SQM Vitas Plantacote B.V. was closed.

As of the date, Minera Exar S.A. has changed its functional currency from the Argentine peso to the United States dollar.

In April 2018, Minera Exar made a new capital increase of ThUS\$7,000, which was contributed in equal parts by its partners.

On May 15, 2018, the subsidiary Soquimich European Holdings BV, signed a joint venture agreement with PAVONI & C., SpA in Italy, EUR 5.5 million were paid for a 50% share, generating a lower value of EUR 2,602,180. The functional currency of the joint venture is the Euro.

progress

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 10 Joint Ventures (continued)

10.6 Joint Ventures

In 2017, we continued to expand our operations outside Chile and, together with our subsidiary SQM Australia Pty, we entered into an agreement to acquire 50% of the assets of the Mount Holland lithium project in Western Australia. We entered into a 50/50 unincorporated joint operation with Kidman Resources Limited (“Kidman”), the Mt Holland Lithium Project, to design, construct and operate a mine, concentrator and refinery to produce approximately 45,000 metric tons of lithium hydroxide per year. Kidman retained the exclusive right to exploit gold within the project area. SQM Australia Pty committed to pay a price of US\$70 million for the 50% of the Mt Holland assets, which was split into an initial payment of US\$15 million and a deferred payment of US\$ 55 million, both payments subject to certain conditions precedent. SQM Australia paid an additional (i) US\$10 million as part of the initial payment, and (ii) US\$30 million once the deferred payment took place.

All payments subject to conditions under the purchase agreement with Kidman were executed by December 2018.

This business meets the conditions stipulated in IFRS 11 to be considered a "joint operation", since management has agreed that the rights of the related assets and liabilities relate to a joint arrangement, which states that the joint operators share all interests in the related assets and liabilities in specific proportions

Note 11 Cash and cash equivalents

11.1 Types of cash and cash equivalents

a) Cash		
Cash on hand	73	75
Cash in banks	329,979	101,662
Other demand deposits	8,327	746
Total cash	<u>338,379</u>	<u>102,483</u>
b) Cash equivalents		
Short-term deposits, classified as cash equivalents	204,891	187,666
Short-term investments, classified as cash equivalents	256,520	265,917
Total cash equivalents	<u>461,411</u>	<u>453,583</u>
Total cash and cash equivalents	<u>799,790</u>	<u>556,066</u>

11.2 Short-term investments, classified as cash equivalents

As of June 30, 2019 and December 31, 2018, the short-term investments classified as cash and cash equivalents relate to mutual funds (investment liquidity funds) for investments in:

Institution	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Legg Mason - Western Asset Institutional Cash Reserves	133,740	132,108
JP Morgan US dollar Liquidity Fund Institutional	122,780	133,809
Total	<u>256,520</u>	<u>265,917</u>

Short-term investments are highly liquid fund manager accounts that are basically invested in short-term fixed rate notes in the U.S. market.

Note 11 Cash and cash equivalents (continued)

11.3 Information on cash and cash equivalents by currency

As of June 30, 2019 and December 31, 2018, information on cash and cash equivalents by currency is detailed as follows:

Original currency	06/30/2019 ThUS\$	12/31/2018 ThUS\$
Chilean Peso (*)	143,279	157,500
US Dollar	645,811	353,674
Euro	1,880	4,738
Mexican Peso	844	1,242
South African Rand	2,844	5,219
Japanese Yen	1,302	1,786
Peruvian Sol	2	1
Brazilian Real	-	-
Chinese Yuan	3,782	2,305
Dírhham United Arab Emirates	1	1
Indian rupee	3	-
Argentine Peso	2	2
Pound Sterling	20	-
Australian dollar	19	29,598
Esloti Polaco	1	-
Total	799,790	556,066

(*)The Company maintains financial derivative policies which allow to minimize the risk of the variation in Chilean pesos exchange rate.

11.4 Amount restricted (unavailable) cash balances

Cash on hand and in current bank accounts are available resources, and their carrying value is equal to their fair value.

As of June 30, 2019 and December 31, 2018, restricted cash balances are presented,(see Note 14).

Financial assets pledged as collateral

On November 4, 2004, Isapre Norte Grande has a guarantee equivalent to the total amount owed to its subsidiaries and medical suppliers, which is administered and maintained by Banco de Chile.

As of June 30, 2019 and December 31, 2018 pledged assets are as follows

	06/30/2019 ThUS\$	12/31/2018 ThUS\$
Restricted cash balances		
Isapre Norte Grande Ltda.	551	712
Total	551	712

11.6 Other information

Net Debt reconciliation

This section sets out an analysis of net debt and the movements in net debt for each of the periods presented.

Net debt	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Cash and cash equivalents	799,790	556,066
Other current financial assets	417,815	312,721
Other non-current financial hedge assets	21,800	13,425
Other current financial liabilities	(508,834)	(23,585)
Other non-current financial hedge liabilities	(1,335,937)	(1,330,382)
Net debt	(605,366)	(471,755)

Cash and cash equivalents	Dec. 31, 2018	Adjusted to initial balance on 01/01/2019 by IFRS 16	Monetary			Non-monetary			June 30, 2019
			Amounts from loans	Amounts from interest	Other cash income/expenses	Hedging and non-hedging instruments	Exchange rate differences	Others	
Obligations with the public and bank loans	(1,333,794)	-	(449,947)	28,225	6,796	-	(16,209)	(32,138)	(1,797,067)
Current and non-current lease liabilities	-	(31,619)	2,758	665	-	-	-	(665)	(28,861)
Financial instruments derived from hedging	(17,318)	-	-	2,672	-	(6,230)	-	4,068	(16,808)
Financial instruments derived from non-hedging	(2,855)	-	-	-	(192)	1,012	-	-	(2,035)
Current and non-current financial instruments	(1,353,967)	(31,619)	(447,189)	31,562	6,604	(5,218)	(16,209)	(28,735)	(1,844,771)
Cash and cash equivalents	556,066	-	-	-	238,986	-	4,738	-	799,790
Deposits that do not qualify as cash and cash equivalents	291,790	-	-	(13,343)	112,294	-	12,274	12,188	415,203
Derivatives from current and non-current hedge assets	31,663	-	-	-	-	(993)	-	-	1,700
Derivatives from other financial non-hedge assets	2,693	-	-	91	(13,549)	4,637	-	(130)	22,712
Net Debt	(471,755)	(31,619)	(447,189)	18,310	344,335	(1,574)	803	(16,677)	(605,366)

Note 12 Inventories

The composition of inventory at each period-end is as follows:

Type of inventory	06/30/2019 ThUS\$	12/31/2018 ThUS\$
Raw material reserves	7,880	6,764
Supplies for production reserves	27,736	26,840
Products-in-progress reserves	430,838	423,621
Finished product reserves	486,367	456,449
Total	952,821	913,674

On June 30, 2019, the Company held caliche stockpiles, solutions in solar ponds and intermediary salts, with a value of ThUS\$ 359,608 and on December 31, 2018, this value was ThUS\$ 347,100 (including products in progress).

The value of stock recognized on June 30, 2019, was ThUS\$ 98,232, and on December 31, 2018 this value was ThUS\$ 105,282. For finished and in-process products, the provisions constituted include the provision associated with the lower value of stock (considers lower realizable value, uncertain future use, reprocessing costs, etc.), inventory differences and potential errors in the determination of inventories (e.g., errors in topography, grade, humidity, etc.), (see Note 3.15).

For inventories of raw materials, supplies, materials and parts, lower value provisions have been associated with the proportion of obsolete, defective or slow-moving materials and potential differences.

The breakdown of inventory reserves is detailed as follows:

Type of inventory	06/30/2019 ThUS\$	12/31/2018 ThUS\$
Raw material reserves	2,749	1,838
Products-in-progress reserves	79,440	82,673
Finished product reserves	16,043	20,771
Total	98,232	105,282

The Company has not delivered inventory as collateral for the periods indicated above.

Solutions
for human
progress

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 12 Inventories (continued)

As of June 30, 2019 and December 31, 2018, movements in provisions are detailed as follows:

Conciliation	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Beginning balance	105,282	96,284
Increase in Lower Value (1)	(226)	7,845
Additional Provision Differences of Inventory. (2)	-	3,176
Increase / Decrease eventual differences and others (3)	(1,993)	2,436
Provision Used	(4,831)	(4,459)
Total changes	(7,050)	8,998
Final balance	98,232	105,282

- (1) There are three types of Lower Value Provisions: (a) Economic Realizable Lower Value, (b) Potential Inventory with Uncertain Future Use and (c) Reprocessing Costs of Off-Specification Products.
- (2) Provisions for Inventory Differences generated when physical differences are detected when taking inventory, which exceed the tolerance levels for this process. At least two annual inventories are taken in the production sites and in the port in Chile ("zero sum" systems have immediate potential adjustments).
- (3) This algorithm corresponds to diverse provision percentages based on the complexity in the measurement and rotation of stock, as well as standard differences based on previous profit and loss, as is the case with provisions in Commercial Offices.

Note 13 Related party disclosures

13.1 Related party disclosures

Balances pending at period-end are not guaranteed, accrue no interest and are settled in cash, No guarantees have been delivered or received for trade and other receivables due from related parties or trade and other payables due to related parties.

13.2 Relationships between the parent and the entity

Pursuant to Article 99 of Law No. 18,045 of the Securities Market Law, the Commission for the CMF may determine that a company does not have a controller in accordance with the distribution and dispersion of its ownership, On November 30, 2018, the CMF issued the ordinary letter No. 32,131 whereby it determined that Pampa Group, do not exert decisive power over the management of the Company since it does not have a predominance in the ownership that allows it to make management decisions. Therefore, the CMF has determined not to consider Grupo Pampa the controller of the Company and that the Company does not have a controller given its current ownership structure.

Note 14 Financial instruments (continued)

14.3 Hedging assets and liabilities, continued

The balances in the “effect on profit or loss” column consider the interim effects of the contracts in force January 1 to June 30, 2019 and from January 1 to December 31, 2018.

Derivative contract maturities are detailed as follows:

Series	Contract amount ThUS\$	Currency	Maturity date
H	155,214	UF	01/04/2023
O	58,748	UF	02/01/2022
P	134,228	UF	01/15/2028

The Company uses cross currency swap derivative instruments to hedge the possible financial risk associated with the volatility of the exchange rate associated with Chilean pesos and UF. The objective is to hedge the exchange rate financial risks associated with bonds payable. Hedges are documented and tested to measure their effectiveness.

Based on a comparison of critical terms, hedging is highly effective, given that the hedged amount is consistent with obligations maintained for bonds denominated in Chilean pesos and UF. Likewise, hedging contracts are denominated in the same currencies and have the same expiration dates of bond principal and interest payments.

Effectiveness

Effectiveness tests have verified that hedges are effective as of the reporting date. This note describes the fair values of derivative instruments classified as hedges.

Note 14 Financial instruments (continued)

14.4 Financial liabilities

Other current and non-current financial liabilities

As of June 30, 2019 and December 31, 2018, the detail is as follows:

e) Additional information

Bonds

On June 30, 2019 and December 31, 2018, short term bonds of ThUS\$ 491,216 and ThUS\$ 15,145 respectively were classified as short-term, consisting of the current portion due plus accrued interest to date; debt is presented net of bond issuance costs. The non-current portion consisted of ThUS\$ 1,263,603 on March 31, 2019 and ThUS\$ 1,249,479 on December 31, 2018, corresponding to the issuance series H bonds second issue single series bonds (ThUS\$250), series M bonds, series O bonds, third issue single series bonds (ThUS\$300) and fourth issue single series bonds (ThUS\$250), series P bonds and series Q bonds, net of bond issuance costs.

As of June 30, 2019 and, 2018, the details of each issuance are as follows:

Serie “H” bonds

On January 13, 2009, the Company placed two bond series in the domestic market. The first was Series H for UF 4,000,000 (ThUS\$ 139,216) at an annual interest rate of 4.9%, with a term of 21 years and payment of the principal beginning in 2019.

As of June 30, 2019, and December 31, 2018, the Company has made the following payments with a charge to the Series H bonds:

Payments made	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Payments of interest, Series H bonds	3,877	8,325
CCS Coverage	1,073	495

On June 30, 2019 the total non-current obligation was reclassified as a current liability. See Note 20.1.

Single series bonds, second issue ThUS\$ 250,000

On April 21, 2010, the Company informed the CMF of its placement in international markets of an unsecured bond of ThUS\$ 250,000 with a maturity of 10 years beginning on the aforementioned date with an annual interest rate of 5.5% and destined to refinance long-term liabilities.

As of June 30, 2019, and December 31, 2018, the detail of payments charged to the line of single series bonds, second issue is as follows:

Payments made	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Interest payment	6,875	13,750

Note 14 Financial instruments (continued)

14.4 Financial liabilities, continued

Series “O” bonds

On April 4, 2012, the Company issued “Series O” for UF 1,500,000 (ThUS\$69,901) was placed at a term of 21 years with a single payment at the maturity of the term and an annual interest rate of 3.80%.

As of June 30, 2019, and December 31, 2018, the Company has made the following payments with a charge to Series O bonds and their associated CCS (Cross Currency Swap) hedging:

Payments made	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Payment of interest, Series O bonds	1,182	2,457
CCS Coverage	160	205

On June 30, 2019, the total non-current obligation was reclassified as short-term. See Note 14.4 d).

Single series bonds, third issue ThUS\$300,000

On April 3, 2013, the Company issued a non-guaranteed bond in the United States with a value of US\$ 300 million. The bond is for a 10-year term with an annual coupon rate of 3.625% . The funds raised will be used to refinance long term liabilities and finance general corporate objectives.

As of June 30, 2019, and December 31, 2018, the following payments have been made with a debit to the line of single-series bonds, third issue:

Payments made	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Payment of interest	5,437	10,875

Note 14 Financial instruments (continued)

14.4 Financial liabilities, continued

Single series bonds, fourth issuance ThUS\$250,000

On October 23, 2014, the Company informed the CMF that Sociedad Química y Minera de Chile S.A. had agreed to issue and place unsecured bonds of ThUS\$ 250,000 in international markets. These mature in 2025 and have annual interest rate of 4.375%, which were offered to investors at a price of 99.410% with respect to capital. The aforementioned agreement was agreed on October 23, 2014 and the issuance and placement of such bonds was performed in conformity with the provisions of Rule 144A of the US Securities Act of 1933 and these bonds will not be publicly offered in Chile.

As of June 30, 2019, and December 31, 2018, the following payments have been made.

Payments made	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Payment of interest	5,469	10,938

Series “P” bonds

On April 5, 2018, the Company informed the Financial Markets Commission that it had authorized the placement on the stock market of the Series “P” bond with a value of UF 3 million, with a charge to the 10 year Bonds Line registered in the FMC Securities Registry dated December 31, 2008 under number 563.

The Bonds (i) mature on January 15, 2028; (ii) will accrue on the unpaid principal, expressed in UF, at an annual interest rate of 3.25% from January 15, 2018; and (iii) can be called early by the Company as of the date of placement, that is, as of April 5, 2018.

As of June 30, 2019 and December 31, 2018, the following payments and their associated CCS (Cross Currency Swap) hedge have been made:

Payments made	06/30/2019	12/31/2018
	MUS\$	MUS\$
Payment of interest	1,975	1,085
Cobertura CCS	1,531	1,421

Note 14 Financial instruments (continued)

14.4 Financial liabilities, continued

Series Q Bonds

On October 31, 2018, the issuance of Series Q bonds (the "Bonds" serie Q) was authorized in the general stock market for the sum of UF 3,000,000, which were registered in the Securities Registry of your Commission on February 14, 2012 under number 700.

The Bonds (i) mature on the first day of June 2038; (ii) will earn an interest rate of 3.45% per annum on the outstanding capital, expressed in Unidades de Fomento, as of June 1, 2018; and (iii) may be redeemed early by the Company as of the placement date, that is, as of November 8, 2018.

On November 8, 2018, all the Series Q Bonds have been placed and sold to Euroamerica S.A. for a total amount of \$83,567,623,842, which was paid in full and in cash by Euroamerica S.A, to the Company.

The funds obtained from the aforementioned placement will be used approximately 90% to finance the expansion program of lithium, potassium nitrate and iodine plants in Chile; the remainder will be used for the investment plan of the Company and its subsidiaries, and to finance working capital.

Payments made	06/30/2019	12/31/2018
	MUS\$	MUS\$
Payment of interest	2,007	319

Single series fifth issue bonds MUS\$ 450

On May 7, 2019 the CMF was informed that the Company issued and placed unsecured bonds for ThUS\$ 450,000 on international markets. Essentially, these bonds will mature in 2029, carry an interest rate of 4.25% per annum, and were offered to investors at a price of 99.984% with respect to the capital. This agreement was signed on May 7, 2019 and the bonds were issued and placed in accordance with the provisions of Rule 144A of the US Securities Act of 1933 and they will not be traded in Chile.

On June 30,2019 no payments have been made.

Note 14 Financial instruments (continued)

14.8 Fair value measurement of assets and liabilities

Financial assets and liabilities measured at fair value consist of Options and Forwards hedging the mismatch in the balance sheet and cash flows, CCS to hedge bonds issued in local currency (Peso/UF).

The value of the Company's assets and liabilities recognized by CCS contracts is calculated as the difference between the present value of discounted cash flows of the asset (Ch/UF) and liability (US\$) parts of the derivative. In the case of the IRS, the asset value recognized is calculated as the difference between the discounted cash flows of the asset (variable rate) and liability (fixed rate) parts of the derivative. Forwards are calculated as the difference between the strike price of the contract and the spot price plus the forwards points at the date of the contract, Options: the value recognized is calculated using the Black-Scholes method.

In the case of CCS, the entry data used for the valuation models are UF, peso, USD and basis swap rates, In the case of fair value calculations for IRS, the Forward Rate Agreement rate and ICVS 23 Curve (Bloomberg: cash/deposits rates, futures, swaps). In the case of forwards, the forwards curve for the currency in question is used, Finally, with options, the spot price, risk-free rate and volatility of exchange rate are used, all in accordance with the currencies used in each valuation. The financial information used as entry data for the Company's valuation models is obtained from Bloomberg, the well-known financial software company. Conversely, the fair value provided by the counterparties of derivatives contracts is used only as a control and not for valuation.

The effects on profit or loss of movements in these amounts may be recognized in the caption Finance costs, foreign currency translation gain (loss) or cash flow hedges in the statement of comprehensive income, depending on each particular case.

The fair value measurement of debt is only performed to determine the present market value of secured and unsecured long-term obligations; bonds denominated in local currency (Ch\$/UF) and foreign currency (US\$), credits denominated in foreign currency (US\$), which is classified under Level 2 in the fair value hierarchy established by IFRS.

The value of the Company's reported liabilities is calculated as the present value of discounted cash flows at market rates at the time of valuation, taking into account the maturity date and exchange rate. The entry data used for the model includes the UF and peso rates, which are obtained using Bloomberg, the well-known financial software company and Association of Banks and Financial Institutions.

Note 14 Financial instruments (continued)

14.8 Fair value measurement of assets and liabilities, continued

Fair value hierarchy

The fair value hierarchy is detailed as follows:

- a) Level 1:** using quoted prices (unadjusted) only in active markets.
- b) Level 2:** when in any phase in the valuation process inputs other than quoted prices have been used in Level 1 that are observable directly in markets.
- c) Level 3:** inputs for the asset or liability that are not based on observable market data.

The valuation technique used for determining fair value of our hedging instruments is that indicated in Level 2.

14.9 Estimated fair value of financial instruments and financial derivatives

As required by IFRS 7, the following information is presented for the disclosure of the estimated fair value of financial assets and liabilities.

Although inputs represent Management's best estimate, they are subjective and involve significant estimates related to the current economic and market conditions, as well as risk features.

Methodologies and assumptions used depend on the risk terms and characteristics of instruments and include the following as a summary:

- Cash equivalent approximates fair value due to the short-term maturities of these instruments.
- The fair value of trade receivables, current is considered to be equal to the carrying amount due to the maturity of such accounts at short-term.
- The fair value of other current financial liabilities is considered to be equal to their carrying values.
- For interest-bearing liabilities with original maturity of more than a year, fair values are calculated by discounting contractual cash flows at their original current market rates with similar terms.
- The fair value of debt is considered in Level 2.
- For forward and swap contracts, fair value is determined using quoted market prices of financial instruments with similar characteristics.

Note 14 Financial instruments (continued)

14.9 Estimated fair value of financial instruments and financial derivatives, continued

The detail of the Company's instruments at carrying value and estimated fair value is as follows:

	06/30/2019		12/31/2018

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 15 Intangible assets and goodwill

15.1 Balances

	06/30/2019 ThUS\$	12/31/2018 ThUS\$
Intangible assets other than goodwill	190,128	189,350
Goodwill (1)	34,856	34,866
Total	224,984	224,216

The current value of future cash flows generated by these assets has been estimated given the variation in sales volumes, market prices and costs, discounted at a weighted average cost of capital (WACC) rate of 9.8% on December 31, 2018.

15.2 Disclosures on intangible assets and goodwill

Intangible assets relate to goodwill, water rights, trademarks, industrial patents, rights of way, software, and mining claims which correspond to exploitation rights acquired from third-parties.

Balances and movements in the main classes of intangible assets as of June 30, 2019 and December 31, 2018 are detailed as follows:

Intangible assets and goodwill	Useful life	Gross Value ThUS\$	Accumulated amortization ThUS\$	June 30, 2019 Accumulated impairment ThUS\$	Net Value ThUS\$
IT programs	Finite	32,431	(26,890)	-	5,541
Intellectual property rights, patents and other industrial property rights, service.	Finite	1,254	(1,113)	(7)	134
Mining claims, water rights and rights of way.	Indefinite	183,398	-	(1,729)	181,669
Mining claims	Finite	1,500	(148)	-	1,352

a) Estimated useful lives or amortization rates used for finite identifiable intangible assets

Finite useful life measures the length of, or number of production or similar units constituting that useful life.

The estimated useful life for software is 2 and 6 years, for other assets with a finite useful life, the useful life over which they are amortized corresponds to the periods defined by the contracts or rights from which they originate.

Intellectual property rights, patents and other industrial property rights, service and exploitation rights, mainly relate to water rights and have a finite useful life to the extent to which they are subject to a fixed-term contract or otherwise they are considered to be indefinite.

The company owns mining claims granted by Corfo, which correspond to assets subject to restitution. For this reason they are considered assets with a finite useful life and their useful life is assigned until the year 2030 when the contract ends.

b) Method used to assess identifiable intangible assets with indefinite useful life

The recoverable value of the cash-generating unit has been determined based on a calculation of value-in-use using cash flow projections for a period of 5 years, plus perpetuity annually on December 31.

This group of intangible assets includes water rights acquired in Chile, and mining concessions held by the company in Chile and Australia, and these rights are recorded at acquisition cost.

Note 15 Intangible assets and goodwill (continued)

15.2 Disclosures on intangible assets and goodwill, continued

c) Minimum and maximum amortization lives or rates of intangible assets:

Estimated useful life or amortization rate	Minimum Life or Rate	Maximum Life or Rate
Mining property, water rights and rights of way	Indefinite	Indefinite
Intangible assets other than goodwill	Indefinite	Indefinite
Mining claims	1 year	11 years
Intellectual property rights, patents and other industrial property rights, service	1 year	16 years
Commercial trademarks	1 year	5 years
IT programs	2 years	6 years

The following table shows the movements in goodwill as of June 30, 2019:

Company	Goodwill 01/01/2019 ThUS\$	Additional recognition ThUS\$	Accumulated impairment losses ThUS\$	Goodwill June 30, 2019 ThUS\$
SQM Industrial S.A.	3,214	-	(3,214)	-

(*) The net balance of other increases (decreases) corresponds to all those items that are reclassified to or from property, plant and equipment, They can have the following origin: 1) work in progress which is expensed to profit or loss, forming part of operating costs or other expenses per function, as appropriate; 2) the variation representing the purchase and use of materials and spare parts; 3) projects corresponding mainly to exploration expenditures and ground studies that are reclassified to the item other non-current financial assets; 4) software that is reclassified to "Intangibles".

(1) Any property, plant and equipment (disposal group) that, at the closing date of the financial statements, is subject to a commitment for sale or where the sales process has been initiated and where the sale is expected to occur within twelve months of that date, is classified by the Company as non-current assets held for sale.

These assets or disposal groups are valued at the lower of carrying amount or the estimated sales value less the costs to sell and stop being amortized from the moment they are classified as non-current assets held for sale.

The Company's lease activities included the following aspects:

- The nature of the Company's lease activities are related to contracts focused primarily on business operations, notably rights-of-use to equipment and real estate.
- The Company does not estimate any significant future cash outflows that would potentially expose the Company, and these are likewise not reflected in the measurement of lease liabilities, related to concepts such as (i) variable lease payments, (ii) expansion options and termination options, (iii) guaranteed residual value and (iv) leases not yet undertaken but committed by the Company.
- These are not subject to restrictions or agreements imposed by contracts.
- There were no sales transactions with leases later in the period.

(*) The net balance of other increases (decreases) corresponds to all those items that are reclassified to or from property, plant and equipment, They can have the following origin: 1) work in progress which is expensed to profit or loss, forming part of operating costs or other expenses per function, as appropriate; 2) the variation representing the purchase and use of materials and spare parts; 3) projects corresponding mainly to exploration expenditures and ground studies that are reclassified to the item other non-current financial assets; 4) assets for retirement obligations and 5) software that is reclassified to Intangibles.

(1) Any property, plant and equipment (disposal group) that, at the closing date of the financial statements, is subject to a commitment for sale or where the sales process has been initiated and where the sale is expected to occur within twelve months of that date, is classified by the Company as non-current assets held for sale.

These assets or disposal groups are valued at the lower of carrying amount or the estimated sales value less the costs to sell and stop being amortized from the moment they are classified as non-current assets held for sale.

Note 16 Property, plant and equipment (continued)

16.3 Detail of property, plant and equipment pledged as guarantee

There are no restrictions in title or guarantees for compliance with obligations that affect property, plant and equipment.

16.4 Impairment of assets

As indicated in Note 3.28 to the financial statements, the recoverable amount of property, plant and equipment is measured provided that there is an indication that the asset could be impaired. As of June 30, 2019, was not impairment recorded.

16.5 Additional Information

Capitalized interest

As of June 30, 2019, capitalized interest totaled ThUS\$ 2,973 , while for the period January to December 2018, this item totaled ThUS\$ 5,021.

No borrowing costs are capitalized for periods beyond the normal period for acquiring, constructing or installing an asset such as delays, interruptions or temporary suspension of projects due to technical, financial or other problems that render the asset unusable.

Note 17 Other current and non-current non-financial assets

As of June 30, 2019, and December 31, 2018, the detail of other current and non-current assets is as follows:

Other non-financial assets, current	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Domestic Value Added Tax	13,840	20,209
Foreign Value Added Tax	4,672	7,211
Prepaid mining licenses	4,971	1,329
Prepaid insurance	1,794	1,763
Other prepayments	2,052	1,774
Refund of Value Added Tax to exporters	-	12,545
Other taxes	2,739	2,800
Other assets	629	341
Total	30,697	47,972

Other non-financial assets, non-current	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Stain development expenses and prospecting expenses (1)	13,913	26,189
Guarantee deposits	551	712
Other assets	877	638
Total	15,341	27,539

1) Reconciliation of changes in assets for exploration and mineral resource evaluation, by type.

Movements in assets for the exploration and evaluation of mineral resources as of June 30, 2019, and December 31, 2018:

Reconciliation	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Opening balance	26,189	17,721
Change in assets for exploration and evaluation of mineral resources		
Additions	-	11,298
Reclassifications	(11,222)	1,987
Increase (decrease) due to transfers and other charges	(1,054)	(4,817)
Total changes	(12,276)	8,468
Total	13,913	26,189

As of the presentation date, no reevaluations of assets for exploration and assessment of mineral resources have been conducted.

Note 18 Employee benefits

18.1 Provisions for employee benefits

Classes of benefits and expenses by employee	06/30/2019 ThUS\$	12/31/2018 ThUS\$
Current		
Profit sharing and bonuses	7,775	20,085
Total	<u>7,775</u>	<u>20,085</u>
Non-current		
Profit sharing and bonuses	9,075	8,831
Severance indemnity payments	27,550	28,233
Total	<u>36,625</u>	<u>37,064</u>

18.2 Policies on defined benefit plan

This policy is applied to all benefits received for services provided by the Company's employees.

Short-term benefits for active employees are represented by salaries, social welfare benefits, paid time off, sickness and other types of leave, profit sharing and incentives and non-monetary benefits; e.g., healthcare service, housing, subsidized or free goods or services. These will be paid in a term which does not exceed twelve months.

The Company only provides compensation and benefits to active employees, with the exemption of SQM North America, which applies the definitions under 18.4 below.

SQM maintains incentive programs for its employees based on their personal performance, the Company's performance and other short-term and long-term indicators.

For each incentive bonus delivered to the Company's employees, there will be a disbursement in the first quarter of the following year and this will be calculated based on profit for the period at the end of each period applying a factor obtained subsequent to each employee's appraisal process.

Employee benefits include retention bonuses for the Company's executives, which are linked to the Company's share price and are paid in cash. The short-term portion is presented as a provision for current employee benefits and the long-term portion as non-current.

Staff severance indemnities are agreed and payable based on the final salary, calculated in accordance with each year of service to the Company, with certain maximum limits in respect of either the number of years or in monetary terms. In general, this benefit is payable when the employee or worker ceases to provide his/her services to the Company and there are a number of different circumstances through which a person can be eligible for it, as indicated in the respective agreements; e.g., retirement, dismissal, voluntary retirement, incapacity or disability, death, etc.

Law No. 19.728 published on May 14, 2001 which became effective on October 1, 2002 required Compulsory Unemployment Insurance in favor of all dependent employees regulated by the Chilean Labor Code, Article 5 of this law established that this insurance is paid through monthly contribution payments by both the employee and the employer.

Note 18 Employee benefits (continued)

18.3 Other long-term benefits

The other long-term benefits relate to staff severance indemnities and are recorded at their actuarial value, and an executive compensation plan (see Note 18.6).

Staff severance indemnities at actuarial value	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Staff severance indemnities, Chile	26,879	27,562
Executive severance plan	9,075	8,831
Severance for foreigners	671	671
Total other non-current liabilities	36,625	37,064

The actuarial assessment method has been used to calculate the Company's obligations with respect to staff severance indemnities, which relate to defined benefit plans consisting of days of remuneration per year served at the time of retirement under conditions agreed in the respective agreements established between the Company and its employees.

Under this benefit plan, the Company retains the obligation to pay staff severance indemnities related to retirement, without establishing a separate fund with specific assets, which is referred to as not funded, The discount interest rate of expected flows to be used was 3.719%.

Benefit payment conditions

The staff severance indemnity benefit relates to remuneration days for years worked for the Company without a limit being imposed in regard of amount of salary or years of service, It applies when employees cease to work for the Company because they are made redundant or in the event of their death. This benefit is applicable up to a maximum age of 65 for men and 60 for women, which are the usual retirement ages according to the Chilean pensions system as established in Decree Law 3.500 of 1980.

Methodology

The Company's benefits obligation under IAS 19 Projected Benefit Obligation (PBO) is determined as follows:

To determine the Company's total liability, we used computer software to develop a mathematical simulation model using the data for each individual employee.

Note 18 Employee benefits (continued)

18.3 Other long-term benefits, continued

This model considered months as discrete time, i.e., the Company determined the age of each person and his/her salary on a monthly basis according to the growth rate. This information on each person was simulated from the beginning of his/her employment contract or when he/she started earning benefits up to the month in which he/she reaches normal retirement age, generating in each period the possible retirement according to the Company's turnover rate and the mortality rate according to the age reached. When he/she reaches the retirement age, the employee finishes his/her service for the Company and receives a retirement indemnity.

The methodology followed to determine the accrual for all the employees covered by agreements took account of the turnover rates and the mortality rate RV-2009 established by the CMF to calculate pension-related life insurance reserves in Chile according to the Accumulated Benefit Valuation or Accrued Cost of Benefit Method. This methodology is established in IAS 19 on "Retirement Benefit Costs".

18.4 Post-employment benefit obligations

Our subsidiary SQM NA, together with its employees established a pension plan until 2002 called the "SQM North America Retirement Income Plan". This obligation is calculated measuring the expected future forecast staff severance indemnity obligation using a net salary gradual rate of restatements for inflation, mortality and turnover assumptions, discounting the resulting amounts at present value using the interest rate defined by the authorities.

Since 2003, SQM North America offers to its employees benefits related to pension plans based on the 401-K system, which do not generate obligations for the Company.

Note 18 Employee benefits (continued)

18.5 Staff severance indemnities

As of June 30, 2019 and December 31, 2018, severance indemnities calculated at the actuarial value are as follows:

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Opening balance	(28,233)	(27,445)
Current cost of service	(770)	(1,529)
Interest cost	(916)	(1,658)
Actuarial gain/loss	(2,860)	(1,617)
Exchange rate difference	(173)	2,710
Benefits paid during the year	5,402	1,306
Balance	(27,550)	(28,233)

a) *Actuarial assumptions*

The liability recorded for staff severance indemnity is valued at the actuarial value method, using the following actuarial assumptions:

	06/30/2019	12/31/2018	
Mortality rate	RV - 2014	RV - 2014	
Actual annual interest rate	3.719%	4.642%	
Voluntary retirement rate:			
Men	6.49%	6.49%	annual
Women	6.49%	6.49%	annual
Salary increase	3.00%	3.00%	annual
Retirement age:			
Men	65	65	years
Women	60	60	years

b) *Sensitivity analysis of assumptions*

As of June 30, 2019 and December 31, 2018, the Company has conducted a sensitivity analysis of the main assumptions of the actuarial calculation, determining the following:

Sensitivity analysis 06/30/2019	Effect + 100 basis points	Effect - 100 basis points
	ThUS\$	ThUS\$
Discount rate	(1,848)	2,080
Employee turnover rate	(243)	273
Sensitivity analysis 12/31/2018	Effect + 100 basis points	Effect - 100 basis points
	ThUS\$	ThUS\$
Discount rate	(1,807)	2,033
Employee turnover rate	(237)	265

Sensitivity relates to an increase/decrease of 100 basis points.

Note 18 Employee benefits (continued)

18.6 Executive compensation plan

The Company currently has a compensation plan with the purpose of motivating the Company's executives and encouraging them to remain with the Company, by granting payments based on the change in the price of SQM's shares. There is a partial payment of the share benefit program in the event of termination of the contract for causes other than the resignation and application of Article 160 of the Labor Code.

Average Share Price Spread

Plan characteristics

This compensation plan is related to the Company's performance through the SQM Series B share price (Santiago Stock Exchange).

Plan participants

A total of 32 Company executives are entitled to this plan, provided that they continue to work for the Company through to the end of 2020. The payment dates, if applicable, will be during the first quarter of 2021.

Compensation

The compensation payable to each executive is calculated by multiplying :

- a) The average price of Series B shares on the Santiago Stock Exchange during the fourth quarter of 2020, at its equivalent amount in dollars (with a maximum amount or limit amount of US\$54 per share), multiplied
- b) By a number equal to the quantity of shares that have been individually assigned to each executive included in the plan.

This compensation plan was approved by the Company's Board of Directors and its application started on January 1, 2017.

The effect of the plan considers 454,504 shares reflected as a cost of ThUS\$243 in the results for the period ending June 30, 2019. As of June 30, 2018, the effect of the plan was 510,404 shares, equal to ThUS\$1,943, recognized as a provision reflected against profit or loss for 2018.

Note 19 Provisions and other non-financial liabilities

Note 20 Disclosures on equity

The detail and movements in the funds of equity accounts are shown in the consolidated statement of changes in equity.

20.1 Capital management

The main object of capital management relative to the administration of the Company's financial debt and equity is to ensure the regular conduct of operations and business continuity in the long term, with the constant intention of maintaining an adequate level of liquidity and in compliance with the financial safeguards established in the debt contracts in force. Within this framework, decisions are made in order to maximize the value of the company.

Capital management must comply with, among others, the limits contemplated in the Financing Policy approved by the Shareholders' Meeting, which establish a maximum consolidated indebtedness level of 1,5 times the debt to equity ratio. This limit can be exceeded only if the Company's management has first obtained express approval at an Extraordinary Shareholders' Meeting.

In addition, capital management must comply with the external capital requirements (or covenants) imposed in its financial obligations, which regulate the indebtedness level to 1,2 times, its strictest level. . Obligations established in the Series H and Series O Bonds, which grant these bondholders the voluntary and individual option to redeem these bonds early at par value. The borrowing ratio is defined in the bond line contracts and legal prospectuses against which the Series H and Series O Bonds were issued, and this ratio will reach 1.21 as a consequence of IFRS 16 becoming effective and being implemented in these financial statements. Therefore the early redemption option for these bondholders will become available. Exercising this option will be subject to the bondholders communicating their choice to the Bondholders' Representative within the periods and in the manner prescribed in the respective issue documents.

In conjunction with the level of indebtedness, it is also important for the Company to maintain a comfortable profile of maturities for its financial obligations, in order to oversee the relation between its short-term financial obligations and the long-term maturities, and the relation they have with the Company's asset distribution. Consequently, the Company has maintained a liquidity level of 3 times during the last periods.

Note 20 Disclosures on equity (continued)

20.1 Capital management, continued

The Company's management controls capital management based on the following ratios:

CAPITAL MANAGEMENT	06/30/2019	12/31/2018	Description (1)	Calculation (1)
Net Financial Debt ThUS\$	605,365	471,755	Financial Debt – Financial Resources	Other current Financial Liabilities + Other Non-Current Financial Liabilities – Cash and Cash Equivalents – Other Current Financial Assets – Hedging Assets, non-current
Liquidity	2,80	4,32	Current Assets divided by Current Liabilities	Total Current Assets / Total Current Liabilities

Indebtedness without IFRS 16	1,19	1,00	Total Liabilities less IFRS 16 liabilities on Equity	Total Liabilities - IFRS 16 liabilities / Total Equity

(1) Assumes the absolute value of the accounting records

The Company's capital requirements change according to variables such as working capital needs, new investment financing and dividends, among others. The Company manages its capital structure and makes adjustments on the basis of the predominant economic conditions so as to mitigate the risks associated with adverse market conditions and take advantage of the opportunities there may be to improve the liquidity position.

There have been no changes in the capital management objectives or policy within the years reported in this document, No breaches of external requirements of capital imposed have been recorded.

20.2 Disclosures on preferred share capital

Issued share capital is divided into 142,819,552 Series "A" shares and 120,376,972 Series "B" shares. All such shares are nominative, have no par value and are fully issued, subscribed and paid.

Series B shares may not exceed 50% of the total issued, subscribed and paid-in shares of the Company and have a limited voting right, in that all of them can only elect one director of the Company, regardless of their equity interest and preferences:

- (a) require the calling of an Ordinary or Extraordinary Shareholders' Meeting when so requested by Series B shareholders representing at least 5% of the issued shares thereof; and
- (b) require the calling of an extraordinary meeting of the board of directors, without the president being able to qualify the need for such a request, when so requested by the director who has been elected by the shareholders of said Series B.

The limitation and preferences of Series B shares have a duration of 50 consecutive and continuous years as of June 3, 1993.

The Series A shares have the preference of being able to exclude the director elected by the Series B shareholders in the voting process in which the president of the board of directors and of the Company must be elected and which follows the one in which the tie that allows such exclusion resulted.

The preference of the Series A shares will have a term of 50 consecutive and continuous years as of June 3, 1993. The form of the titles of the shares, their issuance, exchange, disablement, loss, replacement, assignment and other circumstances thereof shall be governed by the provisions of Law No, 18,046 and its regulations.

At June 30, 2019 and December 31, 2018, the Group does not hold shares of the Parent Company either directly or through its investees.

As of June 30, 2019 and December 31, 2018, the Company has not placed any new issuances of shares on the market.

Note 20 Disclosures on equity (continued)

20.3 Disclosures on reserves in equity

As of June 30, 2019 and December 31, 2018, this caption comprises the following:

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Reserve for currency exchange conversion	(24,595)	(26,307)
Reserve for cash flow hedges	11,909	7,971
Reserve for gains and losses from financial assets measured at fair value through other comprehensive income	(970)	(1,111)
Reserve for actuarial gains or losses in defined benefit plans	(8,968)	(6,884)
Other reserves	14,277	11,332
Total other reserves	(8,347)	(14,999)

Reserves for foreign currency translation differences

This balance reflects retained earnings for changes in the exchange rate when converting the financial statements of subsidiaries whose functional currency is that of each company's origin country and the presentation currency is the US dollar.

Reserve for cash flow hedges

The Company maintains, as hedge instruments, financial derivatives related to obligations with the public issued in UF and Chilean pesos. Changes from the fair value of derivatives designated and classified as hedges are recognized under this classification.

Reserve for gains and losses from financial assets measured at fair value through other comprehensive income

This caption includes investments in shares where the Company has no significant influence and these have accordingly been measured at fair value through equity. In the event that such equity instruments are fully or partially disposed of, the proportional accumulated effect of accumulated fair value will be transferred to profit or loss.

Reserve for actuarial gains or losses in defined benefit plans

For domestic subsidiaries the effects of changes in assumptions are considered, mainly changes in the discount rate.

The subsidiary SQM North America has established pension plans for its retired employees that are calculated by measuring the projected obligation of staff severance indemnities using a net salary progressive rate net of adjustments to inflation, mortality and turnover assumptions, deducting the resulting amounts at present value using a 4% interest rate for 2019.

20.4 Dividend policies

As required by Article 79 of the Chilean Companies Act, unless otherwise decided by unanimous vote of the holders of issued and subscribed shares, we must distribute a cash dividend in an amount equal to at least 30% of our consolidated profit for the year ended as of December 31, unless and except to the extent it has a deficit in retained earnings (losses not absorbed in prior years).

Dividend policy for commercial year 2019.

The Company has defined the following dividend policy:

- a) Distribute and pay, as a final dividend (*final dividend*) and in favor of the respective shareholders, a percentage of the net income that shall be determined per the following financial parameters:
 - (I) 100% of the profit for 2019 if all the following financial parameters are met: (a) “all current assets” divided by “all current liabilities” is equal to or greater than 2.5 times, and (b) the sum of “all current liabilities” and “all non-current liabilities”, less “cash equivalents”, less “other current financial assets”, all of the above divided by “total equity” in equal or less than 0.8 times.
 - (II) 80% of the profit for 2019 if all the following financial parameters are met: (a) “all current assets” divided by “all current liabilities” is equal to or greater than 2.0 times, and (b) the sum of “all current liabilities” and “all non-current liabilities”, less “cash equivalents”, less “other current financial assets”, all of the above divided by “total equity” in equal or less than 0.9 times.
 - (III) 60% of the profit for 2019 if all the following financial parameters are met: (a) “all current assets” divided by “all current liabilities” is equal to or greater than 1.5 times, and (b) the sum of “all current liabilities” and “all non-current liabilities”, less “cash equivalents”, less “other current financial assets”, all of the above divided by “total equity” in equal or less than 1.0 times.

If none of the foregoing financial parameters are met, the Company shall distribute and pay, as a final dividend, and in favor of the respective shareholders, 50% of the 2019 net income.

- b) Distribute and pay, if possible and during 2019, three interim dividends (*interim dividends*) that will be charged against the aforementioned final dividend. These interim dividends shall likely be paid during the month following the approval of the March, June, and September 2019 interim financial statements, respectively. Its amounts shall be calculated as follows:
 - (i) For the interim dividends that will be charged to the accumulated net income reflected in the March 2019 interim financial statements, the percentage distributed shall be determined per the financial parameters expressed in letter a) above.
 - (ii) For the interim dividends that will be charged to the accumulated net income reflected in the June 2019 interim financial statements, the percentage distributed shall be determined per the financial parameters expressed in letter a) above, discounting the total amount of interim dividends previously distributed during 2019.

Note 20 - Disclosures on equity (continued)

20.4 Dividend policies, continued

- (iii) For the interim dividends that will be charged to the accumulated net income reflected in the September 2019 interim financial statements, the percentage distributed shall be determined per the financial parameters expressed in letter a) above, discounting the total amount of interim dividends previously distributed during 2019.

- c) The amount of the interim dividends mentioned above may vary, pursuant to the information available to the Board of Directors on the date on which it agrees to the distribution of said dividends given that the dividend will not materially or negatively affect SQM's capacity to impact its investments, fulfill its liabilities, or in general, comply with the investment and finance policy approved at the ordinary shareholders' meeting.

- d) At the ordinary shareholders meeting that will be held in 2020, the Board of Directors shall propose a final dividend pursuant to the financial parameters expressed in letter a) above, discounting the total amount of the interim dividends previously distributed during 2019.

- e) If there is an excess of net income in 2019, this may be retained and assigned or allocated for financing its own operations, to one or more investment projects of the Company, notwithstanding a future distribution of special dividends (*special dividends*) charged to the accumulated net income previously approved at the shareholders' meeting, or the possible and future capitalization of all or part of the latter.

- f) The payment of additional dividends (*additional dividends*) is not considered.

The dividend policy described above corresponds to the intention of the Board of Directors, and the compliance of it shall depend on the net income that the Company ultimately obtains, as well as the results of periodic projections that could impact the Company, or to the existence of determined conditions that may affect it, as applicable. If the dividend policy exposed by the Board of Directors suffers a substantial change, the Company must communicate it as an essential fact.

Note 20 Disclosures on equity (continued)

20.5 Interim and provisional dividends

The ordinary shareholders' meeting held on April 25, 2019, agreed to distribute and pay 100% of the distributable net profit obtained by the Company during the 2018 fiscal year, as dividend. Consequently, in May 2019, the Company paid a definitive dividend of 1.67111 US dollars per share as distributable net profit obtained during the 2018 fiscal year. An amount of 1.25837 US dollars per share was subtracted from this amount, as it had already been paid as interim dividend in 2018.

On May 22, 2019, the Board agreed to pay an interim dividend equivalent to US\$ 0.30598 per share, charged to the Company's net income for 2019. This amount was paid in Chilean pesos at the official exchange rate to the Dollar published in the Official Gazette on May 29, 2019

Note 20 Disclosures on equity (continued)

20.5 Interim and provisional dividends, continued

Dividends discounted from equity from January to June 2019 and January to December 2018 were the following:

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Non-controlling interest	4,557	9,733
Ajay SQM Chile S.A. Dividends	441	823
Soquimich Comercial S.A. Potential Dividend	3,936	7,872
Soquimich Comercial S.A. Payable Dividend	180	1,038
Owners of the Parent	150,724	539,830
Interim dividend	80,532	331,199
Potential dividend	-	100,000
Dividends payable	70,192	108,631
Dividends discounted from equity for the period	155,281	549,563

Note 21 Earnings per share

Basic earnings per share are calculated by dividing net income attributable to the Company's shareholders by the weighted average of the number of shares in circulation during that period.

As expressed, earnings per share are detailed as follows:

Basic earnings per share	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Earnings (losses) attributable to owners of the parent	150,724	247,697
	06/30/2019	12/31/2018
	Units	Units
Number of common shares in circulation	263,196,524	263,196,524
	06/30/2019	12/31/2018
Basic earnings per share (US\$ per share)	0.5727	0.9411

The Company has not made any operations with a potential dilutive effect that assumes diluted earnings per share are different from the basic earnings per share.

Note 22 Contingencies and restrictions

In accordance with note 19,1, the Company has only registered a provision for those lawsuits in which there is a probability that the judgments will be unfavorable to the Company, The Company is party to the following lawsuits and other relevant legal actions:

22.1 Lawsuits and other relevant events

- (a) Plaintiff : Nancy Erika Urrea Muñoz
 Defendants : Fresia Flores Zamorano, Duratec-Vinilit S.A. and the Company and their Insurers
 Date : December 2008
 Court : 1st Civil Court of Santiago
 Reason : Labor Accident
 Status : Judgment favorable for the Company, Dated March 11, 2016, Appeal filed by the plaintiff which has not been pronounced on, Awaiting notification of the sentence, case filed on December 28, 2016.
 Nominal value : ~ThUS\$ 550
- (b) Plaintiff : City of Pomona California, USA
 Defendants : SQM North America Corporation (“SQM NA”)
 Date : December 2010
 Court : United States District Court Central District of California
 Reason : Payment of expenses and other amounts related to the treatment of groundwater to allow for its consumption by removing the existing perchlorate in such groundwater that allegedly comes from Chilean fertilizers
 Status : On May 17, 2018 , district judge Gary Klausner sentenced in favor of SQM NA following the verdict of the jury, On September 14, 2018, the plaintiff filed a motion to appeal, which is pending resolution
 Nominal value : ~ ThUS\$ 32,000
- (c) Plaintiff : City of Lindsay, California, USA
 Defendants : SQM NA and the Company (still not noticed)
 Date : December 2010
 Court : United States District Court Eastern District of California
 Reason : Payment of expenses and other amounts related to the treatment of groundwater to allow for its consumption by removing the existing perchlorate in such groundwater that allegedly comes from Chilean fertilizers
 Status : Filing of the case, processing suspended.
 Nominal value : Not possible to determine.

 Court : First Civil Court of Concepción.
 Reason : Disputes arising from the execution of civil works and electromechanical assembly contracts.
 Status : Discussion stage. Appeals are pending before the Concepción Court of Appeals in respect of decisions denying incidental proceedings regarding the court's lack of jurisdiction. Pending ruling on motion to dismiss based on lack of jurisdiction.
 Nominal value : ~ ThUS\$ 770,290

Note 22 Contingencies and restrictions (continued)

22.1 Lawsuits and other relevant events, continued

The Company and its subsidiaries have been involved and will probably continue to be involved either as plaintiffs or defendants in certain judicial proceedings that have been and will be heard by the arbitration or ordinary courts of justice that will make the final decision. Those proceedings that are regulated by the appropriate legal regulations are intended to exercise or oppose certain actions or exceptions related to certain mining claims either granted or to be granted and that do not or will not affect in an essential manner the development of the Company and its subsidiaries.

Soquimich Comercial S.A, has been involved and will probably continue being involved either as plaintiff or defendant in certain judicial proceedings through which it intends to collect and receive the amounts owed, the total nominal value of which is approximately US\$1,2 million.

The Company has made efforts and continues making efforts to obtain payment of certain amounts that are still owed to the Company due to its activities, Such amounts will continue to be required using judicial or non-judicial means by the plaintiffs, and the actions and exercise related to these are currently in full force and effect.

The Company and its subsidiaries have received no legal notice on lawsuits other than those indicated above, which exceed US\$0,2 million.

Note 22 Contingencies and restrictions (continued)

22.2 Restrictions to management or financial limits

Contracts that subscribed the issuance of bonuses in the local and international market require the Company to comply with the following level of consolidated financial indicators, calculated for the last 12 month period:

Maintain a borrowing ratio less than 1.4 for the Series H bond and 1.44 for the Series O bond. Furthermore, both bonds establish that if the borrowing ratio exceeds 1.2, the bondholders can voluntarily and individually choose to redeem these bonds early at par value. The borrowing ratio is defined in the bond line contracts and legal prospectuses against which the Series H and Series O Bonds were issued, and this ratio will reach 1.21 as a consequence of IFRS 16 becoming effective and being implemented in these financial statements. Therefore the early redemption option for these bondholders will become available, in accordance with these documents. Exercising this option will be subject to the bondholders communicating their choice to the Bondholders' Representative within the periods and in the manner prescribed in the respective issue documents. The borrowing ratio is defined as Total Liabilities divided by Total Equity.

As of June 30, 2019, the above mentioned financial indicator has the following values:

Indicator	06/30/2019	12/31/2018
Leverage	1.21	1.00

Bond issue agreements issued abroad require the Company to neither merge nor dispose of the whole or a substantial part of its assets, unless all the following conditions are met: (i) the legal successor company is an entity subject to either Chilean or United States law, and assumes SQM S.A.'s obligations under a complimentary contract, (ii) the Issuer does not fail to comply immediately after the merger or disposal, and (iii) the Issuer delivers a legal opinion stating that the merger or disposal and the complimentary contract meet the requirements described in the original contract.

In addition, SQM S.A. is committed to disclosing financial information on quarterly basis.

The Company and its subsidiaries have complied and are fully complying with all the aforementioned limitations, restrictions and obligations, , except that as of June 30, 2019 and as a result of implementing IFRS 16, the borrowing ratio limit was exceeded and the obligations subject to this limit were presented as short term, see Note 14.

Note 22 Contingencies and restrictions (continued)

22.3 Environmental contingencies

On June 6, 2016, the “SMA” filed charges against the Company with respect to the Pampa Hermosa project for possible noncompliance with RCA 890/2010.

This relates to charges related to certain variables of the follow-up plan and the implementation of a mitigation measure included in the respective environmental impact assessment. The Company has presented for the approval of SMA a compliance program detailing the actions and commitments it will carry out to address the SMA's objections.

On June 29, 2017, the SMA rejected the compliance program presented by the Company, On July 10, 2017, the Company presented its rebuttals to the charges made by the SMA, On August 21, 2018, the Second Environmental Court accepted the Company's claim, ordering the SMA to take the procedure back to the stage prior to their resolution rejecting the compliance program presented by the Company.

The SMA approved SQM's proposed compliance program in its resolution dated January 26, 2019, and this program is currently being executed. On March 22, 2019, the indigenous communities of Quillagua and Huatacondo filed a complaint against the resolution that approved the compliance program before the First Environmental Court of Antofagasta (R-21-2019). This process was suspended on May 16, 2019.

The SMA issued a resolution dated November 28, 2016, rectified by a resolution dated December 23, 2016, which filed charges against SQM Salar for brine extraction in excess of authorized amounts, progressive impairment of the vitality of carob trees, providing incomplete information, amending variables, and other charges.

SQM Salar S.A. presented a compliance program that described the measures that will be implemented to overcome the objections identified by the SMA. This program was accepted by the SMA in a resolution dated January 7, 2019, which consequently suspended the process. The compliance program is currently underway, which includes temporary restrictions on brine extraction that end in June 2020.

On January 30, January 31 and February 1, 2019, three claims against the approved compliance program were filed with the Antofagasta Environmental Court (Roles R-17-2019, R-18-2019 and R-19-2019, cumulative). This process is awaiting sentence.

Note 22 Contingencies and restrictions (continued)

22.3 Environmental contingencies, continued

On August 26, 2016, SQM Salar filed a tax claim before the Third Tax and Customs Court of the Metropolitan Region against settlements 169, 170, 171 and 172, which extend the application of specific mining tax to lithium exploitation. The disputed amount is approximately US\$17.8 million. On November 28, 2018, the Third Tax and Customs Court rejected the claim, and the case was transferred to the Santiago Court of Appeals, following an appeal filed by SQM Salar.

On March 24, 2017, SQM Salar filed with the Third Tax and Customs Court of the Metropolitan Region a tax claim against tax assessment No. 207 of 2016 and ruling No. 156 of 2016, both issued by the Chilean IRS, which seek to expand application of the specific tax on mining activities to include lithium exploitation for tax years 2015 and 2016. The amount involved is approximately US\$14.4 million. On November 28, 2018, the Third Tax and Customs Court accepted SQM Salar's claim for US\$7.0 million corresponding to the overcharge made by the SII and rejected the remainder of the claim. The case is in the Santiago Court of Appeals, based on the appeal filed by SQM Salar.

These amounts are classified as taxes for current assets, non-current, as of December 31, 2018 and the same as of June 30, 2019.

The amount in dispute is US\$ 32.2 million, and approximately US\$ 25.2 million of this sum is the potential specific mining tax associated with lithium, whereas US\$ 7.0 million is an excess charge by the SII.

The SII has not settled differences with respect to specific mining taxes for 2016, 2017, 2018 and the current business year. As of the date of these financial statements, the Company has not made provisions for these potential differences.

If the Chilean IRS uses criteria similar to that used in previous years, it may issue an assessment in the future for the 2016, 2017 and 2018 financial years. It is reasonable to expect that should these assessments for the period 2016 through the first quarter of 2019 be issued, the value would be approximately US\$65 million (without considering potential interest and fines).

Solutions

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 22 Contingencies and restrictions (continued)

22.4 Contingencies regarding the Changes to the Contracts with Corfo:

On September 6, 2018, representatives Claudia Nathalie Mix Jiménez, Gael Fernanda Yeomans Araya and Camila Ruslay Rojas Valderrama and the Poder Ciudadano political party filed an annulment suit against Corfo, which requested that the Contract for the Salar de Atacama Project between Corfo and the Companies be annulled. The Companies have taken part of the process as interested third parties.

In the event that the annulment claim is approved for the Salar de Atacama Project Contract, SQM Salar may be prevented from exploit the mining claims in the Salar de Atacama that it has leased from Corfo.

Note 22 Contingencies and restrictions (continued)

22.5 Contingencies related to the Class Action lawsuit

Since October 2015, a consolidated class action lawsuit has been pending against the Company before the District Court for the Southern District of New York of the United States. The consolidated lawsuit alleges that certain statements made by the Company between June 30, 2010, and June 18, 2015, mainly in documents filed with the SEC and in Company press releases, were materially false and this constitutes a violation of Section 10 (b) of the Securities Exchange Act of 1934 (“Exchange Act” of 1934) and of the correlative Standard 10b-5. Specifically, the consolidated lawsuit challenges certain statements issued by the Company associated with its compliance with or implementation of the laws and regulations that regulate it, the effectiveness of its internal controls, the adoption of a code of ethics consistent with SEC requirements, of its income or revenue and taxes paid, and of the applicable accounting standards. The primary plaintiff seeks compensation for the class in an as yet undetermined amount for economic losses occurring as a result of the questioned statements. On January 10, 2018, the primary plaintiff filed a motion to certify a class composed of all people or entities who purchased ADSs in the Company between June 30, 2010, and March 18, 2015, and this motion is still pending with the court.

Although the Company expects to actively and decisively defend its position, the outcome of this litigation cannot be predicted

Note 23 Lawsuits and complaints

Investigation by the Department of Justice and the Securities Exchange Commission and Agreements

On January 13, 2017 On January 13, 2017, the Company signed agreements with the DOJ and the SEC relating to their investigations into Company payments to suppliers and organizations that may have had links with politically exposed persons during the period from 2008 to 2015. As a result the Company conducted its own internal investigation through an ad-hoc Board committee. The Company's securities are traded in the USA, so the Company is subject to US law. The Company has voluntarily submitted the results of its internal investigation and supporting documents to the DOJ, the SEC and the relevant Chilean authorities.

In accordance with the terms of the Deferred Prosecution Agreement (the "DPA") with the DOJ, the Company has accepted that the DOJ formulates (i) a charge for infractions for the lack of implementation of effective internal accounting systems and internal accounting controls and (ii) a charge for infractions for failure to adequately maintain books, records and accounting sections in relation to the events investigated, Under the DPA, the DOJ has agreed not to pursue such charges against the Company for a period of 3 years and release the Company from liability after such period, inasmuch as within that period the Company complies with the terms of the DPA, These include payment of a fine of US\$15,487,500 and acceptance of an external monitor for a period of 24 months that will assess the Company's compliance program, and continue to report on the Company independently for an additional year.

In relation to the agreement with the SEC, the Company has agreed to (i) pay a fine of 15 million dollars and (ii) maintain the Monitor for the aforementioned period.

The SEC has issued a *Cease and Desist Order* that does not identify other breaches of United States regulations.

The aforementioned amounts, approximately US\$30,5 million, were reflected in the Company's profit and loss during the fourth quarter of 2016 in the "Other Expenses by function" line.

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 24 Sanction proceedings

On April 03, 2018, the National Directorate of the “Dirección Nacional del Servicio Nacional de Geología y Minería” (National Geology and Mining Service) filed charges against SQM Industrial for the alleged violation of Article 40 letter c) of Law No. 20,551 that regulates the closure of mining works and facilities for Pampa Blanca, located in the district of Sierra Gorda, On April 26, 2018, SQM Industrial gave its deposition. By Resolution No.1,451 SERNAGEOMIN imposed a fine of 35 UTM on SQM Industrial through its Resolution 1,451 dated May 30, 2019. This resolution is now final.

Solutions

progress

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 25 Environment

25.1 Disclosures of disbursements related to the environment

The Company is continuously concerned with protecting the environment both in its production processes and with respect to products manufactured. This commitment is supported by the principles indicated in the Company's Sustainable Development Policy. The Company is currently operating under an Environmental Management System (EMS) that has allowed it to strengthen its environmental performance through the effective application of the Company's Sustainable Development Policy.

Operations that use caliche as a raw material are carried out in desert areas with climatic conditions that are favorable for drying solids and evaporating liquids using solar energy. Operations involving the open-pit extraction of minerals.

Many of the Company's products are shipped in bulk at the Port of Tocopilla. In 2007, the city of Tocopilla was declared a zone saturated with MP10 Particles mainly due to the emissions from the electric power plants that operate in that city. In October 2010, the Decontamination Plan for Tocopilla was put in place. Accordingly, the Company has committed to taking several measures to mitigate the effects derived from bulk product movements in the port. These measures have been timely implemented since 2007.

Note 25 Environment (continued)

25.1 Disclosures of disbursements related to the environment, continued

The Company carries out environmental follow-up and monitoring plans based on specialized scientific studies. Follow-up on relevant variables defined for each project enables the Company to verify the status, for example, of vegetation, flora, fauna and aquatic life in the ecosystems to protect. Follow-up plans are supported by a broad control network that includes monitoring points such as meteorological stations and wells, satellite images, plots for recording the status of vegetation and fauna, etc. The activities comprised in these plans are reported regularly to authorities based on the Company's commitments made through resolutions that approve different SQM projects.

The Company maintains environmental monitoring across the systems where it operates, which is supported by numerous studies that integrate diverse scientific efforts from prestigious research centers on a national and international level, such as the Spanish National Research Council (CSIC) and the Universidad Católica del Norte.

Furthermore, within the framework of the environmental studies which the Company is conducting, the Company performs significant activities in relation to the recording of Pre-Columbian and historical cultural heritage, as well as the protection of heritage sites, in accordance with current Chilean laws. These activities have been especially performed in the areas surrounding Maria Elena and the Nueva Victoria plant. This effort is being accompanied by cultural initiatives within the community and the organization of exhibits in local and regional museums.

As emphasized in its Sustainable Development Policy, the Company strives to maintain positive relationships with the communities surrounding the locations in which it carries out its operations, as well as to participate in communities' development by supporting joint projects and activities which help to improve the quality of life for residents. For this purpose, the Company has focused its efforts on activities involving the rescue of historical heritage, education and culture, as well as development.

In order to do so, it acts both individually and in conjunction with private and public entities.

25.2 Detail of information on disbursements related to the environment

The cumulative disbursements which the Company had incurred as of June 30, 2019 for the concept of investments in production processes, verification and control of compliance with ordinances and laws related to industrial processes and facilities amounted to ThUS\$8,081 and are detailed as follows:

Note 25 Environment (continued)

25.3 Description of each project, indicating whether these are in process or have been finished

SQM S.A.

0138: This project is to increase the height of each SO₂ absorber tower (regular and stand-by towers) by 2.5 meters. The towers' additional height will allow the height of the packing to be increased by 2.5, thereby improving the efficiency of the SO₂ absorption. The main activities are: Basic and detailed engineering; supply of the bodies of the absorber towers (frp), liquid distributors, tower brine pump pad, tri-pack packing type, polyethylene pipes and fitting; gas measurement service; metallic structure manufacturing and installation services; and project start-up.

I0172: The commitments of the Pampa Hermosa project for the Salar de Llamara include the Tamarugos Environmental Management Plan (PMAT), which contemplates an Environmental Education Program that includes the design, construction and start-up of an Environmental Education Center (CEDAM) at Puquios de Llamara. Conceptual design, detailed design, construction and start-up are necessary for the CEDAM, which will be subject to approval by the authorities so its duration and costs are subject to the approval of third parties.

I0174: The commitments within the Pampa Hermosa project include implementing "Value Added" at the former Pintados station. The "Value Added" proposal was submitted to the authority and once approved, it should be implemented (parking, path, shade and information panels). The commitments within the "Zona de Mina Nueva Victoria" and "Pampa Hermosa" projects include implementing a storage facility in Humberstone to store archaeological material recovered as a result of the archaeological compensation measures included in these projects. The Humberstone storage facility requires a proposal and subsequent implementation, which is subject to approval by the authority. Therefore, its duration and cost is subject to such third-party approvals.

I0187: The project involves the implementation of measures that were committed to during the penalty process, including urgent and transitory measures. Actions to be implemented include monthly biotic monitoring, quarterly landscape monitoring, metagenomic analysis, study accrediting the nonexistence of environmental effects in puquios (aquatic biota) and study accrediting the implementation of adequate water quality control of water injected into the system, both accredited by a center for excellence in a state or state-recognized university.

I0194: Tender and awarding of environmental permits, implement archeology, biota, human environment campaigns, etc., develop marine studies, prepare reports and enter study into the assessment system, monitor and respond to addenda until the system is approved. Prepare and submit claims to third parties associated with the request for rights of way.

I0055: The gas/liquid ratio is deficient in the SO₂ plant, preventing the absorption of SO₂, resulting in free iodine losses, due to inadequate stripping of kerosene and prilling air. This phenomenon also causes plugs in ducts and furnaces (unscheduled plant shutdowns), a highly contaminated environment for people (hygiene and health deviations), excessive acid rain (corrosion of facilities), and a high sulphur and sodium metabisulphite consumption factor. By changing the extraction fans to increase airflow and SO₂ absorption towers for prilling, the diameter of the ducts can be expanded. This ensures that the gas/liquid ratio can be increased and sustained. A scrubber unit must be installed (tower, pump, gas extractor and piping) to reduce SO₂ emissions. The same concept was developed for the SO₂ Iodine plant in Maria Elena.

Note 25 Environment (continued)

25.3 Description of each project, indicating whether these are in process or have been finished, continued

I0073: The iodine gas capture system is operating very inefficiently. Iodine vapor levels are between 150% and 4,900% higher than the limits for workplaces in iodine plants and warehouses, according to Article 61 of Supreme Decree 594/1999, which Approves the Regulations regarding Basic Sanitary and Environmental Conditions in Workplaces. The project is underway.

I0122 The project will repair and replace environmental monitoring boreholes that need to be deepened. Improvements in pique boreholes are also included, to avoid risk conditions. The priority boreholes are N°8 and 10-S-1 in Pampa del Tamarugal and PO-5 in Salar de Llamara.

I0183: A heritage baseline in the western mine sector will be prepared, which is a DIA requirement.

I0176: The project will prepare an initial diagnosis at various sites, which will identify the deviations and measures required to adapt them, in order to subsequently prepare an adaptation program that will be submitted to the Regional Health Ministerial Secretary. The measures will be defined on the basis of this diagnosis, and minor or major structural amendments that require prior environmental assessment (DIA/EIA) may be necessary.

I0282: The project will prepare an initial diagnosis at various sites, which will identify the deviations and measures required to adapt them, in order to subsequently prepare an adaptation program that will be submitted to the Regional Health Ministerial Secretary. The measures will be defined on the basis of this diagnosis, and minor or major structural amendments that require prior environmental assessment (DIA/EIA) may be necessary.

I0283 The project will implement the measures described in the PDC. The implementation includes advice from consultants (regarding legal, hydrogeological, and PDC procedures), studies and additional monitoring (UCN, ANAM, FisioAguas, and other studies), in addition to building infrastructure.

SQM Industrial S.A.

I0177: The project will complete the basic engineering, execute the EIA Tente en el Aire, obtain the legal and sectorial permits for a second stage to secure the execution of the project.

I0250: The project consists of re-drilling well 2PI-2, which implies the detention of the extraction well, extraction of current casing and its re-drilling, with the relevant development work and pump tests. Road maintenance works imply leveling roads, filling damaged areas and compacting this fill.

J0102: It is proposed to build a new PTS plant that is integrated into the NPT 2 crystallization process. The engineering design of this plant considers the reuse of the equipment already acquired for the NK PV plant. The plant includes a new raw materials yard, a grinder stage (sizer), a wet mill, a dissolution stage with reactors and thickener and a filtration and centrifuge unit for discarded salt. The crystallization from the NPT1 and NPT2 plants will be reused, as well as the refining plant at the NPT2 plant.

P0036: The project will reuse the crystallization plant and all its associated facilities to produce nitrate salts.

Note 25 Environment (continued)

25.3 Description of each project, indicating whether these are in process or have been finished, continued

P0065: The project will install a transformer, posting and collecting tank for trench solutions. It will also improve the trench sector to safely position the low suction pumps. Heavy machinery will be required.

J0107: The project looks to renovate and automate the operation of pump stations at the three water intakes, by incorporating automatic valves and smart controls for pumps, In addition, water intake pipe sections, cut-off valves, check valves, drains and vents should be renewed, Due to the water conditions and length of pipes, these face the risk of failure due to overpressure, corrosion and material wear, Maintenance and repair works must also be undertaken on pumps at each water intake as a result of wear and corrosion due to the characteristics of river water.

J0122: The project consists of entering the Coya Sur wells into the “environmental impact assessment system” and processing the permits for these wells with the General Directorate of Water Resources (DGA).

J0135: This project consists of dealing with all the oils and components that contain 50ppm or more of Policlorobife PCB by 2025 at the latest. The activities to be undertaken will be to deal with all those elements with oil that have previously been identified as having more than 50ppm of PCB.

M0020: The project consists of concluding the system of the drinking water network, in addition to renewing several sections of the network, due to the deterioration of original pipes. It also intends to acquire equipment to better address water seepage in town and problems in the sewage chambers. Sewage water management requires a single backfill for final sludge disposal, in keeping with current legislation.

I0156: The project will recover water from the osmosis rejection plant and use it in the pile leaching area, increasing the efficiency of water resource use.

J0070: This is preparing and processing the Environmental Impact Statement (DIA), in order to obtain an Environmental Qualification Resolution (RCA). The required background information includes the baseline air quality. Therefore, a MP 2.5 and gas monitoring station was installed that compliments the current stations at Maria Elena. The project is underway.

J0133: The project will increase filtration capacity with the centrifuge of the Anhydrous Sulphate Plant: Industrial test. If it is favorable, install belts to transfer waste to the collection yard.

J0152: The project will install exhaust gas heat recovery equipment in boilers and implement associated structural improvements.

J0142: The project will implement environmental measures associated with updating the CS DIA (heritage sign and paving ME road) and the Pedro de Valdivia DIA (controlled disturbance plan).

J0157: The project will update the closure plans in accordance with the normal regime established by current legislation. These requirements include an initial external audit, detailed risks analysis and their control, and other requirements.

Note 25 Environment (continued)

25.3 Description of each project, indicating whether these are in process or have been finished, continued

J0158: The project will prepare and process sectorial permits for favorable reports to construct in Coya Sur (CS), and permits for hydraulic works defined in Article 294 of the Water Code (evaporation wells) at CS and NV.

J0172: The project will ensure the availability of water resources. It includes: Acquisition of a Flowserve 6GT booster pump, as a “spare” to drive water to Pedro de Valdivia. Acquisition of 2 motor pump sets to renew the current Coya-Vergara 3 and 4 sets, as the current brand has become obsolete. Repair the industrial water accumulation pond in Recinto Vergara (increasing the storage capacity by 1500 m³). Continue renovating pipes and vents in water lines in "CS, ME, VE and CV" adductions

P0070: The project will clean deep boreholes using external resources, to remove salts and clean the interior, in order to ensure solution recovery. Identify better quality equipment (bbas), but more expensive than the current equipment, and to maintain a fitting stock for spare parts.

Note 25 Environment (continued)

25.3 Description of each project, indicating whether these are in process or have been finished, continued

SIT S.A.

T0062: A 35 x 110 m hangar will be installed on yard 6 to stockpile bulk product that also permits loading and unloading from trucks and front loaders as well as proper stacking. The warehouse in yard 6 will be expanded into boxes 5 and 6 in order to stockpile bulk product.

T0018: The project will install an underground conveyor belt that runs outside the storage boxes of yards 8 and 9, and connects to belt 5 and then to the loading system. The project has an environmental component, although it is an operational improvement. The project includes the purchase and implementation of belt coverage as an emissions mitigation measure (internal emissions control measure), in order to improve compliance with the Tocopilla Atmospheric Decontamination Plan (PDA). The project is in progress.

T0019: The project installed coverings (roof and sides) to the 4 new storage boxes that will be built in areas within yards 8 and 9. The project has an environmental component, although it is an operational improvement. The project includes the construction of a warehouse as an emissions mitigation measure, in order to improve compliance with the Tocopilla Atmospheric Decontamination Plan (PDA) and reduce dust emissions. The project has been completed.

T0032: The project will install an underground conveyor belt that runs outside the storage boxes of yard 6, with feeding points connected directly to belt 6 and then to the loading system. The project has an environmental component, although it is an operational improvement. The project includes implementing conveyor belt 6 from yard 6, which is an emission control measure that was committed in the Tocopilla PDA. The project is currently underway.

T0034: The project invested as required to maintain the operational capacity of the port, and to ensure the high availability of loading equipment. The project has an environmental component, although it is an operational improvement. The project included replacing and/or repositioning the damaged wind breaks in yard 3, which is an emission control measure that was committed in the Tocopilla PDA. The project has been completed.

T0036: The project will install rainwater collection gutters in the storage warehouses. It will carry out an engineering study of potential multiproduct storage in a single silo and potentially install vibrating floors that allow product free runoff thus avoiding manual operation risks and the effect that this causes during loading.

T0042: In accordance with regulatory matters in Article 13 Supreme Decree. 70/2010, Tocopilla PDA must incorporate dust collection systems in TV-1 and TV-2 hoppers at yards 8 and 9.

T0045: Belts for yards 8 and 9 will be finished by joining them to belt 5 and thus become part of the loading system. This involves the extension, joining and overhaul of belt 5, and joining it to pan feeder 3 and its corresponding improvements, to become an integral part of the loading system. This complies with the environmental regulations required by the Tocopilla Decontamination Plan. "Atmospheric Decontamination Plan for the City of Tocopilla and its Surrounding Zone" (Supreme Decree 70/2010; Art.13 II.3).

Note 25 Environment (continued)

25.3 Description of each project, indicating whether these are in process or have been finished, continued

T0050: Loose soil within the perimeter of the supply warehouse in yard 17 is uneven, which causes difficulties and operational risks for both the supply and operational warehouses. The surface area to be covered in paving stones is 2,100 m². Furthermore, it includes the construction of a hazardous waste yard.

T0064: Sentinel Sweeper Equipment Purchase - Purchase of operationally critical equipment.

T0061: The project will construct the second stage of the warehouse for yard 9 (1,500 square meters).

SQM Salar.

L0121: Change weather station equipment to comply with regulations.

L0122: The project will install flowmeters that meet the new standard, and add standby flowmeters. The project is in progress.

L0147: This project will reduce industrial waste storage points. It will rely on an external company that segregates, sorts, and packages industrial waste, in accordance with the RCA and current regulations, so that waste can be removed from these points for final disposal outside our facilities.

L0180: Standardization of lighting and electrical circuits for land transport facilities in Salar Atacama.

C0039: The project will increase the production capacity of lithium carbonate from 70,000 tons per year to 120,000 tons per year.

L0149: The project will assemble a dehydrating plant in SQM Salar's current facilities. The plant will treat, store, transport and finally dispose of sludge generated by wastewater treatment plants, and provide the solutions that comply with Supreme Decree 04/09, "Regulations for Sludge Handling in Wastewater Treatment Plants".

L0184: The project will contract Environmental Monitoring Plan advice, and improvements in environmental monitoring.

L0187: The project involves this 5th update to numeric modeling, which would provide compliance with the commitments undertaken during the environmental qualification process for the project "Changes and Improvements to Mining Operations in the Salar de Atacama".

Note 25 Environment (continued)

25.3 Description of each project, indicating whether these are in process or have been finished, continued

L0188: The project involves the participation of an external consulting team to narrow down the sources of the risks identified, propose operational optimization plans, improvements to control systems (monitoring networks) and support in modeling this deposit with a view to a better evolution of short- and medium-term projections (5 years). It will also propose the identification of alternative sources of productive brine equivalent at the nucleus. It proposes 3 stages: Diagnosis, operational improvements and monitoring-identification of new sources. Others: support in the development of 3D Peine and Quelana models, through a collaboration with CSIC involving 2 professionals for 6 months at a total cost of ThUS\$36. Others: doctorate-level development in quantification and recharge from rain and snow, by supporting a doctoral student under the supervision of Emilio Custodio and Enric Vásquez for a 3-year period, with an annual budget of ThUS\$36 (total ThS\$108).

L0189: It includes improving the current lysimeter stations (7) and implementing new stations (7) in important sectors that are not currently measured, with the ability to remotely transmit information. This will improve the spatial coverage of the stations that measure evaporation within the basin. The initial stage includes constructing 7 lysimeters on land inside the Salar. Subsequently, the equipment implementation stage will initiate recording, storing and transmitting information. Finally, an international expert will provide advice regarding an analysis of the information from all the current stations, to recalculate basin evaporation and propose methodological improvements.

L0156: The project will make the process of producing the combined weight and packing list for trucks more efficient, reducing the time they spend inside the facilities. This requires an engineering study and installing a new weighbridge on land where the Oscar guard post used to be in Salar de Atacama. It will also make weighing trucks more efficient by relocating weighbridge 1 in the Salar de Atacama to a more suitable area, thus avoiding its current problems. The weighbridges would become superficial.

L0198: The project will date sediment using the 14C method (or another to be defined) in the depositional environments of the last 50,000 years to complement the facies sedimentological model provided by the consultant. The project will try to reconstruct the variability history of the lagoon system with absolute ages.

L0200: The project will identify an appropriate device. Field testing of sensors. Purchase of sensors for all points. Installation of sensors. Analyze remote data transmission (future project)

L0203: The project will install a remote telemetry system in boreholes.

SQM Nitratos S.A.

I0127: By installing a reverse osmosis system or a process that enables the recovery of industrial water and that reduces the hardness of the water for cleaning the equipment, we can reuse this water to wash equipment again, thereby reducing the damage to the electrical systems of the equipment as a result of corrosion.

Note 26 Mineral resource exploration and evaluation expenditure

Given the nature of operations of the Sociedad Química y Minera de Chile S.A. and Subsidiaries and the type of exploration it undertakes, disbursements for exploration can be found in 4 stages: Implementation, economically feasible, not economically feasible and in exploitation:

1 ***Implementation:*** Disbursements for prospecting under implementation and therefore prior to determination of economic feasibility, are classified in the caption in Note 3. There is an amount of ThUS\$9,965 in the line item for caliche and brine exploration from Salar de Atacama as of June 30, 2019, and ThUS\$8,355 as of December 31, 2018. For Mt Holland, total disbursements corresponding to Work in progress (which includes exploration disbursements) amount to ThUS\$19,784 as of June 30, 2019, and ThUS\$11,298 as of December 31, 2018.

2 ***Economically feasible:*** Prospecting disbursements corresponding to caliche exploration, wherein the study concluded that its economic feasibility is viable, are classified under Non-Current Assets in Other Non-current Financial Assets, The balance as of June 30, 2019, is ThUS\$4,934 and as of December 31, 2018, it is ThUS\$16,397.

For the exploration of the Salar de Atacama, the associated assets correspond to wells that can be used both in monitoring and exploitation of the Salar, Therefore, once the studies are concluded, these are classified as Non-current Assets in Properties, Plants and Equipment, assigning them a technical useful life of 10 years.

3 ***Not economically feasible:*** Prospecting disbursements, once finalized and concluded to be not economically feasible, will be charged to profit and loss. As of June 30, 2019, there was a total of ThUS\$165 for this concept, and as of December 31, 2018, there were no disbursements for this concept.

4 ***In Exploitation:*** Caliche exploration disbursements that are found in this area are amortized based on the material exploited, The portion that is exploited in the following 12 months is presented as current assets in the inventories. As of June 30, 2019, the amount is ThUS\$1,951 and the balance as of December 31, 2018 for this concept is ThUS\$2,028, the portion that will be amortized in the following years is classified as non-current assets under Other Non-current Assets, As of June 30, 2019, there is a balance of ThUS\$8,979 for this concept, and as of December 31, 2018, the balance is ThUS\$9,791.

Disbursements corresponding to metal exploration are charged to profit or loss in the period in which they are incurred.

Note 27 Gains (losses) from operating activities in the statement of income of expenses, included according to their nature

27.1 Revenue from operating activities

The Group derives revenues from the sale of goods (which are recognised at one point in time) and from the provision of services (which are recognised over time) and are distributed among the following geographical areas and main product and service lines:

a) Geographic areas:

06/30/2019							
Geographic areas	Specialty plant nutrition	Iodine and derivatives	Lithium and derivatives	Potassium	Industrial chemicals	Other	Total ThUS\$
Chile	31,300	602	296	14,139	2,450	13,909	62,696

Note 28 Reportable segments

28.1 Reportable segments

General information:

The amount of each item presented in each operating segment is equal to that reported to the highest authority that makes decisions regarding the operation, in order to decide on the allocation of resources to the defined segments and to assess its performance.

These operating segments mentioned are consistent with the way the Company is managed and how results will be reported by the Company. These segments reflect separate operating results that are regularly reviewed by the executive responsible for operational decisions in order to make decisions about the resources to be allocated to the segment and assess its performance (See Note 28.2).

The performance of each segment is measured based on net income and revenues. Inter-segment sales are made using terms and conditions at current market rates.

Factors used to identify segments on which a report should be presented:

The segments covered in the report are strategic business units that offer different products and services. These are managed separately because each business requires different technology and marketing strategies.

Description of the types of products and services from which each reportable segment obtains its income from ordinary activities

The operating segments, which obtain income from ordinary activities, generate expenses and have its operating results reviewed on a regular basis by the highest authority who makes decisions regarding operations, relate to the following groups of products:

1. Specialty plant nutrients
2. Iodine and its derivatives
3. Lithium and its derivatives
4. Industrial chemicals
5. Potassium
6. Other products and services

Description of income sources for all the other segments

Information regarding assets, liabilities, profits and expenses that cannot be assigned to the segments indicated above, due to the nature of production processes, is included under the "Unallocated amounts" category of the disclosed information.

Note 28 Reportable segments (continued)

28.1 Reportable segments, continued

Basis of accounting for transactions between reportable segments

Inter-segment sales are made under the same conditions as sales to third parties and are measured consistently as presented in the statement of income.

Description of the nature of the differences between measurements of results of reportable segments and the result of the entity before the expense or income tax expense of incomes and discontinued operations

The information reported in the segments is extracted from the Company's consolidated financial statements and therefore there is no need to prepare reconciliations between the data mentioned above and those reported in the respective segments, according to what is stated in paragraph 28 of IFRS 8, "Operating Segments".

For the allocation of inventory valuation costs, we identify the direct expenses (can be directly allocated to products) and the common expenses (belong to coproduction processes, for example common leaching expenses for production of Iodine and Nitrates). Direct costs are directly allocated to the product and the common costs are distributed according to percentages that consider different variables in their determination, such as margins, rotation of inventories, revenue, production and etc.

The allocation of other common costs that are not included in the inventory valuation process, but go straight to the cost of sales, use similar criteria: the costs associated with a product or sales in particular are assigned to that particular product or sales, and the common costs associated with different products or business lines are allocated according to the sales.

Description of the nature of the differences between measurements of assets of reportable segments and the Company's assets

Assets are not shown classified by segments, as this information is not readily available, Some of these assets are not separable by the type of activity by which they are affected since this information is not used by management in decision-making with respect to resources to be allocated to each defined segment. All assets are disclosed in the "unallocated amounts" category.

Description of the nature of the differences between measurements of liabilities of reportable segments and the Company's liabilities

Liabilities are not shown classified by segments, as this information is not readily available, Some of these liabilities are not separable by the type of activity by which they are affected, since this information is not used by management in decision-making regarding resources to be allocated to each defined segment. All liabilities are disclosed in the "unallocated amounts" category.

Note 28 Reportable segments (continued)

28.4 Disclosures on geographical areas

As indicated in paragraph 33 of IFRS 8, the entity discloses geographical information on its revenue from operating activities with external customers and from non-current assets that are not financial instruments, deferred income tax assets, assets related to post-employment benefits or rights derived from insurance contracts.

28.5 Disclosures on main customers

With respect to the degree of dependency of the Company on its customers, in accordance with paragraph N° 34 of IFRS N° 8, the Company has no external customers who individually represent 10% or more of its revenue. Credit risk concentrations with respect to trade and other accounts receivable are limited due to the significant number of entities in the Company's portfolio and its worldwide distribution. The Company's policy requires guarantees (such as letters of credit, guarantee clauses and others) and/or to maintain insurance policies for certain accounts as deemed necessary by the Company's Management.

28.7 Property, plant and equipment classified by geographical areas

The company's main production facilities are located near their mines and extraction facilities in northern Chile. The following table presents the main production facilities as of June 30, 2019 and December 31, 2018:

Location	Products
- Pedro de Valdivia	: Production of iodine and nitrate salts
- María Elena	: Production of iodine and nitrate salts
- Coya Sur	: Production of nitrate salts
- Nueva Victoria	: Production of iodine and nitrate salts
- Salar de Atacama	: Potassium chloride, lithium chloride, boric acid and potassium sulfate
- Salar del Carmen	: Production of lithium carbonate and lithium hydroxide
- Tocopilla	: Port facilities

Note 29 Borrowing costs

The cost of interest is recognized as an expense in the year in which it is incurred, except for interest that is directly related to the acquisition and construction of tangible property, plant and equipment assets and that complies with the requirements of IAS 23.

The Company capitalizes all interest costs directly related to the construction or to the acquisition of property, plant and equipment, which require a substantial time to be suitable for use.

29.1 Costs of capitalized interest, property, plant and equipment

The cost of capitalized interest is determined by applying the average or weighted average of all financing costs incurred by the Company to the monthly end balances of works-in-progress meeting the requirements of IAS 23.

The rates and costs for capitalized interest of property, plant and equipment are detailed as follows:

	06/30/2019	06/30/2018
Capitalization rate of costs for capitalized interest, property, plant and equipment	4%	4%
Amount of costs for interest capitalized in ThUS\$	2,973	2,650

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 30 Effect of fluctuations in foreign currency exchange rates (continued)

c) Functional and presentation currency

The functional currency of these companies corresponds to the currency of the country of origin of each entity, and its presentation currency is the U.S. dollar.

d) Reasons to use one presentation currency and a different functional currency

- The total revenues of these subsidiaries are associated with the local currency.
- The commercialization cost structure of these companies is affected by the local currency.

Note 32 Income tax and deferred taxes

Accounts receivable from taxes as of June 30, 2019 and December 31, 2018, are as follows:

32.1 Current and non-current tax assets

a) Current tax assets

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Monthly provisional income tax payments, Chilean companies	21,894	21,172
Monthly provisional income tax payments, foreign companies	4,464	5,199
Corporate tax credits (1)	1,321	1,858
Taxes in recovery process	43,442	28,881
Total	<u>71,121</u>	<u>57,110</u>

b) Non-current tax assets

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Monthly provisional income tax payments, Chilean companies	6,398	6,398
Specific tax on mining activities paid (on consignment)	25,781	25,781
Total	<u>32,179</u>	<u>32,179</u>

- (1) These credits are available for Companies and are related to corporate tax payments in April of the following year. These credits include, among others, credits for training expenses (SENCE), credits for acquisition of fixed assets, donations and credits in Chile for taxes paid abroad.

Note 32 Income tax and deferred taxes (continued)

32.2 Current tax liabilities

Current tax liabilities	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
1st Category income tax	4,778	25,163
Foreign company income tax	14,289	21,097
Article 21 single tax	115	1,152
Total	19,182	47,412

Income tax is calculated based on the profit or loss for tax purposes that is applied to the effective tax rate applicable in Chile. As established by Law No. 20,780, a progressive income tax rate has been established, which is 27% from 2018.

The royalty is determined by applying the taxable rate to the net operating income obtained. According to the chart in force, the Company currently provisioned 5% for mining royalties that involve operations in the Salar de Atacama and 5.64% for caliche extraction operations.

The income tax rate for the main countries where the Company operates is presented below:

Country	Income tax	Income tax
	2019	2018
Spain	25%	25%
Belgium	29.58%	29.58%
Mexico	30%	30%
United States	21% + 6%	21% + 6%
South Africa	28%	28%

32.3 Income tax and deferred taxes

Assets and liabilities recognized in the statement of financial position are offset if and only if:

- 1 The Company has recognized legally before the tax authority the right to offset the amounts recognized in these entries; and

Note 32 Income tax and deferred taxes (continued)

32.3 Income tax and deferred taxes, continued

2 Deferred income tax assets and liabilities are derived from income tax related to the same tax authority on:

- (i) the same entity or tax subject; or
- (ii) different entities or tax subjects who intend either to settle current fiscal assets and liabilities for their net amount, or to exercise tax assets and pay liabilities simultaneously in each of the future periods in which the Company expects to settle or recover significant amounts of deferred tax assets or liabilities.

Recognized deferred income tax assets are the income taxes that are to be recovered in future periods, related to:

- a) deductible temporary differences.
- b) the offsetting of losses obtained in prior periods and not yet subject to tax deduction; and
- c) the offsetting of unused credits from prior periods.

The Company recognizes a deferred tax asset when there is certainty that these can be offset with tax income from subsequent periods, losses or fiscal credits not yet used, but solely as long as it is more likely than not that there will be tax earnings in the future against which to charge these losses or unused fiscal credits.

Recognized deferred tax liabilities refer to the amounts of income taxes payable in future periods related to taxable temporary differences.

progress

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Note 32 Income tax and deferred taxes (continued)

32.3 Income tax and deferred taxes, continued

d.5) Deferred taxes related to benefits for tax losses

The Company's tax loss carryforwards were mainly generated by losses in Chile, which in accordance with current Chilean tax regulations have no expiration date.

As of June 30, 2019 and December 31, 2018, tax loss carryforwards are detailed as follows:

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
Chile	2,058	1,124
Total	<u>2,058</u>	<u>1,124</u>

The tax losses as of June 30, 2019 that form the basis of these deferred taxes correspond mainly to SQM Potasio S. A., SIT S.A., Exploraciones Mineras S.A., Comercial Agrorama Ltda., Agrorama S.A., and Orcoma SpA.

d.6) Unrecognized deferred income tax assets and liabilities

There are no deferred tax assets or liabilities not recognized as of June 30, 2019 and December 31, 2018.

Note 32 Income tax and deferred taxes (continued)

32.3 Income tax and deferred taxes, continued

d.7) Movements in deferred tax assets and liabilities

Movements in deferred tax assets and liabilities as of June 30, 2019 and December 31, 2018 are detailed as follows:

	06/30/2019	12/31/2018
	ThUS\$	ThUS\$
	Liabilities	Liabilities
	(assets)	(assets)
Deferred tax assets and liabilities, net opening balance	(175,361)	(205,283)

Increase (decrease) in deferred taxes in equity	724	2,515
Balances to date	<u>(180,644)</u>	<u>(175,361)</u>

d.8) Disclosures on income tax expense (income)

The Company recognizes current and deferred taxes as income or expenses, and they are included in profit or loss, unless they arise from:

- (a) a transaction or event recognized in the same period or in a different period, outside profit or loss either in other comprehensive income or directly in equity; or
- (b) a business combination

Current and deferred tax expenses (income) are detailed as follows:

	06/30/2019	06/30/2018
	ThUS\$	ThUS\$
	Income	Income
	(expenses)	(expenses)
Current income tax expense

Deferred tax expense, net, total	<u>(6,007)</u>	<u>20,325</u>
Income tax expense	<u>(58,487)</u>	<u>(96,155)</u>

d.9) Equity interest in taxation attributable to equity-accounted investees

The Company does not recognize any deferred tax liability in all cases of taxable temporary differences associated with investments in subsidiaries, branches and associated companies or interest in joint ventures, because as indicated in the standard, the following two conditions are jointly met:

- (a) the parent, investor or interest holder is able to control the time for reversal of the temporary difference; and
- (b) It is more likely than not that the temporary difference will not be reversed in the foreseeable future.

In addition, the Company does not recognize deferred income tax assets for all deductible temporary differences from investments in subsidiaries, branches and associated companies or interests in joint ventures because it is unlikely that they will meet the following requirements:

- (a) Temporary differences are reversed in a foreseeable future; and
- (b) The Company has tax earnings, against which temporary differences can be used.

Note 32 Income tax and deferred taxes (continued)

32.3 Income tax and deferred taxes, continued

d.10) Disclosures on the tax effects of other comprehensive income components:

Income tax related to other income and expense components with a charge or credit to net equity	Amount before taxes (expense) gain 06/30/2019 ThUS\$	(Expense) income for income taxes 06/30/2019 ThUS\$	Amount after taxes 06/30/2019 ThUS\$
Gain (loss) from defined benefit plans	(2,866)	777	(2,089)
Cash flow hedge	3,939	-	3,939
Reserve for gains (losses) from financial assets measured at fair value through other comprehensive income	195	(53)	142
Total	1,268	724	1,992

Income tax related to other income and expense components with a charge or credit to net equity	Amount before taxes (expense) gain 06/30/2018 ThUS\$	(Expense) income for income taxes 06/30/2018 ThUS\$	Amount after taxes 06/30/2018 ThUS\$

Total	5,153	1,045	6,198

Note 32 Income tax and deferred taxes (continued)

32.3 Income tax and deferred taxes, continued

d.11) Explanation of the relationship between expense (income) for tax purposes and accounting income.

Based on IAS 12, paragraph 81, letter “c”, the company has estimated that the method that reveals the most significant information for users of the financial statements is the numeric conciliation between the tax expense (income) and the result of multiplying the accounting profit by the current rate in Chile. The aforementioned election is based on the fact that the Company and subsidiaries established in Chile generate a large part of the Company’s tax expense (income).

Reconciliation of numbers in income tax expenses (income) and the result of multiplying financial gain by the rate prevailing in Chile.

	06/30/2019	06/30/2018
	ThUS\$	ThUS\$
Consolidated income before taxes	209,687	343,723
Income tax rate in force in Chile	27%	27%
	<u> </u>	<u> </u>
Tax expense using the legal rate	(56,616)	(92,805)
Effect of royalty tax payments,	(2,628)	(1,516)
Tax effect of revenue from regular activities exempt from taxation	1,655	1,837
Tax rate effect of non-tax-deductible expenses for determining taxable profit (loss)	(1,083)	(1,162)
Efecto fiscal de tasas impositivas soportadas en el extranjero	48	(1,980)
Variación en activos, pasivos por impuestos diferidos no reconocidos	-	1,277
Other tax effects from reconciliation between accounting gains and tax expenses	137	(1,806)
	<u> </u>	<u> </u>
Tax expense using the effective rate	(58,487)	(96,155)

d.12) Tax periods potentially subject to verification:

The Group’s Companies are potentially subject to income tax audits by tax authorities in each country. These audits are limited to a number of interim tax periods, which, in general, when they elapse, give rise to the expiration of these inspections.

Tax audits, due to their nature, are often complex and may require several years. Below, we provide a summary of tax periods that are potentially subject to verification, in accordance with the tax regulations in force in the country of origin:

Note 32 Income tax and deferred taxes (continued)

32.3 Income tax and deferred taxes, continued

Chile

According to article 200 of Decree Law No 830, the taxes will be reviewed for any deficiencies in terms of payment and to generate any taxes that might arise, There is a 3-year prescriptive period for such review, dating from the expiration of the legal deadline when payment should have been made, This prescriptive period can be extended to 6 years for the revision of taxes subject to declaration, when such declaration has not been filed or has been presented with maliciously false information.

United States

In the United States, the tax authority may review tax returns for up to 3 years from the expiration date of the tax return, In the event that an omission or error is detected in the tax return of sales or cost of sales, the review can be extended for a period of up to 6 years.

As a result of the audit performed by the tax authority, SQM North America Corp., a subsidiary of the Company, paid in November 2018, for income tax and interest between 2013 and 2015, approximately US\$3.8 million, On top of this, SQM North America Corp would have to pay an additional US\$0.4 million in state taxes for the same period, These charges are already provisioned in the financial statements.

Mexico:

In Mexico, the tax authority can review tax returns up to 5 years from the expiration date of the tax return.

Spain:

In Spain, the tax authority can review tax returns up to 4 years from the expiration date of the tax return.

Belgium:

In Belgium, the tax authority may review tax returns for up to 3 years from the expiration date of the tax return if no tax losses exist, In the event of detecting an omission or error in the tax return, the review can be extended for a period of up to 5 years.

South Africa:

In South Africa, the tax authority may review tax returns for up to 3 years from the expiration date of the tax return. In the event that an omission or error in the tax return is detected, the review can be extended for a period of up to 5 years.

Note 33 Assets held for sale and detail of assets sold

The non-current assets held for sale and the components of the disposal groups classified as held for sale are presented in the Consolidated Statement of Financial Position under the item “Non-current assets or groups of assets classified as held for sale”.

The following table shows the movements in assets held for sale:

Assets held for sale	06/30/2019 ThUS\$	12/31/2018 ThUS\$
Terrenos Soquimich Comercial S.A.	1,430	1,430
Total assets held for sale	1,430	1,430

Note 34 Events occurred after the reporting date

34.1 Authorization of the financial statements

The consolidated financial statements of Sociedad Química y Minera de Chile S.A, and subsidiaries, prepared in accordance with IFRS for the period ended June 30, 2019, were approved and authorized for issuance by the Company's Board of Directors on August 21, 2019.

34.2 Disclosures on events occurring after the reporting date

Except for the events referred to in these Notes, management is not aware of any other significant events that occurred between July 1, 2019 and the date of issuance of these consolidated financial statements that could significantly affect them.

34.3 Details of dividends declared after the reporting date

On August 21, 2019, the Board approved payment of a provisional dividend equivalent to US\$0.26669 per share with a charge to Company earnings for 2019. This amount will be paid in its Chilean peso equivalent at the Observed Dollar rate published in the Official Gazette on August 30, 2019. This dividend will be paid to shareholders, in person or through their duly authorized representatives, starting at 9:00 a.m. on September 12, 2019. The shareholders who are registered in the respective registry five business days prior to the date of payment will be entitled to the dividend.

Nota 35 Additional unaudited information

35.1 Financial risk management policy

There could also be additional risks, which are either unknown or known but not currently deemed to be significant, which could also affect the Company's business operations, its business, financial position, or profit or loss.

The financial risk management structure includes identifying, determining, analyzing, quantifying, measuring and controlling these events.

Risks Relating to Our Business

We could be subject to numerous risks as a result of legal proceedings and deferred prosecution agreements with U.S. and Chilean governmental authorities in relation to certain payments made by SQM between the tax years 2009 and 2015.

On January 13, 2017, the Company and the DOJ reached agreement on the terms of a Deferred Prosecution Agreement ("DPA") that would resolve the DOJ's inquiry, based on alleged violations of the books and records and internal controls provisions of the Foreign Corrupt Practices Act. Among other terms, the DPA called for the Company to pay a monetary penalty of US\$15,487,500, and engage a compliance monitor for a term of two (2) years. Upon successful completion of the three (3) year term of the DPA, all charges against the Company will be dismissed. On the same date, the SEC agreed to resolve its inquiry through an administrative cease and desist order, arising out of the alleged violations of the same accounting provisions of the FCPA. Among other terms, the SEC order called for the Company to pay an additional monetary penalty of US\$15 million.

In the event that the applicable regulatory authorities believe that the terms of the DPA or the deferred prosecution agreement with the Chilean Public Prosecutor are not complied with, it is possible that such regulatory authorities may reinstate the suspended proceedings against us and may bring further action against us, including in the form of additional inquiries or legal proceedings. Responding to our regulators' inquiries and any future civil, criminal or regulatory inquiries or proceedings diverts our management's attention from day-to-day operations. Additionally, expenses that may arise from responding to such inquiries or proceedings, our review of responsive materials, any related litigation or other associated activities may continue to be significant. Current and former employees, officers and directors may seek indemnification, advancement or reimbursement of expenses from us, including attorneys' fees, with respect to the current inquiry or future proceedings related to this matter. The occurrence of any of the foregoing or adverse determination in litigation or other proceedings or similar actions could materially and adversely affect our business, financial condition, cash flows, results of operations and the prices of our securities.

Current or future challenges to the Lease Agreement and the Project Agreement, if successful, or breaches of obligations under such agreements, could have a negative effect on our business, financial position or operational performance.

Our subsidiary SQM Salar, as a lessee under the Lease Agreement, has exclusive and temporary rights over mining exploitation concessions covering an area of approximately 140,000 hectares in the Salar de Atacama in northern Chile, granting SQM Salar the exclusive right to exploit mineral resources from 81,920 hectares.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

These rights are owned by Corfo and leased to SQM Salar pursuant to (i) a 1993 lease agreement over mining exploitation concessions between SQM Salar and Corfo, a Chilean government entity (the “Lease Agreement”), and (ii) the Salar de Atacama project agreement between Corfo and SQM Salar (the “Project Agreement”). Corfo may not unilaterally amend the Lease Agreement or the Project Agreement. The Lease Agreement establishes that SQM Salar is responsible for making quarterly lease payments to Corfo, maintaining Corfo’s rights over the mining exploitation concessions, and making annual payments to the Chilean government for such concession rights. The Lease Agreement expires on December 31, 2030. Furthermore, under the regulations of the Chilean Nuclear Energy Commission (Comisión Chilena de Energía Nuclear or “CCHEN”), we were originally limited to 180,100 tons of total lithium metallic equivalent (958,672 tons of lithium carbonate equivalent) extraction in the aggregate for all periods. On January 17, 2018, Corfo and our subsidiaries SQM Potasio S.A. and SQM Salar reached an agreement (the “Corfo Arbitration Agreement”) to (i) terminate the previously disclosed arbitration proceedings between Corfo and SQM Salar, which, among other things, sought early termination of the Lease Agreement and (ii) amend the Lease Agreement and the Project Agreement. As part of the agreement to amend the Lease Agreement, Corfo authorized an increase of the production and sales of lithium products produced in the Salar de Atacama up to 349,553 metric tons of lithium metallic equivalent (1,860,670 tons of lithium carbonate equivalent), which is in addition to the approximately 64,816 metric tons of lithium metallic equivalent (345,015 tons of lithium carbonate equivalent) remaining from the originally authorized amount. The amendments of the Lease Agreement and the Project Agreement required under Chilean law the issuance of the applicable resolutions of the Office of the Controller General of the Republic (Contraloría General de la República) and the CCHEN, which were issued.

Our business is substantially dependent on the exploitation rights under the Lease Agreement and the Project Agreement, since all of our products originating from the Salar de Atacama are derived from our extraction operations under the Lease Agreement.

These agreements establish a series of obligations with which SQM Salar must comply. A serious failure to comply with these obligations may jeopardize the exploitation rights under the agreements and the continuity of our operations in the Salar de Atacama. While we believe that we have taken the appropriate precautions to ensure compliance with the obligations and conditions in the agreements, there can be no assurance that we will be able to maintain such compliance, which could jeopardize the continued benefits to us of the agreements and could have a material adverse effect on our business, financial condition and results of operations.

In the event the amendments to the Lease Agreement and the Project Agreement under the Corfo Arbitration Agreement are successfully challenged, or the CCHEN authorization for the increased extraction is revoked, there can be no assurance that we will not reach the lithium extraction limit referred to above prior to the expiration of the term of the Lease Agreement. In such event, we would then be unable to continue extraction of lithium under the Lease Agreement, which could have a material adverse effect on our business, financial condition and results of operations.

We identified a material weakness in our internal controls over payments directed by the office of the former Chief Executive Officer.

In the past, our management determined that the Company did not maintain effective control over payments directed by the office of the former CEO. This determination was reported in our annual report for the year ended December 31, 2014 on Form 20-F, filed with the SEC on May 18, 2015.

Solutions
for human
progress

Notes to the Consolidated Interim Financial Statements as of June 30, 2019

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

We believe we have taken the necessary steps to remediate the identified material weakness and enhance our internal controls. However, any failure to maintain effective internal control over financial reporting could (i) result in a material misstatement in our financial reporting or financial statements that would not be prevented or detected, (ii) cause us to fail to meet our reporting obligations under applicable securities laws or (iii) cause investors to lose confidence in our financial reporting or financial statements, the occurrence of any of which could materially and adversely affect our business, financial condition, cash flows, results of operations and the prices of our securities.

Volatility of world lithium, fertilizer and other chemical prices and changes in production capacities could affect our business, financial condition and results of operations.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

The prices of our products are determined principally by world prices, which, in some cases, have been subject to substantial volatility in recent years. World lithium, fertilizer and other chemical prices constantly vary depending upon the relationship between supply and demand at any given time. Supply and demand dynamics for our products are tied to a certain extent to global economic cycles, and have been impacted by circumstances related to such cycles. Furthermore, the supply of lithium, certain fertilizers or other chemical products, including certain products that we provide, varies principally depending on the production of the major producers, (including us) and their respective business strategies.

The world prices of our products increase and decrease as a result of variations in the general global economic and financial situation. We cannot guarantee that the sale prices or volumes of our products will not fall in the future.

We expect that the prices of our products will continue to be influenced by global supply and demand, by the business strategies of major producers, and by other factors. Some of the major producers (including us) have increased or could increase their production. Consequently, the prices of our products may be subject to substantial volatility. High volatility or a substantial decrease in the sales prices or volumes of any of our products could have a negative effect on our business, financial position or operational performance.

We expect that prices for the products we manufacture will continue to be influenced, among other things, by worldwide supply and demand and the business strategies of major producers. Some of the major producers (including us) have increased or have the ability to increase production. As a result, the prices of our products may be subject to substantial volatility. High volatility or a substantial decline in the prices or sales volumes of one or more of our products could have a material adverse effect on our business, financial condition and results of operations.

Our sales to emerging markets and expansion strategy expose us to risks related to economic conditions and trends in those countries.

We sell our products in more than 110 countries around the world. In 2018, approximately 34% of our sales were made in emerging market countries: 8% in Latin America (excluding Chile); 8% in Africa and the Middle East (excluding Israel); 8% in Chile and 11% in Asia and Oceania (excluding Australia, Japan, New Zealand, South Korea and Singapore). We expect to expand our sales in these and other emerging markets in the future. In addition, we may carry out acquisitions or joint ventures in jurisdictions in which we currently do not operate, relating to any of our businesses or to new businesses in which we believe we may have sustainable competitive advantages. The results of our operations and our prospects in other countries in which we establish operations will depend, in part, on the general level of political stability and economic activity and policies in those countries. Future developments in the political systems or economies of these countries or the implementation of future governmental policies in those countries, including the imposition of withholding and other taxes, restrictions on the payment of dividends or repatriation of capital, the imposition of import duties or other restrictions, the imposition of new environmental regulations or price controls or changes in relevant laws or regulations, could have a material adverse effect on our business, financial condition and results of operations in those countries.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

Our inventory levels may vary for economic or operational reasons.

In general, economic conditions or operational factors can affect our inventory levels. Higher inventories carry a financial risk due to increased need for cash to fund working capital and could imply increased risk of loss of product. At the same time, lower levels of inventory can hinder the distribution network and process, thus impacting sales volumes. There can be no assurance that inventory levels will remain stable. These factors could have a material adverse effect on our business, financial condition and results of operations.

Our measures to minimize our exposure to bad debt may not be effective and a significant increase in our accounts receivable coupled with the financial condition of customers may result in losses that could have a material adverse effect on our business, financial condition and results of operations.

Potentially negative effects of global economic conditions on the financial condition of our customers may include the extension of the payment terms of our accounts receivable and may increase our exposure to bad debt. While we have implemented certain safeguards, such as using credit insurance, letters of credit and prepayment for a portion of sales, to minimize the risk, we cannot assure you that such safeguards will be effective and a significant increase in our accounts receivable coupled with the financial condition of customers may result in losses that could have a material adverse effect on our business, financial condition and results of operations.

New production of iodine or lithium from current or new competitors in the markets in which we operate could adversely affect prices.

In recent years, new and existing competitors have increased the supply of iodine and lithium, which has affected prices for both products. Further production increases could negatively impact prices. There is limited information on the status of new iodine or lithium production capacity expansion projects being developed by current and potential competitors and, as such, we cannot make accurate projections regarding the capacities of possible new entrants into the market and the dates on which they could become operational. If these potential projects are completed in the short term, they could adversely affect market prices and our market share, which, in turn, could have a material adverse effect on our business, financial condition and results of operations.

We have a capital expenditure program that is subject to significant risks and uncertainties.

Our business is capital intensive. Specifically, the exploration and exploitation of reserves, mining and processing costs, the maintenance of machinery and equipment and compliance with applicable laws and regulations require substantial capital expenditures. We must continue to invest capital to maintain or to increase our exploitation levels and the amount of finished products we produce.

In addition, we require environmental permits for our new projects. Obtaining permits in certain cases may cause significant delays in the execution and implementation of new projects and, consequently, may require us to reassess the related risks and economic incentives. We cannot assure you that we will be able to maintain our production levels or generate sufficient cash flow, or that we will have access to sufficient investments, loans or other financing alternatives, to continue our activities at or above present levels, or that we will be able to implement our projects or receive the necessary permits required for them in time. Any or all of these factors may have a material adverse effect on our business, financial condition and results of operations.

High raw materials and energy prices could increase our production costs and cost of sales, and energy may become unavailable at any price.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

We rely on certain raw materials and various energy sources (diesel, electricity, liquefied natural gas, fuel oil and others) to manufacture our products. Purchases of energy and raw materials we do not produce constitute an important part of our cost of sales, approximately 14% in 2018. In addition, we may not be able to obtain energy at any price if supplies are curtailed or otherwise become unavailable. To the extent we are unable to pass on increases in the prices of energy and raw materials to our customers or we are unable to obtain energy, our business, financial condition and results of operations could be materially adversely affected.

Our reserve estimates are internally prepared and not subject to review by external geologists or an external auditing firm and could be subject to significant changes, which may have a material adverse effect on our business, financial condition and results of operations.

Our caliche ore mining reserve estimates and our Salar de Atacama brine mining reserve estimates are prepared by our own geologists and hydrogeologists and are not subject to review by external geologists or an external auditing firm. Estimation methods involve numerous uncertainties as to the quantity and quality of the reserves, and reserve estimates could change upwards or downwards. A downward change in the quantity and/or quality of our reserves could affect future volumes and costs of production and therefore have a material adverse effect on our business, financial condition and results of operations.

Quality standards in markets in which we sell our products could become stricter over time.

In the markets in which we do business, customers may impose quality standards on our products and/or governments may enact stricter regulations for the distribution and/or use of our products. As a result, if we cannot meet such new standards or regulations, we may not be able to sell our products. In addition, our cost of production may increase in order to meet any such newly imposed or enacted standards or regulations. Failure to sell our products in one or more markets or to important customers could materially adversely affect our business, financial condition and results of operations.

Chemical and physical properties of our products could adversely affect their commercialization.

Since our products are derived from natural resources, they contain inorganic impurities that may not meet certain customer or government standards. As a result, we may not be able to sell our products if we cannot meet such requirements. In addition, our cost of production may increase in order to meet such standards. Failure to meet such standards could materially adversely affect our business, financial condition and results of operations if we are unable to sell our products in one or more markets or to important customers in such markets.

Our business is subject to many operating and other risks for which we may not be fully covered under our insurance policies.

Our facilities and business operations in Chile and abroad are insured against losses, damage or other risks by insurance policies that are standard for the industry and that would reasonably be expected to be sufficient by prudent and experienced persons engaged in businesses similar to ours.

We may be subject to certain events that may not be covered under our insurance policies, which could have a material adverse effect on our business, financial condition and results of operations. Additionally, as a result of major earthquakes and unexpected rains and flooding in Chile, as well as other natural disasters worldwide, conditions in the insurance market have changed and may continue to change in the future, and as a result, we may face higher premiums and reduced coverage, which could have a material adverse effect on our business, financial condition and results of operations.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

Changes in technology or other developments could result in preferences for substitute products.

Our products, particularly iodine, lithium and their derivatives, are preferred raw materials for certain industrial applications, such as rechargeable batteries and liquid-crystal displays (LCDs). Changes in technology, the development of substitute products or other developments could adversely affect demand for these and other products which we produce. In addition, other alternatives to our products may become more economically attractive as global commodity prices shift. Any of these events could have a material adverse effect on our business, financial condition and results of operations.

We are exposed to labor strikes and labor liabilities that could impact our production levels and costs.

Over 93% of our employees are employed in Chile, of which approximately 65% were represented by 22 labor unions as of December 31, 2018. As in past years, we renegotiated collective bargaining agreements with 14 unions, achieving the anticipated renegotiation of 17 collective bargaining agreements by December 31, 2018, one year before the expiration of the agreements. The 17 collective bargaining agreements were renegotiated for the next three years as of that date. We are exposed to labor strikes and illegal work stoppages that could impact our production levels. If a strike or illegal work stoppage occurs and continues for a sustained period of time, we could be faced with increased costs and even disruption in our product flow that could have a material adverse effect on our business, financial condition and results of operations.

When a serious accident occurs in the workplace, Chilean law requires the company responsible for that workplace to cease work in the area where the accident occurred until SERNAGEOMIN, the National Health Service or the Labor Directorate inspect the site and prescribe the measures required to prevent similar future risks. Work cannot be resumed until all the prescribed measures have been implemented, which take many hours, days or even longer. Such a stoppage could have an adverse effect on our business, financial position or operational performance.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

Lawsuits and arbitrations could adversely impact us.

We are party to a range of lawsuits and arbitrations involving different matters as described in Note 22.1 of our consolidated Financial Statements. Although we intend to defend our positions vigorously, our defense of these actions may not be successful and responding to such lawsuits and arbitrations diverts our management's attention from day-to-day operations. Adverse judgments or settlements in these lawsuits may have a material adverse effect on our business, financial condition and results of operations. In addition, our strategy of being a world leader includes entering into commercial and production alliances, joint ventures and acquisitions to improve our global competitive position. As these operations increase in complexity and are carried out in different jurisdictions, we may be subject to legal proceedings that, if settled against us, could have a material adverse effect on our business, financial condition and results of operations.

We have operations in multiple jurisdictions with differing regulatory, tax and other regimes.

We operate in multiple jurisdictions with complex regulatory environments that are subject to different interpretations by companies and respective governmental authorities. These jurisdictions may have different tax codes, environmental regulations, labor codes and legal framework, which adds complexity to our compliance with these regulations. Any failure to comply with such regulations could have a material adverse effect on our business, financial condition and results of operations.

Environmental laws and regulations could expose us to higher costs, liabilities, claims and failure to meet current and future production targets.

Our operations in Chile are subject to national and local regulations relating to environmental protection. In accordance with such regulations, we are required to conduct environmental impact studies or statements before we conduct any new projects or activities or significant modifications of existing projects that could impact the environment or the health of people in the surrounding areas. We are also required to obtain an environmental license for certain projects and activities. The Environmental Evaluation Service (Servicio de Evaluación Ambiental) evaluates environmental impact studies submitted for its approval. The public, government agencies or local authorities may review and challenge projects that may adversely affect the environment, either before these projects are executed or once they are operating, if they fail to comply with applicable regulations. In order to ensure compliance with environmental regulations, Chilean authorities may impose fines up to approximately US\$9 million per infraction, revoke environmental permits or temporarily or permanently close facilities, among other enforcement measures.

Chilean environmental regulations have become increasingly stringent in recent years, both with respect to the approval of new projects and in connection with the implementation and development of projects already approved, and we believe that this trend is likely to continue. Given public interest in environmental enforcement matters, these regulations or their application may also be subject to political considerations that are beyond our control.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

We regularly monitor the impact of our operations on the environment and on the health of people in the surrounding areas and have, from time to time, made modifications to our facilities to minimize any adverse impact. Future developments in the creation or implementation of environmental requirements or their interpretation could result in substantially increased capital, operation or compliance costs or otherwise adversely affect our business, financial condition and results of operations.

The success of our current investments at the Salar de Atacama and Nueva Victoria is dependent on the behavior of the ecosystem variables being monitored over time. If the behavior of these variables in future years does not meet environmental requirements, our operation may be subject to important restrictions by the authorities on the maximum allowable amounts of brine and water extraction.

Our future development depends on our ability to sustain future production levels, which requires additional investments and the submission of the corresponding environmental impact studies or statements. If we fail to obtain approval or required environmental licenses, our ability to maintain production at specified levels will be seriously impaired, thus having a material adverse effect on our business, financial condition and results of operations.

In addition, our worldwide operations are subject to international and other local environmental regulations. Since environmental laws and regulations in the different jurisdictions in which we operate may change, we cannot guarantee that future environmental laws, or changes to existing environmental laws, will not materially adversely impact our business, financial condition and results of operations.

Our water supply could be affected by geological changes or climate change.

Our access to water may be impacted by changes in geology, climate change or other natural factors, such as wells drying up or reductions in the amount of water available in the wells or rivers from which we obtain water, that we cannot control. Any such change may have a material adverse effect on our business, financial condition and results of operations.

Any loss of key personnel may materially and adversely affect our business.

Our success depends in large part on the skills, experience and efforts of our senior management team and other key personnel. The loss of the services of key members of our senior management or employees with critical skills could have a negative effect on our business, financial condition and results of operations. If we are not able to attract or retain highly skilled, talented and qualified senior managers or other key personnel, our ability to fully implement our business objectives may be materially and adversely affected.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

A significant percentage of our shares are held by two principal shareholder groups who may have interests that are different from that of other shareholders and of each other. Any change in such principal shareholder groups may result in a change of control of the Company or of its Board of Directors or its management, which may have a material adverse effect on our business, financial condition and results of operations.

As of December 5, 2018, two principal shareholder groups held in the aggregate 57.86% of the total outstanding shares of SQM, including a majority of our Series A common shares, and have the power to elect seven of our eight directors. The interests of the two principal shareholder groups may in some cases differ from those of other shareholders and of each other.

Separately, Pampa Group currently owns 32% of SQM's shares. The Pampa Group was considered by the CMF to be the Company's controller until November 30, 2018. However, given the distribution of the Company's shares, the CMF considers that from that date the Pampa Group does not exercise decisive influence over the Company's management, since it does not have a predominant interest that enables it to take management decisions. The CMF may change its opinion in the future, depending on the circumstances that led to its opinion.

On December 5, 2018, Inversiones TLC SpA, a subsidiary of Tianqi, acquired from Nutrien approximately 23.77% of the Company's shares. Tianqi currently holds 25.86% of the Company's shares .

The divestiture by the Pampa Group or Tianqi, or potential changes in the circumstances that have led to the determination of the CMF related to the controller status of the shareholders of the Company, or a combination thereof, may have a material adverse effect on our business, financial condition and results of operations.

Tianqi is a significant shareholder and a competitor of the Company, which can increase the risks of competition.

Tianqi is a competitor in the lithium business, and as a result of the number of shares that it owns of the Company, it has the right to choose up to three Board members. On August 27, 2018, Tianqi and the Chilean antitrust regulator (the Chilean National Economic Prosecutor's Office, or FNE for its initials in Spanish), entered into an extrajudicial settlement agreement, under which certain restrictive measures in order to (i) maintain the competitive conditions of the lithium market, (ii) mitigate the risks described in the agreement and (iii) limit Tianqi's access to certain information of the Company and its subsidiaries, which are defined as "sensitive information" under the agreement, were implemented.

The presence of a shareholder which is at the same time a competitor of the Company and the right of this competitor to choose Board members could generate risks to free competition and/or increase the risks of an investigation of free competition against the Company, whether in Chile or in other countries, all of which could have an adverse material effect in our business.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

Our information technology systems may be vulnerable to disruption which could place our systems at risk from data loss, operational failure, or compromise of confidential information.

We rely on various computer and information technology systems, and on third party developers and contractors, in connection with our operations, including two networks that link our principal subsidiaries to our operating and administrative facilities in Chile and other parts of the world and ERP software systems, which are used mainly for accounting, monitoring of supplies and inventories, billing, quality control, research activities, and production process and maintenance control. In addition, we use Cloud technologies to support new business processes related to the Internet of Things (IoT) and Advanced Analytics, which allow us to collect information enabling us to advance the predictive short-term and medium-term analysis of our production process and its possible automation in the long term. Our information technology systems are susceptible to disruption, damage or failure from a variety of sources, including errors by employees or contractors, computer viruses, cyber-attacks, misappropriation of data by outside parties, and various other threats. We have taken certain measures to identify and mitigate these risks, including conducting a cybersecurity review and initiating process automation and digitalization projects at various sites with the object of reducing operational risk and improving security and operational efficiency, which also includes modernization of existing information technology infrastructure and communications systems. However, we cannot guarantee that due to the increasing sophistication of cyber-attacks our systems will not be compromised and because we do not maintain specialized cybersecurity insurance, our insurance coverage for protection against cybersecurity risk may not be sufficient. Cybersecurity breaches could result in losses of assets or production, operational delays, equipment failure, inaccurate recordkeeping, or disclosure of confidential information, any of which could result in business interruption, reputational damage, lost revenue, litigation, penalties or additional expenses and could have a material adverse effect on our business, financial condition and results of operations.

Risks Related to the Market in General

Currency fluctuations may have a negative effect on our financial performance.

We transact a significant portion of our business in U.S. dollars, and the U.S. dollar is the currency of the primary economic environment in which we operate. In addition, the U.S. dollar is our functional currency for financial statement reporting purposes. A significant portion of our costs, however, is related to the Chilean peso. Therefore, an increase or decrease in the exchange rate between the Chilean peso and the U.S. dollar would affect our costs of production. The Chilean peso has been subject to large devaluations and revaluations in the past and may be subject to significant fluctuations in the future.

As an international company operating in several other countries, we also transact business and have assets and liabilities in other non-U.S. dollar currencies, such as, among others, the Euro, the South African rand, the Mexican peso, the Chinese yuan, the Thai baht and the Brazilian real. As a result, fluctuations in the exchange rates of such foreign currencies to the U.S. dollar may have a material adverse effect on our business, financial condition and results of operations.

Interest rate fluctuations may have a material impact on our financial performance

A relative increase in the rate could materially impact our business, financial condition and results of operations.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

We may be subject to risks associated with the discontinuation, reform or replacement of benchmark indices.

Interest rate, foreign exchange rate and other types of indices which are deemed to be “benchmarks” are the subject of increased regulatory scrutiny and may be discontinued, reformed or replaced. For example, in 2017, the U.K. Financial Conduct Authority announced that it will no longer persuade or compel banks to submit rates for the calculation of the London interbank offered rate (“LIBOR”) benchmark after 2021. This announcement indicates that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021, and it appears likely that LIBOR will be discontinued or modified by 2021. This and other reforms may cause benchmarks to be different than they have been in the past, or to disappear entirely, or have other consequences which cannot be fully anticipated which introduces a number of risks for our business. These risks include (i) legal risks arising from potential changes required to document new and existing transactions; (ii) financial risks arising from any changes in the valuation of financial instruments linked to benchmark rates; (iii) pricing risks arising from how changes to benchmark indices could impact pricing mechanisms on some instruments; (iv) operational risks arising from the potential requirement to adapt IT systems, trade reporting infrastructure and operational processes;] and (v) conduct risks arising from the potential impact of communication with customers and engagement during the transition period. The replacement benchmarks, and the timing of and mechanisms for implementation have not yet been confirmed by central banks. Although it is not currently possible to determine whether, or to what extent, any such changes would affect us, the discontinuation or reformation of existing benchmark rates or the implementation of alternative benchmark rates may have a material adverse effect on our business, results of operations, financial condition and prospects.

Risks Relating to Chile

As we are a company based in Chile, we are exposed to Chilean political risks.

Our business, results of operations, financial condition and prospects could be affected by changes in policies of the Chilean government, other political developments in or affecting Chile, legal changes in the standards or administrative practices of Chilean authorities or the interpretation of such standards and practices, over which we have no control.

Changes in regulations regarding, or any revocation or suspension of our concessions could negatively affect our business.

Any changes to regulations to which we are subject or adverse changes to our concession rights, or a revocation or suspension of our concessions, could have a material adverse effect on our business, financial condition and results of operations.

Changes in mining or port concessions could affect our operating costs.

We conduct our mining operations, including brine extraction, under exploitation and exploration concessions granted in accordance with provisions of the Chilean constitution and related laws and statutes. Our exploitation concessions essentially grant a perpetual right (with the exception of the rights granted to SQM Salar with respect to the Salar de Atacama concessions under the Lease Agreement described above, which expires in 2030) to conduct mining operations in the areas covered by the concessions, provided that we pay annual concession fees. Our exploration concessions permit us to explore for mineral resources on the land covered thereby for a specified period of time and to subsequently request a corresponding exploitation concession.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

We also operate port facilities at Tocopilla, Chile, for the shipment of products and the delivery of raw materials pursuant to maritime concessions, which have been granted under applicable Chilean laws and are normally renewable on application, provided that such facilities are used as authorized and annual concession fees are paid.

Any significant adverse changes to any of these concessions could have a material adverse effect on our business, financial condition and results of operations.

Changes in water rights laws and other regulations could affect our operating costs.

We hold water use rights that are key to our operations. These rights were obtained from the Chilean Water Authority (Dirección General de Aguas) for supply of water from rivers and wells near our production facilities, which we believe are sufficient to meet current operating requirements. However, the Chilean Water Rights Code (Código de Aguas or the “Water Code”) is subject to changes, which could have a material adverse impact on our business, financial condition and results of operations. For example, a series of bills are currently being discussed at the Chilean National Congress that seek to desalinate seawater for use in mining production processes, amend the Mining Code for water use in mining operations, amend the Political Constitution on water and introduce changes to the regulatory framework governing the terms of inspection and sanction of water. As a result, the amount of water that we can actually use under our existing rights may be reduced or the cost of such use could increase. These and potential future changes to the Water Code or other relevant regulations could have a material adverse effect on our business, financial condition and results of operations.

The Chilean government could levy additional taxes on corporations operating in Chile.

We cannot guarantee that tax laws will continue to be interpreted or tax rates applied in the same manner that they have been to date. Furthermore, the Chilean Government may decide to levy additional taxes on mining companies or other companies in Chile. Such changes could have an adverse effect on our business, financial position or operational performance.

Draft law that declares lithium mining to be in the national interest

The Chilean National Congress is currently processing a bill, bulletin 10,638-08, which "Declares the exploitation and commercialization of lithium and Sociedad Química y Minera de Chile S.A. to be of national interest." The purpose of this bill is to enable the potential expropriation of the Company's assets, or its lithium operations in general. The bill has only reached its first constitutional proceedings and is subject to the process initiated by parliamentary motion, which includes several possible changes to its current wording. We cannot guarantee that the bill will not eventually be approved by National Congress, nor that its wording does not refer to the Company or its lithium operations. If the bill containing its known current wording is approved, it could have a negative effect on our business, financial position or operational performance.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

However, several bills have been presented to the Chilean National Congress that refer to creating state companies to exploit lithium, restricting the exploration and exploitation of lithium, and other matters that could negatively impact our business, financial position or operational performance

Ratification of the International Labor Organization’s Convention 169 concerning indigenous and tribal peoples might affect our development plans.

Chile, a member of the International Labor Organization (“ILO”), has ratified the ILO’s Convention 169 (the “Indigenous Rights Convention”) concerning indigenous and tribal people. The Indigenous Rights Convention established several rights for indigenous people and communities. Among other rights, the Indigenous Rights Convention states that (i) indigenous groups should be notified and consulted prior to the development of any project on land deemed indigenous, although veto rights are not mentioned, and (ii) indigenous groups have, to the extent possible, a stake in benefits resulting from the exploitation of natural resources in indigenous land. The extent of these benefits has not been defined by the Chilean government. The Chilean government has addressed item (i) above through Supreme Decree No. 66, issued by the Social Development Ministry. This decree requires government entities to consult indigenous groups that may be directly affected by the adoption of legislative or administrative measures, and it also defines criteria for the projects or activities that must be reviewed through the environmental evaluation system that also require such consultation. To the extent that the new rights outlined in the Indigenous Rights Convention become laws or regulations in Chile, judicial interpretations of the convention of those laws or regulations could affect the development of our investment projects in lands that have been defined as indigenous, which could have a material adverse effect on our business, financial condition and results of operations.

We are subject to Chilean and international anti-corruption, anti-bribery, anti-money laundering and international trade laws. Failure to comply with these laws could adversely impact our business and operations.

We are required to be in compliance with all applicable laws and regulations in Chile and internationally with respect to anti-corruption, anti-money laundering, receipt of stolen property, sanctions and other regulatory matters, including the FCPA. Although we and our subsidiaries maintain policies and processes intended to comply with these laws, we cannot ensure that these compliance policies and processes will prevent intentional, reckless or negligent acts committed by our officers or employees.

If we or our subsidiaries fail to comply with any applicable anti-corruption, anti-bribery, receipt of stolen property or anti-money laundering laws, we and our officers and employees may be subject to criminal, administrative or civil penalties and other remedial measures, which could have material adverse effects on our and our subsidiaries’ business, financial condition and results of operations. Any investigation of potential violations of anti-corruption, anti-bribery or anti-money laundering laws by governmental authorities in Chile or other jurisdictions could result in an inability to prepare our consolidated financial statements in a timely manner. This could adversely impact our reputation, ability to access the financial markets and ability to obtain contracts, assignments, permits and other government authorizations necessary to participate in our and our subsidiaries, industry, which, in turn, could have adverse effects on our and our subsidiaries, business, results of operations and financial condition.

35.1 Financial risk management policy, continued

Chile has different corporate disclosure and accounting standards than those you may be familiar with in the United States.

Accounting, financial reporting and securities disclosure requirements in Chile differ in certain significant respects from those required in the United States. Accordingly, the information about us available to you will not be the same as the information available to holders of notes issued by a U.S. company. In addition, although Chilean law imposes restrictions on insider trading and price manipulation, applicable Chilean laws are different from those in the United States, and the Chilean securities markets are not as highly regulated and supervised as the U.S. securities markets.

Chile is located in a seismically active region.

Chile is prone to earthquakes because it is located along major fault lines. The most recent major earthquakes in Chile, which occurred in April 2017 in the Valparaiso region and in December 2016 in Chiloe Island, had a magnitude of 6.9 and 7.6, respectively, on the Richter scale. There were also earthquakes in 2015, 2014 and 2010 that caused substantial damage to some areas of the country. Chile has also experienced volcanic activity. A major earthquake or a volcanic eruption could have significant negative consequences for our operations and for the general infrastructure, such as roads, rail, and access to goods, in Chile. Although we maintain industry standard insurance policies that include earthquake coverage, we cannot assure you that a future seismic or volcanic event will not have a material adverse effect on our business, financial condition and results of operations.

Risks Relating to our Shares and to our ADSs

The price of our ADSs and the U.S. dollar value of any dividends will be affected by fluctuations in the U.S. dollar/Chilean peso exchange rate.

Chilean trading in the shares underlying our ADSs is conducted in Chilean pesos. The depositary will receive cash distributions that we make with respect to the shares in Chilean pesos. The depositary will convert such Chilean pesos to U.S. dollars at the then prevailing exchange rate to make dividend and other distribution payments in respect of ADSs. If the value of the Chilean peso falls relative to the U.S. dollar, the value of the ADSs and any distributions to be received from the depositary will decrease.

Developments in other emerging markets could materially affect the value of our ADSs and our shares.

The Chilean financial and securities markets are, to varying degrees, influenced by economic and market conditions in other emerging market countries or regions of the world. Although economic conditions are different in each country or region, investor reaction to developments in one country or region can have significant effects on the securities of issuers in other countries and regions, including Chile and Latin America. Events in other parts of the world may have a material effect on Chilean financial and securities markets and on the value of our ADSs and our shares.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

The volatility and low liquidity of the Chilean securities markets could affect the ability of our shareholders to sell our ADSs

The Chilean securities markets are substantially smaller, less liquid and more volatile than the major securities markets in the United States. The volatility and low liquidity of the Chilean markets could increase the price volatility of our ADSs and may impair the ability of a holder to sell our ADSs into the Chilean market in the amount and at the price and time the holder wishes to do so.

Our share or ADS price may react negatively to future acquisitions and investments.

Our strategy includes constantly searching for opportunities to consolidate and strengthen our competitive position in various jurisdictions. In accordance with this strategy, we may carry out acquisitions or form partnerships related to any of our businesses, or to new businesses where we believe that we have sustainable competitive advantages. Depending on our capital structure at the time of such acquisitions or partnerships, we may need to significantly increase our borrowing and/or equity, which will affect our future financial position and cash flows. Any change in our financial position could affect our operational performance and negatively impact the price of our shares.

ADS holders may be unable to enforce rights under U.S. securities laws.

Because we are a Chilean company subject to Chilean law, the rights of our shareholders may differ from the rights of shareholders in companies incorporated in the United States, and ADS holders may not be able to enforce or may have difficulty enforcing rights currently in effect under U.S. federal or state securities laws.

Our Company is an open stock corporation incorporated under the laws of the Republic of Chile. Most of our directors and officers reside outside the United States, principally in Chile. All or a substantial portion of the assets of these persons are located outside the United States. As a result, if any of our shareholders, including holders of our ADSs, were to bring a lawsuit against our officers or directors in the United States, it may be difficult for them to effect service of legal process within the United States upon these persons. Likewise, it may be difficult for them to enforce judgments obtained in United States courts based upon the civil liability provisions of the federal securities laws in the United States against them in the United States.

In addition, there is no treaty between the United States and Chile providing for the reciprocal enforcement of foreign judgments. However, Chilean courts have enforced judgments rendered in the United States, provided that the Chilean court finds that the United States court respected basic principles of due process and public policy. Nevertheless, there is doubt as to whether an action could be brought successfully in Chile in the first instance on the basis of liability based solely upon the civil liability provisions of the United States federal securities laws.

Nota 35 Información adicional (Unaudited), continued

35.1 Financial risk management policy, continued

As preemptive rights may be unavailable for our ADS holders, they have the risk of their holdings being diluted if we issue new stock.

Chilean laws require companies to offer their shareholders preemptive rights whenever issuing new shares of capital stock so shareholders can maintain their existing ownership percentage in a company. If we increase our capital by issuing new shares, a holder may subscribe for up to the number of shares that would prevent dilution of the holder's ownership interest.

If we issue preemptive rights, United States holders of ADSs would not be able to exercise their rights unless a registration statement under the Securities Act were effective with respect to such rights and the shares issuable upon exercise of such rights or an exemption from registration were available. We cannot assure holders of ADSs that we will file a registration statement or that an exemption from registration will be available. We may, in our absolute discretion, decide not to prepare and file such a registration statement. If our holders were unable to exercise their preemptive rights because we did not file a registration statement, the depositary bank would attempt to sell their rights and distribute the net proceeds from the sale to them, after deducting the depositary's fees and expenses. If the depositary could not sell the rights, they would expire and holders of ADSs would not realize any value from them. In either case, ADS holders' equity interests in us would be diluted in proportion to the increase in our capital stock.

If we were classified as a Passive Foreign Investment Company by the U.S. Internal Revenue Service, there could be adverse consequences for U.S. investors.

We believe that we were not classified as a Passive Foreign Investment Company ("PFIC") for 2018. Characterization as a PFIC could result in adverse U.S. tax consequences to you if you are a U.S. investor in our shares or ADSs. For example, if we (or any of our subsidiaries) are a PFIC, our U.S. investors may become subject to increased tax liabilities under U.S. tax laws and regulations and will become subject to burdensome reporting requirements. The determination of whether or not we (or any of our subsidiaries or portfolio companies) are a PFIC is made on an annual basis and will depend on the composition of our (or their) income and assets from time to time.

Changes in Chilean tax regulations could have adverse consequences for U.S. investors.

Currently cash dividends paid by us to foreign shareholders are subject to a 35% Chilean withholding tax. When the Company pays a corporate income tax on the income from which the dividend is paid, known as a "First Category Tax", a credit for the full amount of the First Category Tax effectively reduces the rate of Withholding Tax. Changes in Chilean tax regulations could have adverse consequences for U.S. investors
